DUTHIE SEED CO.

One of the oldest established businesses in the Northwest. It was established in 1899 and at the present time ships seeds all over the United States and Canada.

We are growers of seeds and in addition to our own requirements produce a large amount of seeds for some of the largest Eastern seed houses. Our seeds are produced under the most careful supervision and selected from the standpoint of satisfied customers.

STORES AND WHERE TO VISIT THEM

LEWISTON, Idaho, 826 Main Street. Just one door from corner of Eighth and Main. Located in same location since 1925.

Our SPOKANE Store located at 510 W. Main Ave. In the heart of the business district. You will not have any trouble locating this store. Pay us a visit when in Spokane.

Our MOSCOW, Idaho, Store—This store is located at 205 South Main and carries a complete line of seeds, feeds and farm equipment. Be sure to visit us when you are ready to buy seeds.

In addition to these stores we have our Warehouse and Seed Shipping Department located on Snake River Ave., Lewiston. This warehouse and seed cleaning plant is on railroad and has more than 15,000 square feet of floor space. We are equipped to serve you.

OUR GUARANTEE

Our seeds, plants and nursery stock are sold to you with the express understanding that if they are not as represented and not fully satisfactory when you receive them, we will take them back and CHEERFULLY REFUND YOUR MONEY. But as there are so many outside influences over which we have no control, such as climate, method of planting, care, condition of soil, etc., we cannot guarantee a crop.

Twenty-four Hour Service

Mail orders receive our very careful attention. After your order is received it is checked and a record made of it. It then goes to the shipping department where the order is filled and re-checked before being packed. After packing it is delivered to Post Office or Express Company and delivered to you.

DUTHIE SEED CO.

Baby Chicks

Blood Tells

AND SO DOES BLOOD-TESTING

Government experts have proved that the baby chick loss from untested breeders averages twice as much as the loss from BWD blood-tested flocks.

Buy baby chicks with good size, big egg production, and vitality bred right into them, and disease tested out.

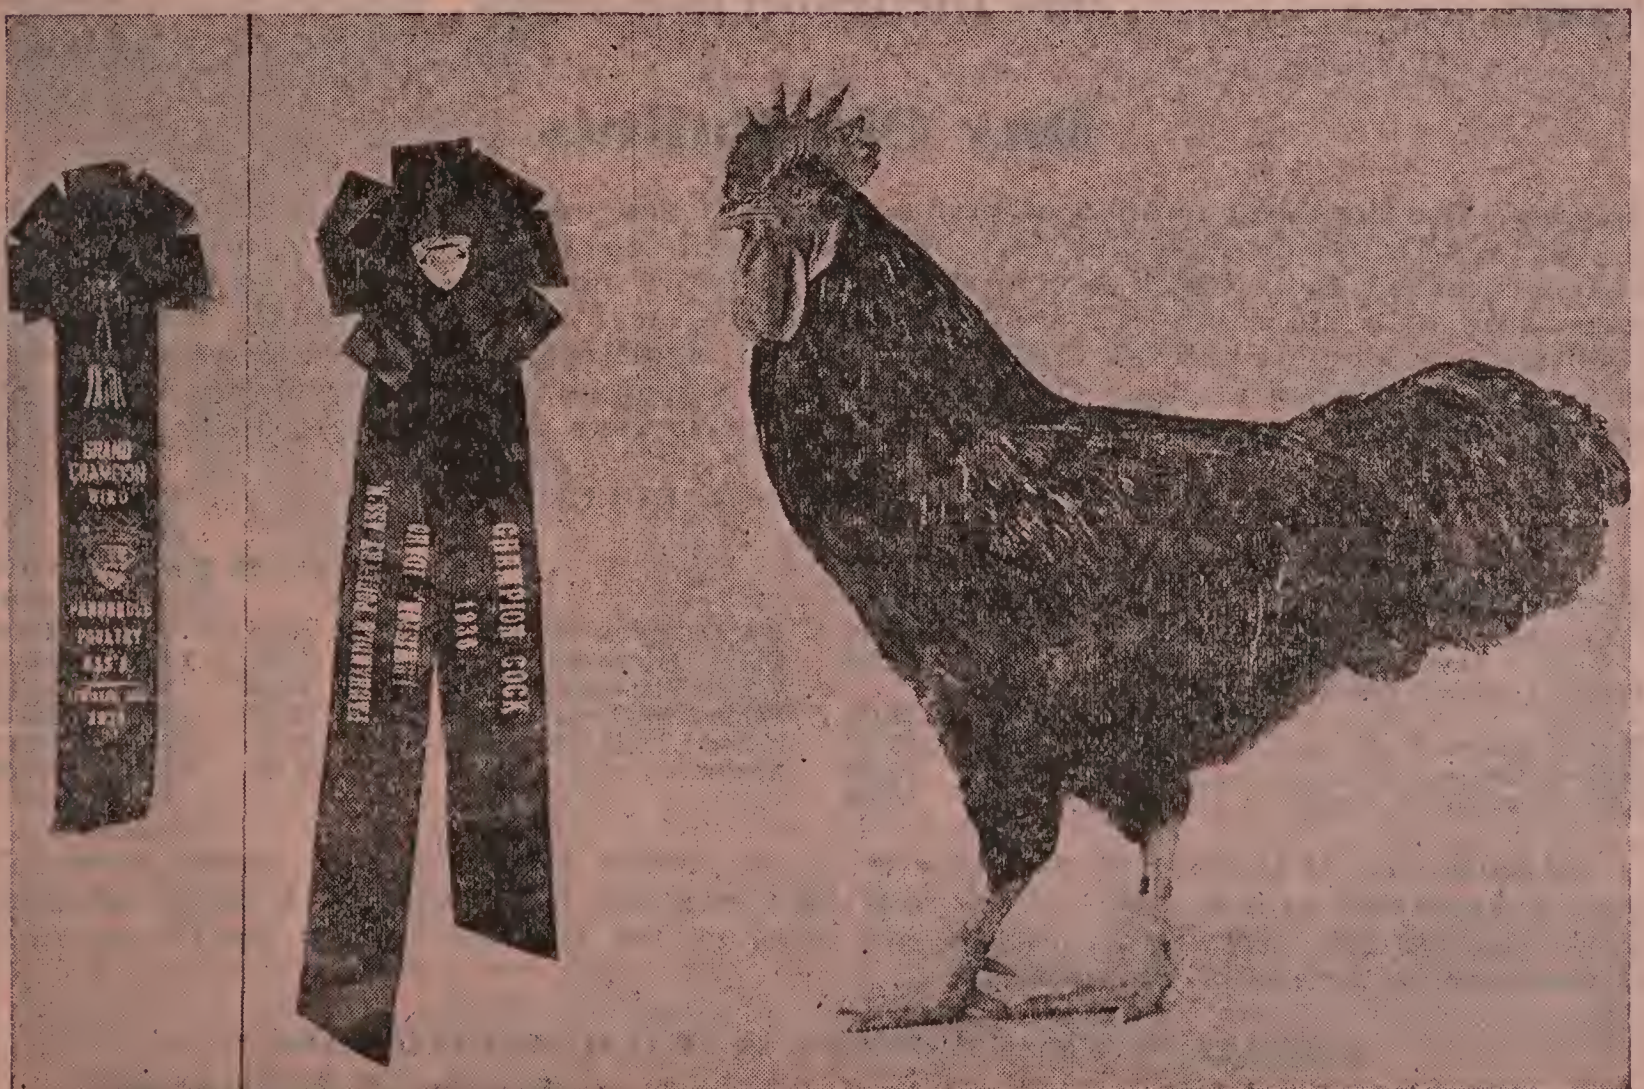

We especially recommended the following four breeds to you.

Rhode Island Red. Good size. We have a fine laying strain.

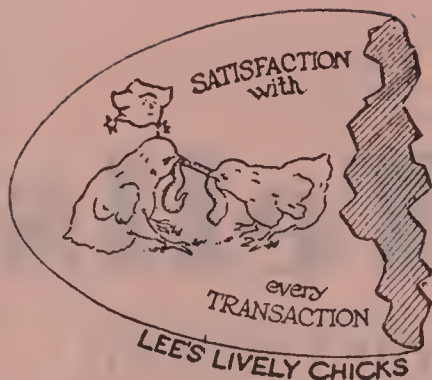

Barred Plymouth Rock. Fine meat bird, good egg production, one of the best breeds for capons.

S. C. White Leghorn. The big Hollywood type also the wonderful Hanson strain. We have them either regular hatch or sexed pullets.

Buff Orpington. Prized as a meat bird and great winter layer, especially in the colder sections.

One of our prize birds. Buy the best here.

Prepared for shipment as in previous years with no attempt at segregation of sexes. Large, strong, vigorous chicks expertly selected for shipment. Carefully boxed and ventilated to arrive not only 100% live delivery as guaranteed, but safe arrival of healthy, active chicks worthy of our slogan.

Day Old Pullets

Our fourth season in selling Day-old Pullets. All selections made by a properly qualified or licensed Baby Chick Sexing Expert. Our work now based on three full years of experience with thousands of sexed chicks, intensive training and graduate school work resulting in a diploma and full credentials. Our Mr. Armstrong is prepared to pass any legitimate test in the art of Baby Chick Sexing in any manner prescribed for practical commercial work. We confidently expect our work this year to exceed 95% in accuracy.

WE GUARANTEE 90% PULLETS

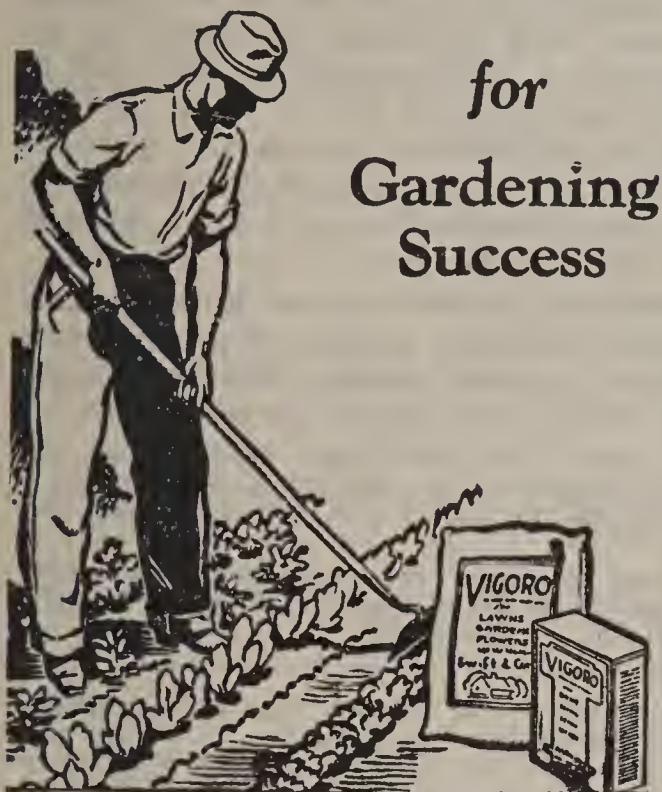

Adjustments. If through accident or error an order should contain more cockerels than guaranteed, proper verification must be forwarded to us within 12 weeks of shipment. In such case we will refund the full price of the Day-old Pullets for the number of Cockerels in excess of the guarantee.

Give your pullets a better start. Save money by buying Baby Pullets.

Duthie's Select Vegetables

Good Seed

Supreme Quality Seeds

for
**Gardening
Success**

Asparagus

One ounce of seed will produce 300 or more plants.

MARY WASHINGTON — A most remarkable Asparagus which has been developed by the United States Department of Agriculture. The plants form large clean shoots which are thick and heavy. The color is rich dark green, tinted darker at the tips. It is a heavy yielder and a long-lived producer of exceptionally fine flavor. Price postpaid 3rd zone. Pkt. 5c; oz. 20c; 2 oz. 35c; lb. \$1.75.

See Page 29 for Plants

Mary Washington

Garden Beans

One pound will plant 100 feet of drill.

CULTURE—Plant in warm, loamy soil at the beginning of warm weather, and at intervals for succession until August. Rows may be made two feet apart, and the beans planted two to four

inches apart in the drills, or three or four beans in hills six to eight inches apart. Cultivate and hoe frequently when the vines are dry.

Green-Podded Varieties

NEW STRINGLESS or TENDERGREEN—54 Days. Color or seed resembles Refugee Stringless. Height of vine, 17 inches. Pods 6 inches long, round, almost straight, meaty. 5 or 6 beans in a pod. Resembles Full Measure, but hardier and more dependable. Will undoubtedly take the place of Full Measure with Market Gardeners and Canners. ½ lb. 20c; 1 lb. 35c; 5 lbs. \$1.50.

BURPEE'S STRINGLESS GREEN-POD — Is enormously productive and combines this feature with hardiness and extreme earliness. The pods are meaty and juicy, lacking the faintest signs of any strings. They are tender, brittle, and of very fine flavor. Pre-paid 3rd zone. Carton 15c; 1 lb. 30c; 5 lbs. \$1.35; 10 lbs. \$2.25.

GIANT STRINGLESS GREEN-POD—The plants are of strong growth, and bear a fine crop of pods. The pods are meaty, nearly round, brittle and stringless. Somewhat similar to Burpee's Stringless Green-Pod, but matures a few days later. The color of the pods is lighter than Burpee's Stringless Green-Pod and they show deeper depressions between the beans. Carton 15c; 1 pound 30c; 5 pounds \$1.35; 10 pounds \$2.25.

DWARF HORTICULTURAL—Excellent either as a snap or shell bean. 60 days. Also called Cranberry and Italian bean. A bush bean with large green pods, splashed with carmine. Seed pale buff mottled pink. Carton 15c; 1 pound 30c; 5 pounds \$1.25.

STRINGLESS REFUGEE—A splendid improvement on the Refugee Thousand to One, with which it compares in season and earliness, but is absolutely stringless. Pods are round, more even in length, possibly a little lighter green in color, exceedingly tender and of a delicious flavor. A splendid bean both for snap and canning purposes. Carton 15c; 1 pounds 30c; 5 pounds \$1.35.

Burpee's Stringless Green-Pod

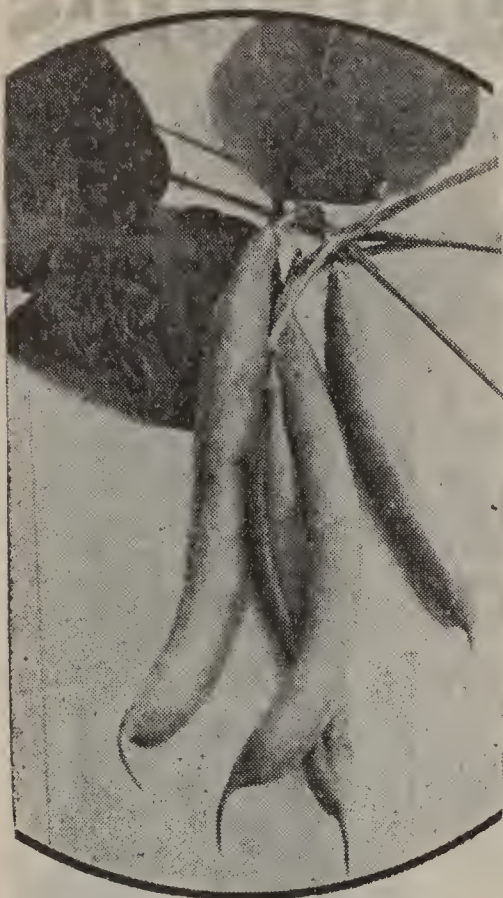

EARLY RED VALENTINE—A choice variety for early use. Pods are of excellent quality. A favorite where moisture is limited. Carton 15c; 1 pound 30c; 5 pounds \$1.35; 10 pounds \$2.25.

VIGORO

A balanced plant food that will produce wonderful results when applied to vegetables according to instructions furnished with it.

GARDEN BEANS—Continued

Wax-Podded Varieties

Duthie's Stringless Wax

DUTHIE'S STRINGLESS WAX—A most prolific variety of superlative quality. The handsome rich yellow pods are slightly curved, averaging 6 to 7 inches in length. They are almost round, very meaty and sweet, and perfectly stringless at all stages. The habit of the plant is free branching, but sturdy and upright, every branch carrying a heavy crop of the magnificent pods. Valuable for its productiveness and disease-resisting qualities. Has all the good features of the Stringless Green Pod and is ready to use at about the same time. Carton 15c; 1 lb. 30c; 5lbs. \$1.35; 10 lbs. \$2.50.

GOLDEN WAX—This variety is ready for use with Stringless Green-Pod. The pods are medium in size, flattened and fleshy and of good quality. A good variety for the home garden. Carton 15c; 1 lb. 30c; 5 lbs. \$1.35; 10 lbs. \$2.25.

PENCIL-POD BLACK WAX—This black wax bean produces a very slender type of pod of excellent quality for canning and for market garden use. They are free of strings and are of rich flavor. Carton 10c; 1 lb. 30c; 5 lbs. \$1.35; 10 lbs. \$2.25.

DAVIS WHITE WAX—This bean is among the earliest of the yellow-pod varieties in maturity and produces large pods of excellent quality. Carton 15c; 1 lb. 25c; 5 lbs. \$1.15; 10 lbs. \$2.00

Home canned beans will help solve the winter vegetable problem. Grow your canning supply this season.

Pole or Climbing Beans Green and Wax-Pod Varieties

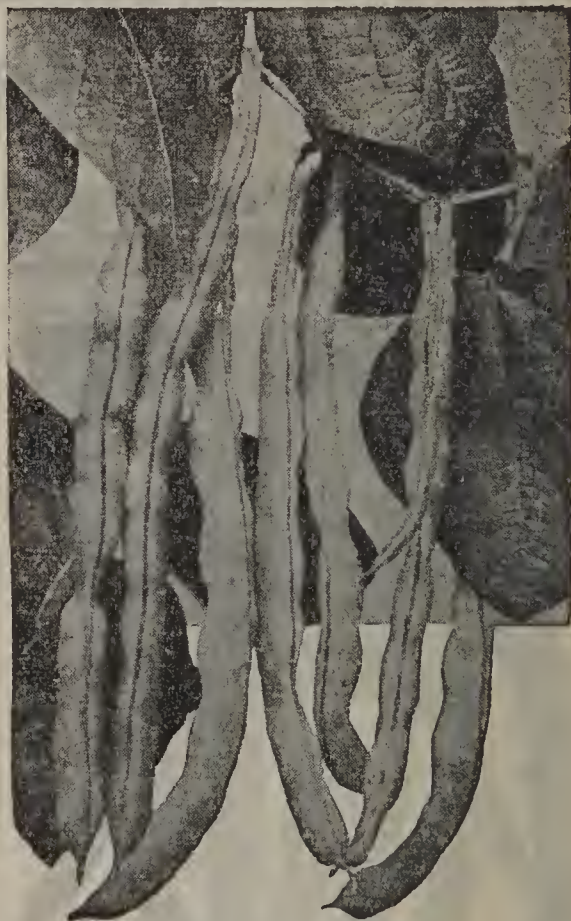

DELICIOUS GIANT—Between Oregon Giant and Kentucky Wonder. Twice as productive, equal in size and quality, the easiest bean of all to pick. The beans are produced in clusters of 4 to 6, the stems of which protrude outside the foliage. It is easily possible to pick a pound of beans from three clusters. The flavor is unsurpassed and the pods are so meaty that they shrink very little when cooked. The pods are green, faintly striped with red lines which disappear when cooked. The vines are very vigorous and the pods are more rounded than the Oregon Giant but fully as long. If you like green beans fresh for the table or for canning do not fail to order this. Carton 15c; ½ lb. 20c; 1 lb. 35c

KENTUCKY WONDER or OLD HOMESTEAD—An early and productive variety that climbs well and bears a fine crop of large green pods, 7 to 9 inches in length. They are thick and meaty, tender, brittle, and of good quality, showing slight strings as the pods reach full size. Carton 15c; 1 lb. 30c; 5 lbs. \$1.35.

OREGON GIANT—The large fleshy pods 10 to 12 inches in length are free from stringiness, tender, crisp and delicious. The size, splendid quality and rich flavor make this one of the most desirable beans for home garden and for canning. "Oregon Giant" is a strong grower and yields heavily, bearing its enormous pods in great clusters. The color is light greenish yellow, splashed red. Carton 15c; 1 lb. 35c; 5 lbs. \$1.50; 10 lbs. \$2.50.

GOLDEN CLUSTER WAX—74 days. Plants large, vigorous, with dense foliage, good climber, very productive. Pods flat, smooth, waxy yellow, tender. Seeds oval flat, white. ½ lb. 20c; 1 lb. 35c; 5 lbs. \$1.50. Postpaid.

KENTUCKY WONDER WAX—A variety similar to the green-pod Kentucky Wonder in habits of growth but the pods are bright yellow in color. The seeds are dark brown and somewhat wrinkled in appearance. Carton 15c; 1 lb. 35c; 5 lbs. \$1.50; 10 lbs. \$2.75.

Kentucky Wonder

Lima Beans

IMPROVED BURPEE BUSH—A large seeded bush lima somewhat later in maturity than the Henderson bush. This bean will mature at lower elevations. Carton 15c; 1 lb. 40c; 5 lbs. \$1.75.

HENDERSON BUSH—A small seeded lima, very desirable for home garden where the season is somewhat short. It is very productive and the dry beans are in demand for market purposes. Carton 15c; 1 lb. 35c; 5 lbs. \$1.50.

INOCULATE BEANS
WITH NITRAGIN

OREGON POLE LIMA—The only Bean of its kind that will thrive in our cool climate. It grows a strong, thrifty vine and is very prolific, bearing continuously until frost, the blossoms bursting from the top shoots in long panicles, while the pods can be seen in every stage of development, to the matured beans at the bottom of the vine. Pods are well filled, having three to five large beans of the finest quality. It can be planted in any garden soil as early as April. Give the same care and culture as other Beans. They are at their best when the full green pods begin to turn yellow. Carton 15c; 1 lb. 40c; 5 lbs. \$1.75.

Choice Garden Beets

One ounce will sow 50 feet of drill; 6 to 8 pounds per acre.

CULTURE—For early table beets, have drills 16 to 20 inches apart, and sow the seed about one inch deep, as early as the ground can be put in good shape. Give thorough and clean cultivation, and thin the plants to stand 4 inches apart in the rows. For succession sow at intervals until middle of July. For the earliest sowing a light dressing of Vigoro; say 4 pounds per 100 square feet will work wonders.

Table beets should be grown in every garden as they are produced with little effort and supply the table with greens as well as with excellent roots.

Table Varieties

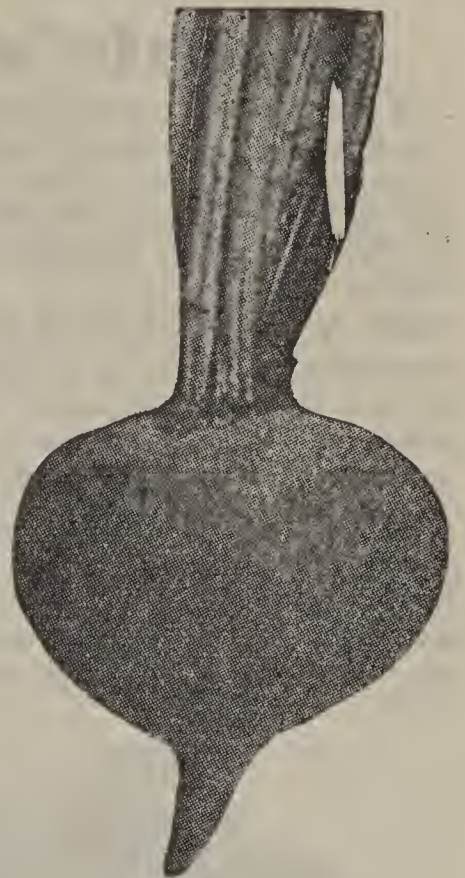

MARKET GARDENER or EARLY WONDER—This extra early Beet is remarkable for its fine quality and rapid growth; deep red color, and handsome shape; as an early market sort it is unrivaled. It is superseding Egyptian, being earlier in development, more attractive and of superior quality for the table, holding its color and cooking quickly. Market gardeners prefer it as it matures evenly, stands a long time and does not split. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 75c.

EARLY BLOOD TURNIP—A globe-shaped variety which is somewhat flattened. The roots are bright red in color and of uniform texture. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; 1 lb. 75c

DETROIT DARK RED—A fine beet for bunching for market; tops exceptionally small and uniformly upright. The roots are perfect turnip shape, with small tap roots. One of the deepest red beets. Quality is of the finest; sweet and tender; best beet for home garden. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c 1 lb. 75c.

CROSBY'S EGYPTIAN—A popular variety used for early planting. The roots are distinctively flattened, the flesh dark red in color. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c 1 lb. 75c

We carry full line of Hudson seeders and cultivators. These necessary tools will pay for themselves in a short while.

Market Gardener

Stock Beets or Mangels

Early planting is important on non-irrigated land because of the difficulty in securing a satisfactory germination. The seed should not be planted too deep and the ground should be rolled after planting to pack the surface soil. Later planting can be done under irrigation with favorable results.

IMPROVED MAMMOTH LONG RED—This variety grows well above the ground and produces a dark red colored root. It is favorite with many growers. Grows to immense size under favorable conditions. Prepaid 3rd zone. Oz. 10c; $\frac{1}{4}$ lb. 20c, lb. 50c; 5 lbs. \$2.00

GIANT HALF SUGAR ROSE—We consider this one of the best for stock feeders because of its yield and excellent feeding value. The skin is rose colored and the flesh white. Prepaid 3rd zone. Oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 50c; 5 lbs. \$2.00.

DANISH SLUDSTRUP—This Mangel grows a large portion of the root above the surface soil. The roots are reddish yellow in color, attaining a large size when fully matured. Prepaid 3rd zone. Oz. 10c; 4 oz. 20c 1 lb. 50c; 5 lbs. \$2.00.

GIANT INTERMEDIATE OR YELLOW GIANT—A variety similar to the Sludstrup but generally considered of higher sugar content. Excellent for stock feed. Prepaid 3rd zone. Oz. 10c; 4 oz. 20c; 1 lb. 50c; 5 lbs \$2.00

GOLDEN TANKARD—The roots of this Mangel are cylindrical in shape and of a deep orange color. This variety is rich in flavor and of high sugar content. Prepaid 3rd zone. Oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 50c; 5 lbs. \$2.00

Mammoth Long Red

Swiss Chard

Four pounds per acre required

Every home garden should contain a few rows of this leafy vegetable. The top only is suitable for food, using the tender leafy portion for greens. The plants grow rapidly and produce a good crop early in the spring before other leafy crops are ready. Poultrymen grow this crop for green feed for use during the early spring.

LUCULLUS—This leafy variety produces large curly leaves with tender white stems. If cut often will continue to produce throughout the season. Prepaid 3rd zone. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; lb. 75c.

Swiss Chard

Duthie's Cabbage

Sow one ounce for 2,000 plants; four to six ounces per acre.

CULTURE—For plants of the earliest sorts, sow seed in January or February under glass and transplant into flats 2 inches apart. Set out as early as season will permit, spacing the plants 24 inches apart in the rows, and rows 3 feet to permit cultivation. For late plants, the seed may be sown as late as June.

EARLY JERSEY WAKEFIELD—One of the earliest varieties, producing conical shaped heads. The heads of this cabbage are not as large as those of the Flat type, yet it is valuable for its earliness. Pkt. 5c; oz. 20c; 4 ozs. 70c; 1 lb. \$1.75.

GOLDEN ACRE—We consider this the best variety for early market use. It is a selection from Copenhagen Market. The heads are round, very compact, solid and early in maturity. Postpaid 3rd zone. Pkt. 5c; oz. 25c; 4 oz. 75c; 1 lb. \$2.25.

Copenhagen Market

Broccoli

ITALIAN GREEN SPROUTING—A plant of the cauliflower family which, after the first head has been harvested produces branching sprouts on which are small loose heads, two inches in diameter, which are cooked like cauliflower. The flavor is delicate and delicious. Pkt. 25c; oz. 60c; 1/4 lb. \$1.75.

Cucumbers

One ounce will plant fifty hills; two pounds will plant one acre.

CULTURE—For very early cucumbers, sow April 1st, in a hotbed upon pieces of sod (grass side down), so that they can be readily transplanted to the open ground, in rich soil, when danger of frost is over. For early use, plant in hills 4 to 6 feet apart each way; thin out to four of the strongest plants to each hill, after all danger of insects is over. Cucumbers should be gathered when large enough for use, whether required or not, if left to ripen, it destroys their productiveness.

LONGFELLOW or VAUGHN—74 days. This is probably the finest of the large varieties. When mature it measures about 15 inches in length, quite prolific, straight, uniform, and is a fine dark green color. Oz. 20c; 1/4 lb. 60c; 1 lb. \$1.75.

DAVIS PERFECT—We recommend this variety as one of the best general purpose cucumbers. The fruits are dark green in color tapering toward the ends, of good size and excellent quality. A choice variety for market.

All Cucumbers postpaid 3rd zone (except as noted): Pkt 5c; 1 oz. 15c; 4 oz. 35c; 1 lb. \$1.25.

Vegetables..
10 days earlier"

(Our Seeds
Grown For
Your
Climate)

COPENHAGEN MARKET—One of the standard varieties of flat headed cabbage for medium early use. Pkt. 5c; oz. 20c; 4 oz. \$70c; 1 lb. \$1.75.

DANISH BALL HEAD—The most popular late variety; head round, firm, fine grained. A good keeper. Pkt. 5c; oz. 20c; 4 oz. 70c; 1 lb. \$1.75.

PREMIUM LATE FLAT DUTCH—An improved old standard variety. Sure header. Pkt. 5c; oz. 20c; 4 oz. 70c; 1 lb. \$1.75.

HOLLAND EXPORT—Excellent red. Pkt. 5c; oz. 20c; 4 oz. 70c; 1 lb. \$1.75.

CHINESE CABBAGE—Resembles Cos Lettuce. Pkt. 5c; oz. 20c; 4 oz. 70c; 1 lb. \$1.75

Brussels Sprouts

A member of the cabbage family, producing a tall stalk, upon which are borne many small cabbage-like heads. A very tender and palatable vegetable. The crop should be grown and handled like a late variety of cabbage. Postpaid 3rd zone. Pkt. 5c; 1 oz. 30c; 4 oz. \$1.00.

No. 1 Boston Pickle; No. 2 Davis Perfect;
No. 3 Early Cluster; No. 4 White Spine

CUCUMBERS—Continued

CHICAGO PICKLING CUCUMBER—One of the most popular of the small early pickle varieties. It has square ends, smooth skin, is enormously productive and very disease resistant. The ideal type for very early uniform pickles. The fruits average 6x2¼ inches when fully developed.

EARLY CLUSTER or EVERBEARING—The fruits of this variety are small in size and desirable for pickling.

IMPROVED LONG GREEN—This variety is generally grown for commercial use as a slicing cucumber. It is medium late in maturity, the fruits

are long and tapering and of dark green color.

IMPROVED WHITE SPINE—One of the earliest of the Spine varieties with medium large fruits of mild flavor and crisp quality.

BOSTON PICKLING—One of the best known varieties for general use. The fruits are short, of medium size and suitable for pickling as well as slicing. Is early and very productive.

LEMON CUCUMBER—A variety with lemon shaped fruits and medium early in maturity.

All Cucumbers postpaid 3rd zone (except as noted): Pkt. 5c; 1 oz. 15c; 4 oz. 35c; 1 lb. \$1.25.

New Red Cored Chantenay

IMPERATOR or TENDERSWEET CARROT—Our recent introduction. An outstanding type bred for Market Gardener use and for shipping. Tops medium but strong enough for good bunching. Roots have sloping shoulders, smooth, deep rich orange, uniformly tapered to a semi-blunt end. Flesh rich orange color, extending to center of root, with indistinct core: fine grained, tender and of fine quality. Price, Pkt. 5c; oz. 10c; ¼ lb. 30c; 1 lb. 90c.

NEW RED CORED CHANTENAY—Tops are shorter and the foliage finer than the regular Chantenay. Strong tops, making bunching easy. The outstanding features of the strain are the smoothness of the roots, the excellent color of both the exterior and interior, the tenderness of the core, and the very uniform and perfect stumping. The stock is very even and a little earlier than the regular Chantenay. Price, Pkt. 5c; oz. 10c; ¼ lb. 30c; 1 lb. 90c.

DANVERS HALF LONG—(65 days). The heaviest yielding half-long variety. One of the best for general crop and a profitable variety for market gardeners. Danvers is productive in all classes of soil. The color is a bright orange-scarlet and the core is rather definite. The tops are a little larger than Chantenay. While of table quality, the heavy yield also makes Danvers suitable for a stock Carrot. Pkt. 5c; oz. 10c; ¼ lb. 30c; 1 lb. 90c; 5 lbs. \$4.25.

CHANTENAY—We recommend this variety very highly for the market garden trade as well as for home use. The roots are tapering and stumped at the base making them more easily harvested in heavy

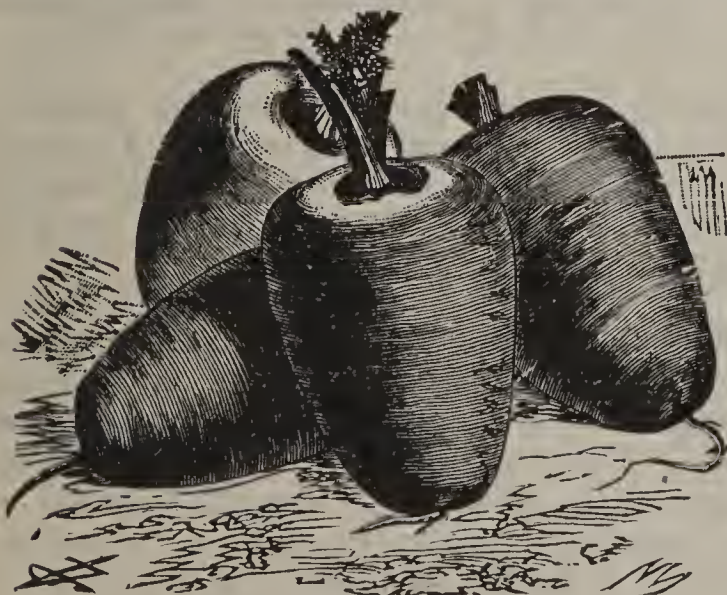

soil. This variety is equal to the Danvers Half Long in quality and is productive. Pkt. 5c; oz. 10c; ¼ lb. 30c; 1 lb. 90c; 5 lbs. \$4.25. Prepaid.

OXHEART—A short stump rooted variety, very popular for planting on heavy soil. Also suited to early harvest for market purposes. Prepaid. Pkt. 5c; oz. 10c; ¼ lb. 30c; 1 lb. 90c; 5 lbs. \$4.25.

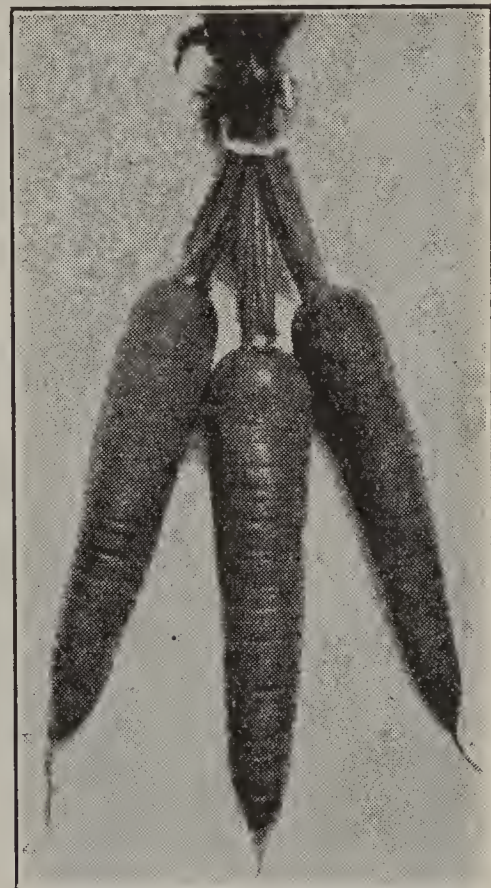

CORELESS OR HALF LONG NANTES—A handsome half long variety, almost perfectly cylindrical, blunt-ended, and with a very small tap-root. The carrots are 6 inches long and 1½ inches thick. Both the skin and flesh are bright orange red. Sweet and very tasty. Pkt. 5c; oz. 10c; ¼ lb. 30c; 1 lb. 90c; 5 lbs. \$4.25.

Stock Carrots

YELLOW GIANT OR SAN JOSE CHAMPION—This carrot is a half-long variety, with an immense broad shoulder. The roots penetrate less than one-half the depth into the ground. Color a bright yellow. Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. 75c; 5 lbs. \$3.25.

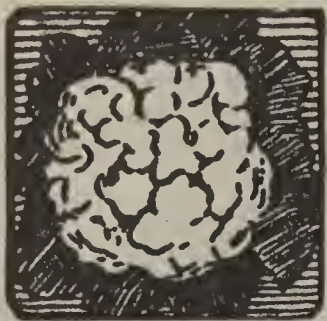

Oxheart Carrots

Imperator or Tendersweet

Cauliflower

One ounce will produce 3,000 plants.

Early Snowball

CULTURE—For early cauliflower sow seed in hot bed and transplant to cold frame 2 inches each way. Set plants in permanent gardens same as cabbage. To blanch draw leaves about the head; tie with tape.

EARLY SNOWBALL—Our strain of Snowball is especially selected for uniformity, early maturity and quality. Pkt. 5c; $\frac{1}{4}$ oz. 50c; 1 oz. \$1.25.

DANISH DRY WEATHER—This variety is somewhat later than Snowball. Quite resistant to drought. Postpaid 3rd zone. Pkt. 5c; $\frac{1}{4}$ oz. 50c; 1 oz. \$1.25; 4 ozs. \$5.00.

"MT. HOOD" SNOWBALL—The seed that produces those handsome large white solid heads that bring big profits to the gardener. It is the best strain of "Early Snowball" obtainable. We recom-

mend "Mt. Hood" Snowball for either early or late planting. Pkt. 5c; $\frac{1}{4}$ oz. \$75c; 1 oz. \$2.00; $\frac{1}{4}$ lb. \$7.00.

Sweet Corn

One pound will plant about 100 hills;
8 lbs. per acre

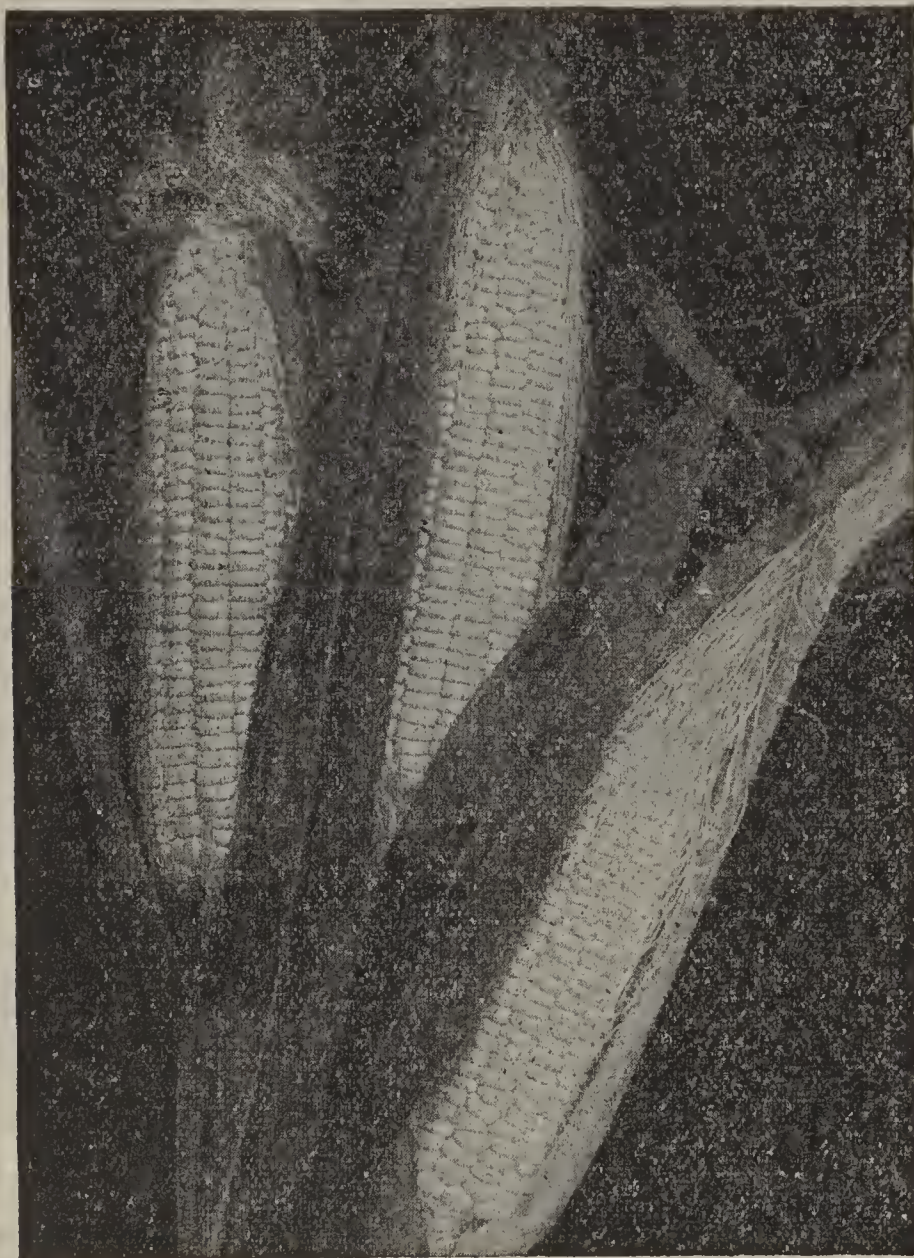

CULTURE—Sweet Corn should not be planted until the ground is warm, as the seed will rot in cold, damp soil, or if planted too deep. Late in April is early enough for first plantings and for succession plant every two weeks through May and June. Cover the first planting very lightly, increasing the depth a little for the later plantings. For the Dwarf Early varieties, rows should be three feet apart; for later large varieties, four feet and the hills two or three feet in the rows.

Sweet or Sugar varieties are used both for table and stock feeding, some of the large later sorts being preferred for silos and fodder.

GOLDEN BANTAM—Golden Bantam is the best known early yellow variety. Plants grow five to six feet tall, bearing one or two ears to a stalk, which are six to seven inches in length. Our strain produces market ears early, comes on evenly, has an excellent flavor, and produces heavily. We sell more of this kind than any other sweet corn. Carton 15c; $\frac{1}{2}$ lb. 20c; 1 lb. 30c; 5 lbs. \$1.25. Postpaid.

GOLDEN GIANT (De Lues Strain)—It makes a low growth, but sturdy, and develops several branches to a plant. It yields well, bearing fine large ears, twelve to sixteen rows. A very popular sort to follow the early kinds. Carton 15c; $\frac{1}{2}$ lb. 20c; 1 lb. 30c; 5 lbs. \$1.25. Postpaid.

GOLDEN SUNSHINE—60 days. The same flavor and color as Golden Bantam, but 10 days earlier. The ears are also larger, being 12-rowed. Sunshine Corn is ready as early as the early white corns. Postpaid. Carton 15c; $\frac{1}{2}$ lb. 20c; 1 lb. 30c; 5 lbs. \$1.25

Golden Sunshine

Hybrid Corns

Disease and drought resistant and heavy producer. Often produces twice the yield of ordinary corn.

TOP-CROSS SPANISH GOLD—A very early stock with considerable longer and more attractive ear than Spanish Gold parent. Particularly desirable for home and market gardener use. Stalks medium with well tipped ears of 10 to 12 rows. Kernels golden yellow. Good quality and dependable cropper. Postpaid. $\frac{1}{2}$ lb. 30c; 1 lb. 50c; 5 lbs. \$2.00.

GOLDEN GEM—Developed by Prof. A. F. Yeager and introduced by the North Dakota Agricultural Experiment Station. The earliest yellow variety; very dwarf, with rather small ear; very valuable to the market

gardener in reaching the earliest market. Stalks frequently bear 2 ears; ears 8 rowed. Kernels deep yellow, tender, exceptionally sweet, and of good flavor. Carton 15c; $\frac{1}{2}$ lb. 20c; 1 lb. 35c; 5 lbs. \$1.25.

GOLDEN EVERGREEN—A cross between Golden Bantam and Stowell's Evergreen, resulting in a large ear of orange-yellow color. They average 8 to 9 inches in length with 12 or 14 rows of kernels of fine quality. Stalk growth is vigorous, reaching a height of 7 feet. Maturity is in about 90 days. Lb. 30c; 5 lbs. \$1.25

CORN—Continued

GOLDEN EARLY MARKET, OR GOLDEN WEST—Our trials show this kind to be the earliest large sweet corn of golden color. It has an excellent flavor, plants show vigorous growth, in height about the same as Bantam, and put on large size ears running twelve to fourteen rows of evenly shaped kernels. This variety has become very popular among market gardeners because of its earliness, nice color and flavor, and its size. Carton 15c; ½ lb. 20c; 1 lb. 30c; 5 lbs. \$1.00.

SPANISH GOLD—74 days. Another product of Dr. Jones of Connecticut. This early variety has some resistance to Stewart's Wilt Disease, and is therefore successful for a first early. Plant it on good ground. Height of stalk 4½ to 5 ft. Ears small and medium thickness, averaging 5 to 6 inches and blunt pointed. Rows mostly 8 to 12. Grains medium length and orange yellow in color. ½ lb. 20c; 1 lb. 35c; 5 lbs. \$1.00.

EARLY MINNESOTA—One of the old standard varieties for home use. It is slightly earlier than

Golden Bantam, producing large white ears. Carton 15c; lb. 25c; 5 lbs. \$1.00.

STOWELL'S EVERGREEN—This late variety is used for late market. It is often planted for stock feed in the early fall. The stalks are very leafy, medium tall and excellent for stock feed. Carton 15c; lb. 25c; 5 lbs. \$1.00.

COUNTRY GENTLEMAN—This late variety will not mature at higher elevations but can be grown for late market use in irrigated sections at low elevations. The grains are produced in irregular pattern on the cob. Carton 15c; lb. 25c; 5 lbs. \$1.00.

PORTLAND EARLY MARKET—One of the very early white varieties. This plant makes a sturdy dwarf-like growth, the ears, two or three to the stalk, growing close to the ground, and have twelve to fourteen even rows of large size kernels. It yields very well and has good flavor for such an early kind. Carton 15c; ½ lb. 20c; 1 lb. 30c; 5 lbs. \$1.00.

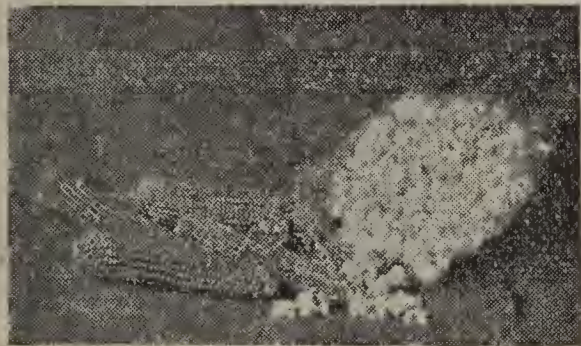

POP CORN

GOLDEN SUNBURST—The finest of all popcorn. This corn, as its name implies, is a rich golden yellow and retains a buttery yellow appearance when popped. It also contains vitamins essential to high food value and has been bred up for a number of years by the individual ear test method for high popping volume. The seed that we offer is all ear tested stock of high popping value. Postpaid; Pkt. 15c; lb. 35c; 5 lbs. \$1.50.

JUMBO OR LARGE WHITE PEARL—The largest popcorn that grows; much prized by popcorn stands and candied corn makers on account of its immense kernels. Pure white and very early in maturity. Prepaid: 1 lb. 30c; 5 lbs. \$1.25.

Postpaid. Carton 15c; lb. 25c; 2 lbs. 45c; 5 lbs. \$1.00.

BLACK BEAUTY Large, blunt, black grains on ears 6 to 8 inches long. The grains pop white; fine quality. Pkt. 10c; ½ lb. 20c; lb. 30c.

MONARCH WHITE RICE—The popular variety for popping. Everybody known this old favorite sort. Three ears on a stalk is not a rare occurrence, maturing its long slender ears in 120 days. The white grains are sharply pointed. Very popular.

Celery

One ounce will produce 5,000 plants

GOLDEN SELF-BLANCHING—A very early variety, requiring little labor to blanch. The plants are stocky, medium in size, with golden heart. Very tender and crisp. Prepaid 3rd zone. Pkt. 5c; oz. 25c; lb. \$3.00.

WINTER QUEEN—This is without doubt the most valuable variety of celery for Winter and Spring use ever introduced. Has double the amount of heart of any known celery. The plant has a fine appearance, of compact growth, and blanches to a beautiful cream-white. Ribs perfectly solid, crisp and a delicious nutty flavor. Stored for Winter or Spring use, it is an excellent keeper and when taken out the blanched stalks will be firm and crisp; entirely free from strings; brittle and of sweet flavor. Pkt. 5c; oz. 30c; ¼ lb. 75c; lb. \$2.50.

EASY BLANCHING—A new variety. Whitish-yellow heart with green leaves. Pkt. 15c; oz. 35c.

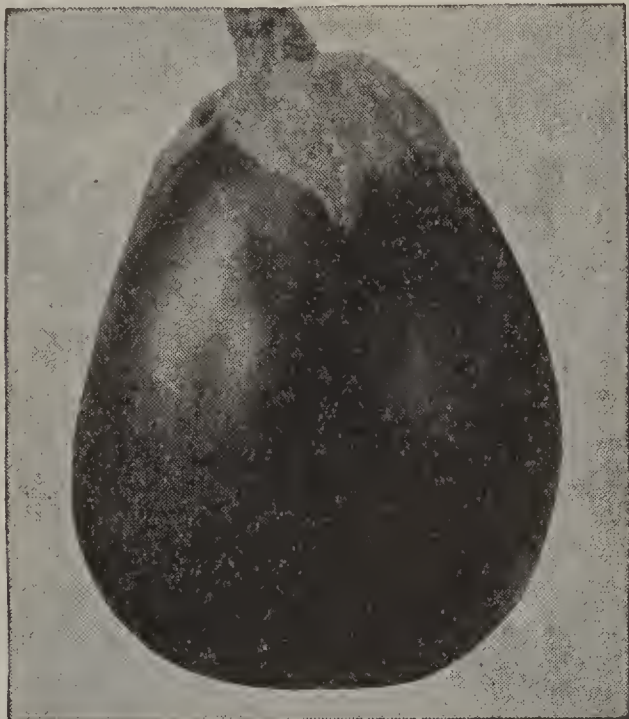

GOLDEN PLUME SPECIAL—A cross between Easy Blanching and Golden Self Blanching that is very hardy and unusually free from blight. We carry a fine strain and popular with gardeners. Pkt. 15c; ¼ oz. 50c; oz. \$1.00; ¼ lb. \$3.50; lb. \$12.50.

CELERIAC or TURNIP ROOTED CELERY, EUREKA—The roots are turnip shaped and are used for soups and stews. They are very hardy and will stand in the open all winter in the coast regions. Pkt. 10c; oz. 25c; ¼ lb. 90c.

WHITE PLUME—An early main crop variety. The leaves are bright green with light tips, the inner leaves white. Prepaid 3rd zone. Pkt. 5c; oz. 20c; lb. \$2.00.

Winter Queen

EGG PLANT

One ounce will furnish about 2,000 plants

CULTURE—Start the plants under glass in hot-bed and transplant to field after all danger of frost is over. Space the plants 24 inches in the rows and rows wide enough to cultivate. Fertilize the soil with Vigoro, using about 500 pounds per acre.

BLACK BEAUTY—The fruits of this variety are very dark in color and they are earlier than those of the New York Purple. Pkt. 5c; 1 oz. 40c; 4 oz. \$1.25; 1 lb. \$4.50.

NEW YORK PURPLE—One of the main market garden varieties with large oval fruits of deep purple color. Pkt. 5c; oz. 40c; 4 oz. \$1.25; 1 lb. \$4.50.

CRESS

CURLED or PEPPER GRASS—This salad is much used with lettuce, to which its warm pungent taste makes an agreeable addition. The seed should be sown in drills about 16 inches apart, on very rich ground, and the plants well cultivated. It may be planted very early. Pkt. 5c; oz. 20c; ¼ lb. 60c.

CRESS—(Water)—Hardy perennial aquatic plant; sow seed along water's edge, preferably near running springs. 45 days. Pkt. 5c; oz. 40c; ¼ lb. \$1.10. Postpaid.

CORN SALAD

FETTICUS or LAMB'S LETTUCE—A refreshing salad, used extensively in Winter and Spring as a substitute for lettuce. It is often cooked like spinach. Sown in drills 1 foot apart, in the Spring or Fall. On the approach of cold weather cover over with straw or coarse litter. Pkt. 5c; oz. 30c; ¼ lb. \$1.00.

DILL

MAMMOTH CURLED—A small planting of dill can be made in the home garden for use in seasoning pickles. Postpaid. Pkt. 5c; oz. 15c; 4 oz. 35c; 1 lb. \$1.00.

ENDIVE

One oz. will plant 100 ft. row; 4 pounds per acre.

CULTURE—Endive makes a very fine salad, as the leaves are very tender, crisp, with a pleasant flavor. May be used as trimmings for fancy dishes in same manner as lettuce. Plant the seed in the permanent row early in the spring and thin to space the plants about 2 inches in the row. After the plants form a compact leaf growth, pull the outer leaves up around those in the center and tie with cord to assist in bleaching out the inner leaves.

GREEN CURLED—The leaves of this variety are deep green in color with white ribs. When the plants are tied into a compact mass, the leaves blanch to a creamy white. Prepaid. Pkt. 5c; 1 oz. 15c; 4 oz. 45c; ½ lb. 75c; 1 lb. \$1.25.

Green Curled

KOHL RABI

We suggest using Kohl Rabi in place of Turnips where the soil is infected with worms as this turnip-like plant is not damaged to any extent.

EARLY WHITE VIENNA—The skin of this variety is light in color and the flesh white. It is very early in maturing and has a fine flavor. Pkt. 5c; oz. 25c; ¼ lb. 60c; lb. \$1.75. Postpaid.

PURPLE VIENNA—Similar to the White Vienna in maturity, but the skin is of a deep purplish color, the flesh white. Postpaid. Pkt. 5c; oz. 20c; 2 oz. 35c; ¼ lb. 60c; 1 lb. \$1.75.

MUSTARD

1 oz. will plant 100 ft. of row; 3 lbs. per acre.

CULTURE—Mustard may be sown early and in succession for continuous crop. Sow in rows on a fine but firm seed-bed, thinning the plants to 4 inches in the rows. The tender leaves may be cut from the stalks and by careful harvest will reproduce for later crop. A fine succulent vegetable for greens and salad.

GIANT SOUTHERN CURLED—An excellent variety for greens. It makes a rapid growth of tender, spicy leaves, retaining its crispness until nearly matured. Pkt. 5c; oz. 15c; 4 oz. 30c; lb. \$1.00.

KALE

¼ oz. will plant 100 ft. row; 2 lbs. per acre.

CULTURE—Kale may be planted in succession for table use or as green feed for poultry. Drill the seed in a well prepared seed-bed, thinning the plants to 12 inches apart in the row.

DWARF CURLED—The most desirable variety for table use, as the leaves are tender and of fine quality. Pkt. 5c; oz. 15c; 4 oz. 40c; lb. \$1.00.

THOUSAND HEAD—A rank growing variety producing an abundance of foliage, well suited for summer pasture or winter feed for poultry. Pkt. 5c; oz. 15c; 4 oz. 35c; lb. 75c.

LEEK

½ oz. will plant 100 ft. row; 4 lbs. per acre.

CULTURE—The Leek plant is closely related to onions and should be planted in the same manner. Sow the seed early in the spring on a very fine compact seed-bed, drilling the seed in rows just far enough apart to cultivate easily. Thin the plants to 8 inches in the row.

AMERICAN FLAG—A strong growing variety, producing large thick stems which have a sweet flavor. Postpaid. Pkt. 5c; oz. 20c; ¼ lb. 60c; 1 lb. \$1.75.

Lettuce

$\frac{1}{4}$ oz will plant 100 ft. row; 2 to 3 lbs. per acre

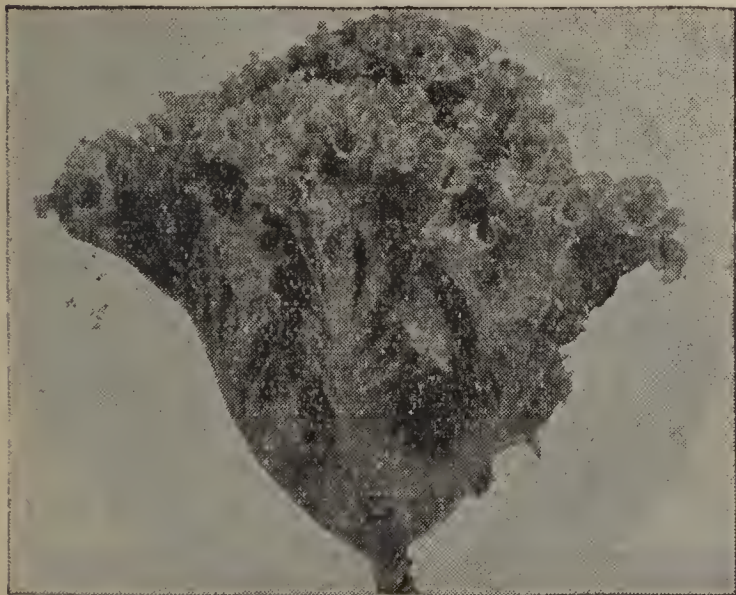

In producing head lettuce it should be planted very early in the spring, thinning the plants just as soon as possible so that they will head properly. If the plants are spaced about one foot apart in the row and weather conditions are satisfactory, they will head rapidly. It is advisable to fertilize head lettuce with Vigoro after they have been thinned, to hasten growth. In some localities early fall seeding can be made so that the crop can be harvested in October or early November.

NEW YORK NO. 12—Developed from a single plant selection and has been carefully propagated to prevent mixture with other strains. It is a great improvement over the ordinary New York, being earlier, producing large solid heads of the flat type. Oz. 15c; $\frac{1}{4}$ lb. 45c; 1 lb. \$1.25.

EXTRA EARLY NEW YORK No. 5084—An early, sure heading strain. Not excelled for use in this locality for early spring planting as it heads before warm weather. Color deep green, leaves curled. Oz. 25c; $\frac{1}{4}$ lb. 60c; 1 lb. \$2.00.

EARLY CURLED SIMPSON—This white seeded variety produces very curly light green leaves of fine quality. A favorite for early garden use. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 40c; 1 lb. \$1.00.

GRAND RAPIDS—Market gardeners growing lettuce under glass generally prefer this variety. The leaves are long, golden green in color, very crisp and tender. It can also be grown out-of-doors but is likely to burn if the weather is extremely hot. Pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 45c; 1 lb. \$1.25.

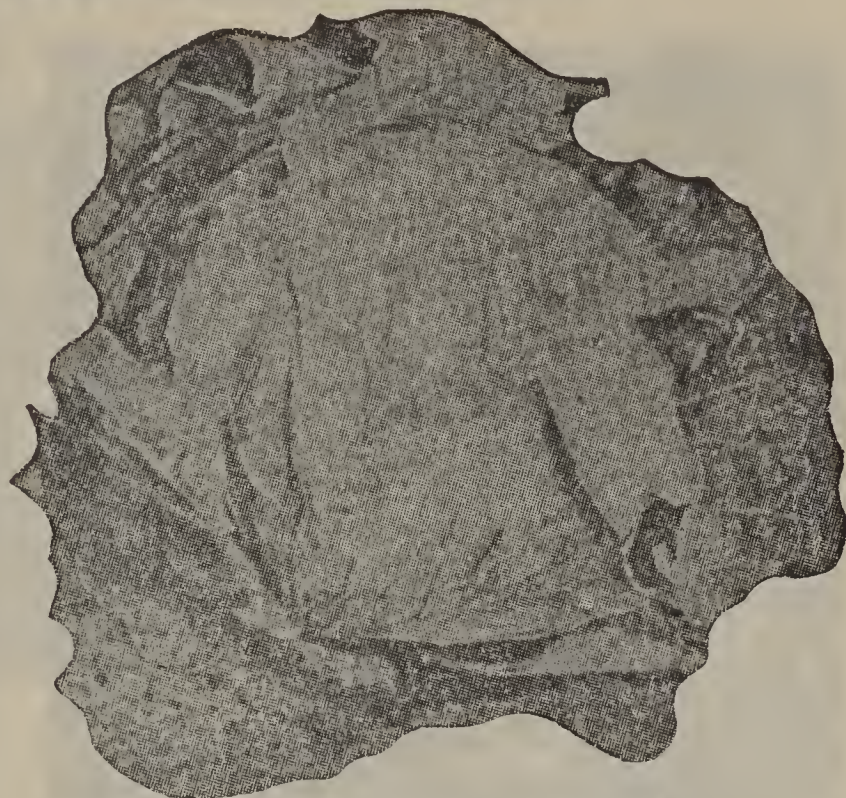

Grand Rapids

CRISPETTE—Has an unusually solid head. The white, main ribs of the leaves curve toward the center, and keep the interior thoroughly bleached. It is quick growing and always crisp and tender. Pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 50c; 1 lb. \$1.50.

BROWN DUTCH—Forms a large, solid head; sweet, tender and of good flavor. Outer leaves are tinged with brown. It is very hardy. Pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 50c; 1 lb. \$1.50.

VIGORO WILL MAKE YOUR LETTUCE BETTER

Improved No. 12 New York Head

SPECIAL NEW YORK—We are certain that you cannot find a better stock of lettuce than our Special New York strain. All of our seed has been selected for uniformity of type, quality and yield and comes direct to us from our special grower in sealed bags. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 45c; 1 lb. \$1.25.

PRIZEHEAD—This lettuce is a better leaf variety than it is for heading. The leaves are of medium green color tinged with brown toward the outer edge. The heads are very loose and open. It is a choice variety for early spring use. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 40c; 1 lb. \$1.50.

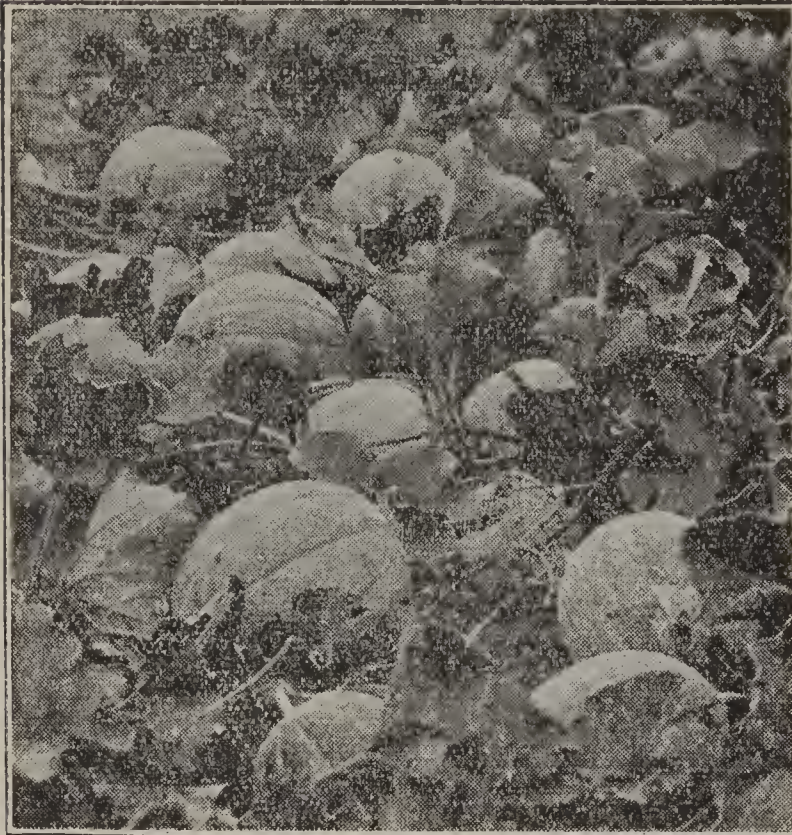

HANSON HEAD—We recommend Hanson Head for the home garden as the heads are very select and of fine quality. It is lighter green in color than the New York head but does not stand shipment well. Pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 50c; 1 lb. \$1.50.

CHICKEN LETTUCE—A large rank-growing lettuce developed especially for poultry feed. It can be sown in the garden and cut for poultry use or planted in the poultry yard allowing the poultry to harvest it when ready. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 35c; 1 lb. \$1.00.

Crispette

Muskmelons-Cantaloupes

One ounce will plant about 50 hills; two to three pounds in hill, per acre.

CULTURE—Melons thrive best in a light rich soil. Plant in May, when the ground has become warm and dry, hills 5 to 6 feet apart each way for muskmelons, 8 to 10 feet for watermelons. Previous to sowing the seed, mix a shovelful of well rotted manure in each hill, and plant in each, 12 to 15 seeds. After all danger of bugs is over, thin out to three or four plants per hill. A few hills for early use may be had by sowing on pieces of sod in a hotbed, and when warm enough transplant to open ground.

ROCKYFORD OR NETTED GEM—One of the old standard mid-season commercial melons. The fruits are oval-round in shape with distinct netting over the surface. The flesh is green in color and of delicate flavor. Pkt. 5c; oz. 15c; ¼ lb. 35c; 1 lb. \$1.00; 5 lbs. \$4.50. Postpaid.

SUGAR ROCK (or Honey Rock)—This is a new and unusually fine melon. Sweet as sugar and solid as a rock. It has four main points of superiority; quality, productiveness, ability to stand shipping and appearance. Its flavor and quality are the finest we have ever seen, the flesh being a very deep salmon color right out to the very rind. Under good growing conditions it is a very heavy yielder, often producing five to seven perfect melons on one vine. Its rind is unusually hard, making it a good shipper. Pkt. 10c; oz. 25c; ¼ lb. 60c; lb. \$2.00.

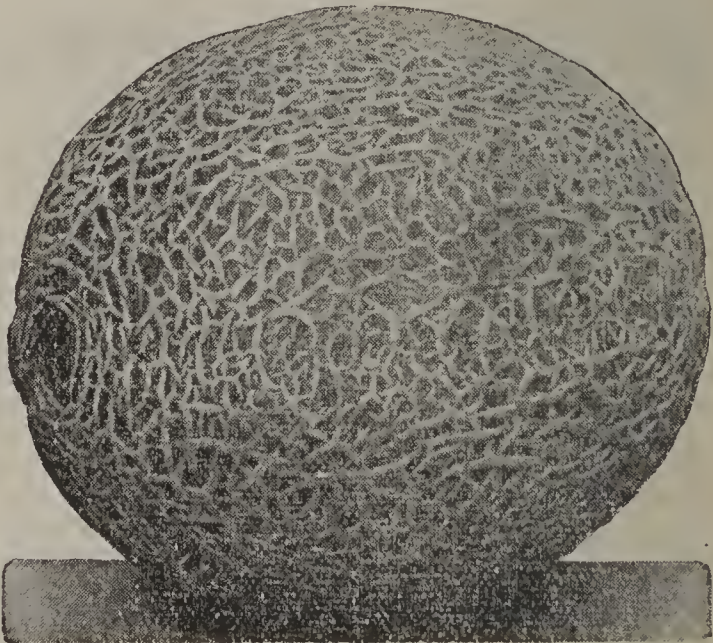

BURRELL'S GEM—(95 Day Melon). This variety is also known as Ordway Pink Meat and Defender. Fruits oblong, weigh three pounds; heavily netted and faintly ribbed; flesh thick, deep salmon, of excellent quality; a standard variety. Pkt. 5c; oz. 15c; ¼ lb. 35c; 1 lb. \$1.00; 5 lbs. \$4.50. Postpaid.

HALE'S BEST—The earliest maturing of all large melons. The fruits mature to luscious sweetness in 68 days after planting. The melons are oval but inclined to produce some fruits of somewhat more elongated shape. The popularity of Hale's Best is due to its earliness and to the sweet tasty flavor of its beautiful salmon flesh. Pkt. 5c; oz. 15c; ¼ lb. 35c; lb. \$1.00; 5 lbs. \$4.50.

HEARTS OF GOLD—A delicious melon maturing in mid-season with fine shipping qualities. The fruits are oval with distinct ribs and netting over the surface. The flesh is very thick, of beautiful gold color with a small seed cavity. Pkt. 5c; oz. 15c; ¼ lb. 35c; 1 lb. \$1.00; 5 lbs. \$4.50. Postpaid.

TIP TOP—A large size, main crop melon, varying in shape from round to slightly oblong. The pale green skin is distinctly ribbed and slightly netted. The flesh is a beautiful deep salmon. It is sweet, spicy, and full of rich aroma. Oz. 15c; ¼ lb. 45c; 1 lb. \$1.15.

SUPERFECTO—This variety is recognized as the highest development in cantaloupe and is especially recommended for planting where melons are inclined to rust as it is more rust resistant than most sorts. The netting is well developed and closely laced covering the entire melon. The interstices between the netting are small and bright green changing to orange green when full ripe. The flesh a rich orange salmon, is very deep and the color shows through the rind where the melon touches the ground a day or two before the melon will slip enabling the careful picker to pick accurately.

Hale's Best

The quality is unexcelled. The flesh is fine grained, very sweet and spicy. Market growers now plant thousands of acres to our Superfecto cantaloupes. Pkt. 5c; oz. 20c; 4 oz. 45c; 1 lb. \$1.50.

Duthie's Watermelons

1 oz. will plant 50 hills; 3 to 4 pounds per acre.

KLECKLEY SWEETS—One of the best commercial melons because of its shipping qualities and yield. The melons are oblong in shape with uniform dark green skin and dark red meat. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 25c; lb. 75c; 5 lbs. \$3.50. Postpaid.

KLONDIKE BLACK SEED-ED—This melon is used by many home gardeners and as a commercial melon. Rind dark green, thin. Flesh distinctive shade of red, brittle and sweet. Fruits oblong. A good shipper because it does not wilt, and for quality has no equal. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 35c; 1 lb. \$1.00; 5 lbs. \$4.50. Postpaid.

B. S. Klondike

CHILEAN BLACK SEEDED — A leading first early variety for home use and local markets. Fruits medium sized, short, oval with light and dark stripes; tender rind. Flesh red and of delicious eating quality. 75 to 80 days. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 35c; lb. \$1.00.

STONE MOUNTAIN—We are offering this splendid new variety again this year. It is a wonderful new melon, rather oblong

in shape, light gray in color, with delicate white seeds. It has only about half as many seeds as other varieties. Its growth in popularity has been phenomenal. You should plant some of these. They are simply delicious. Pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 50c; 1 lb. \$1.50; 5 lbs. \$6.00. Postpaid.

KING AND QUEEN (Black Seeded Ice Cream)—This melon is generally planted for late summer use and will keep well until late fall if stored in a cool dry place. The melons are oval in shape with light yellowish green skin, brilliant red flesh and dark seeds. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 50c; lb. \$1.00; 5 lbs. \$4.50. Postpaid.

STRIPED KLONDIKE—A new type, very attractive, sweet oblong melon, light green with dark irregular stripes. Rind is thick, making it a good shipper. Does not sunburn easily. Average weight 20 to 30 lbs. The best melon to grow if a striped melon is desired. Pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 55c; lb. \$1.75; 5 lbs. \$8.25; 10 lbs. \$15.50. Postpaid.

PROTECT PLANTS WITH HOTCAPS

New Method of Plant Protection.

Eliminate most of the risk in growing vegetables

They protect your tender plants from frost, wind, rain, hail and insects. Plants grow faster and yield larger crops for early market.

PRICES—1000 lots, \$10.00; 5000 lots \$9.85 per 1000; 10,000 lots, \$9.75 per 1000; 250 Trial Package, including Garden Setter with Tamper, \$3.65; 100 Home Package, including Garden Setter with Tamper, \$2.40; Germaco Steel Tamper, 25c; Hotcap Setter, 50c; postage extra.

Weight—1,000 package HOTCAPS, 26 lbs.; 250 package, 9 lbs.; 100 package, 5 lbs.; Hotcap Setter, 8 lbs.

Onions

One ounce of seed for 200 ft. of drill; 4 to 5 lbs. per acre.

Onions are highly prized for their tonic qualities, and doctors everywhere are advocating the use of them in the diet.

A good, well-drained soil, reasonably fertile and well pulverized, will give the best crops. Cover the seed lightly and thin the seedlings when they are 3 inches tall, so that they will have room to develop freely. When the bulbs have reached maturity, bend down the tops to hasten ripening before the Onions are harvested.

Red Wethersfield

LARGE RED WETHERSFIELD—A standard variety; one of the most productive kinds, even in poor soil. Its good keeping qualities render it one of the best for shipping. Pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 55c; lb. \$1.90. Postpaid.

JAPANESE BUNCHING—Used exclusively for green bunching as it forms no bulbs. A hardy perennial, which develops white shoots for the market in advance of those from sets; tender and delicious flavor. Pkt. 5c; oz. 25c; $\frac{1}{4}$ lb. 80c; lb. \$2.50. Postpaid.

AUSTRALIAN BROWN—Remarkable for its uniform size and keeping quality. (95 days). The handsome onions are extremely hardy, yielding an enormous crop. The skin is thick and of a beautiful rich brownish color. The flesh is white, extremely solid, sweet and mild in flavor. A desirable onion for the home garden as well as for market. Pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 55c; lb. \$1.90. Postpaid.

BERMUDA OR CRYSTAL WAX—Crystal Wax is usually grown from plants and then matures for a Summer salad onion when it commands a good market price. Crystal Wax must be cured in the shade or they will sunburn and spoil very quickly. We have them in plants also. Pkt. 10c; oz. 25c; $\frac{1}{4}$ lb. 75c; lb. \$2.00; 5 lbs. \$12.00. Postpaid.

EARLY WHITE BARLETTA or WHITE QUEEN—An exceedingly early variety growing about $1\frac{1}{2}$ inches in diameter and $\frac{3}{4}$ of an inch thick. A most excellent sort for bunching and pickling. 75 days. Pkt. 5c; oz. 30c; $\frac{1}{4}$ lb. 90c; lb. \$2.75.

WHITE PORTUGAL OR AMERICAN SILVERSKIN—It usually matures about ten days earlier than White Globe and is fine for fall and early winter use. It is an excellent medium early sort for gardeners who do not care to plant more than one variety. The bulbs are nearly round when of bunching size, somewhat flattened when mature. This is the best flattened white onion for northern latitudes. Postpaid. Pkt. 5c; oz. 25c; $\frac{1}{4}$ lb. 85c; lb. \$2.50; 5 lbs. \$12.00.

SOUTHPORT WHITE GLOBE—Large, silvery white, good keeper. A general favorite. Pkt. 5c; oz. 30c; $\frac{1}{4}$ lb. \$1.00; lb. \$3.25.

Okra

2 ounces for 100 foot row.

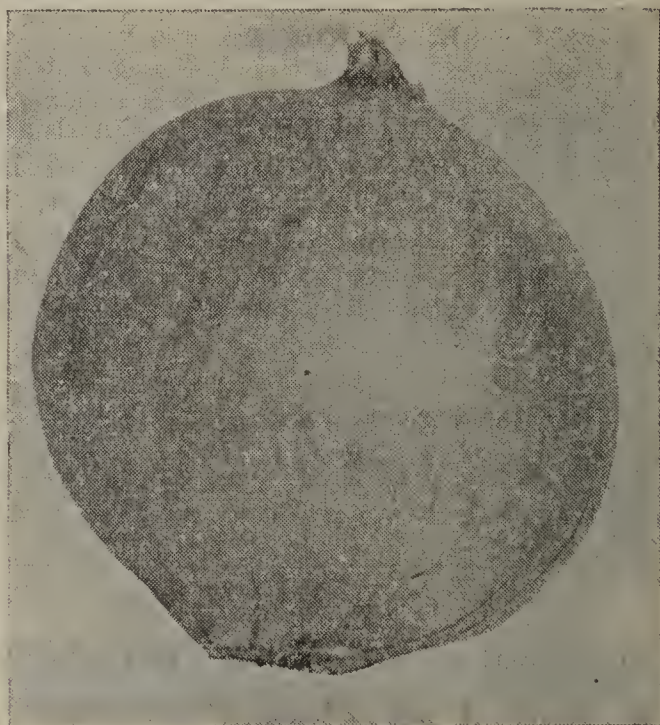

Okra is a fine vegetable for use in soups and as a green vegetable. Should be planted after frost is over, thinning the plants early. The pods should be harvested before they become fibrous and woody.

WHITE VELVET—A taller variety maturing early. The pods are somewhat white in color and are long, smooth and tender. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 35c; 1 lb. \$1.00. Postpaid.

DWARF GREEN—A very compact growing, heavily branched variety, producing a mass of pods. It is very early in maturity and the pods are of fine quality. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 35c; 1 lb. \$1.00. Postpaid.

PRIZETAKER—A very handsome late or main crop onion of the largest size and nearly globular in form, usually with shoulder and base slightly sloping. The skin is yellowish brown or light yellow with slight tinge of brown. The flesh is creamy white, very mild, tender and of excellent flavor. The variety keeps well if thoroughly ripened and is very desirable for shipping for fall and early winter use. Pkt. 5c; oz. 25c; $\frac{1}{4}$ lb. 75c; lb. \$2.25. Postpaid.

YELLOW GLOBE DANVERS—The old reliable Yellow Globe Onion. (110 days) One of the most extensively used main crop yellow onions for the home garden and market. Pkt. 5c; oz. 25c; $\frac{1}{4}$ lb. 75c; lb. \$2.25; 5 lbs. \$10.00.

Sweet Spanish

SWEET SPANISH—Special Riverside Strain—A very large globe-shaped light yellow onion with small top, and an exceptionally fine shipper. It is a Spanish variety which has quickly become very popular in many sections of this country. Pkt. 5c; oz. 25c; $\frac{1}{4}$ lb. 85c; $\frac{1}{2}$ lb. \$1.50; 1 lb. \$2.50.

WHITE SWEET SPANISH. A large, sweet onion, introduced into this country from Spain in recent years, and can be grown very successfully here. The onions are equal to those that used to be imported. Has no bite nor objectionable strength, being mild, sweet flavored, fine, firm meat of tender texture. Pkt. 5c; oz. 25c; $\frac{1}{4}$ lb. 85c; $\frac{1}{2}$ lb. \$1.50; 1 lb. \$2.50.

ONIONS—Continued

Onion Sets and Plants

The first home garden harvest in the spring is young onions from sets. If perennial sets are planted in the fall, a crop is reaped long before the first outdoor seeds have sprouted. Spring sets can be put into the ground as soon as it is fit to be worked and in a few weeks the delicious young onions are ready to serve on the table. Plantings may be made successively late into the summer, as long as the sets remain in good condition.

YELLOW BOTTOMS—1 lb. 20c; 5 lbs. 85c. Postpaid.

WHITE BOTTOMS—1 lb. 20c; 5 lbs. 90c. Postpaid.

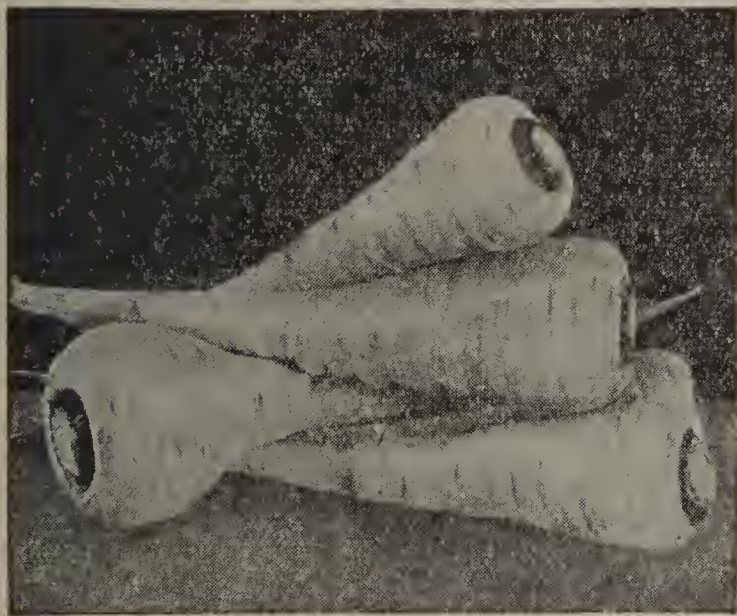

SHALLOT'S OR YELLOW MULTIPLIERS—Flavor much superior to ordinary onions. 1 lb. 30c. Postpaid.

Bermuda Onion Plants

These are new, and especially suitable for home gardens. Seed is sown early in Texas, and the plants are lifted, to be replanted in Northern garden, to produce sweet, mature onions of Bermuda quality. Ready March 1st. Per 100, 30c, postpaid. Per 1000, \$2.00, postage extra; wt. about 6 lbs.

Young Bermuda Plants

Parsnips

One ounce for 200 feet of row.

These are of easiest culture and require a full season to come to maturity. The seed of the long varieties should be sown early in the spring up to May 15. The roots may be left outdoors all winter long.

HOLLOW CROWN OR LONG SMOOTH—(85 days). Roots oblong, ending somewhat abruptly with a tap root; best variety for general use. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 30c; lb. 90c.

EARLY HALF LONG—Ready in ninety days. Medium sized, easily dug, has a fine rich flavor—good for home gardens. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 30c; lb. 90c.

Peanuts

CULTURE—Peanuts require light rich soil well limed. Plant in the spring as soon as the ground has become warm, in rows 30 to 36 inches apart, placing the seed 6 to 10 inches apart in the row. It is not necessary to remove the hull when planting. Keep well hoed. When matured pull and hang up to dry.

SPANISH BUSH TYPE—Very desirable and productive. Mild, sweet flavored. Pkt. 10c; $\frac{1}{2}$ lb. 25c; 1 lb. 40c; 2 lbs. 75c. Postpaid.

Garlic

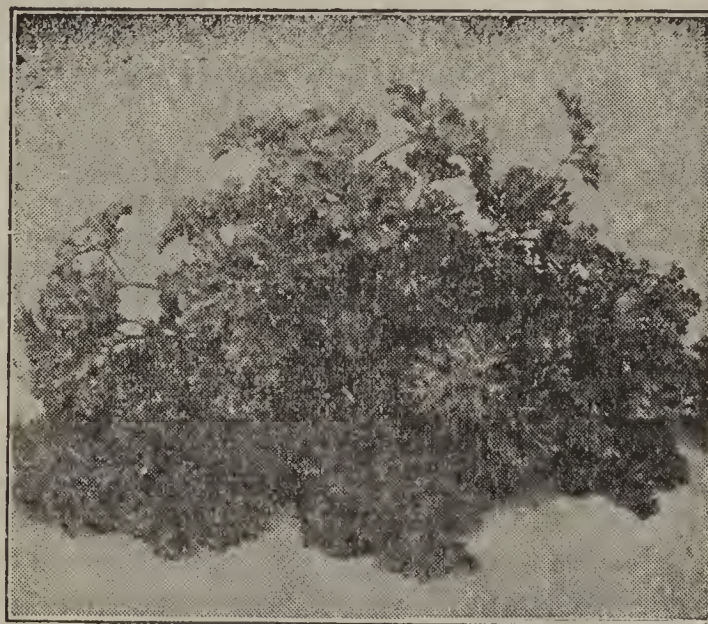

LARGE FRENCH—This giant variety will yield nearly double the common kind. Plant the sets very early in the spring. $\frac{1}{2}$ lb. 25c; 1 lb. 35c. Postpaid.

Parsley

One ounce to 150 feet of drill.

Sow in drills one foot apart, in rich, mellow soil; soak the seed 12 hours before sowing, which should be done in early spring, as they are very slow to germinate. When one or two inches high thin out the plants to six inches apart in the rows. Used as a garnish for table, also in soups.

CHAMPION MOSS CURLED—A compact growing, finely cut and much curled variety of a bright green color. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 35c; 1 lb. \$1.00.

Feed Everything You Grow

Treat Your Seed with Semesan to Increase
Germination and Vitality

Garden Peas

One pound will plant about fifty feet of row.

CULTURE—Peas of the extra early smooth class are the very first thing to be planted in the garden in spring. The wrinkled sorts follow a little later, as they are not quite so hardy. Tall, late varieties need brush or other support. By selecting sorts that do not grow much over two feet high, the necessity of providing brush may be avoided. Judicious selection of varieties and planting frequently for succession will give a full supply of the choicest green peas almost during the entire season, with the possible exception of the hottest part of the summer. Open furrows three or four inches deep and three feet apart; scatter the seed peas into them and cover with hoe. Cultivate like corn or beans. The late tall sorts may be planted in double rows placing brush between them for support.

BONNERS BEST—This new pea was originated in the northern part of Idaho. Very heavy yielder; heavy dark green foliage, sweet and produces over a long period. Height 16 inches. We consider this our best early wrinkled variety. Carton 15c; ½ lb. 20c; lb. 35c.

BLUE BANTAM—The best first-early Dwarf Wrinkled Pea. Blue Bantam is unequalled in many ways. It is positively the sweetest and most delicious Pea in existence. In extreme earliness combined with unusual productiveness it takes its place way above all other varieties. The dwarf, vigorous vines average 15 inches in height. They carry an enormous crop of large, deep-green pods. The individual pods measure 3½ to 4 inches in length and are tightly packed with 8 to 10 large, deep bluish green Peas. The Peas are outstandingly sweet and most delectable. Wrinkled seed. Postpaid. Carton 15c; 1 lb. 30c; 5 lbs. \$1.25; 10 lbs. \$2.25.

Bonners Best

NEW GIANT WONDER PEAS—The New Giant Wonder Pea is a sport from the old favorite American Wonder Pea. It is larger, more prolific and will stay in eating condition longer than the old type. Carton 15c; ½ lb. 20c; 1 lb. 35c. Postpaid.

DUKE'S DELIGHT (Little Marvel)—We offer this pea for your approval, as it is one of the finest early varieties we have grown. The plants are from 15 to 18 inches tall, the crop developing with American Wonder, but requiring a longer period to reach full maturity. The pods are straight, large and blunt, varying from 3 to 3½ inches in length, from 7 to 9 seeds per pod. A fine variety for market and home use. We have grown Duke's Delight together with Little Marvel and find the two stocks identical in characteristics. Postpaid. Carton 15c; 1 lb. 30c; 5 lbs. \$1.25; 10 lbs. \$2.25.

LAXTONIAN — Our stock produces very large pods curved at the end, averaging 3½ to 4½ inches in length. The plants are 15 to 17 inches tall, producing 4 or 5 pods each. One of the finest market garden varieties because of earliness and size of pods. Postpaid. Carton 15c; 1 lb. 25c; 5 lbs. \$1.10; 10 lbs. \$2.00.

AMERICAN WONDER — The standard dwarf early variety for the home garden. The plants are bushy, producing a large number of pods, which are straight and blunt and well filled. Several pickings can be made in the home garden and the quality is excellent. Postpaid. Carton 15c; 1 lb. 25c; 5 lbs. \$1.10; 10 lbs. \$2.00.

WORLD'S RECORD (Gradus)—56 days. Pods are pointed, about 4 inches long, and broad. An early type of the celebrated Gradus, very frequently used as an early Gradus. Height of vine 24 to 30 inches, light green. Fine showy single pods, with 7 or 8 peas in each. Seed large, cream and green wrinkled. Vines medium heavy, light green. A wonderful, early Pea for market and home gardeners. ½ lb. 15c; 1 lb. 25c; 5 lbs. \$1.10.

Giant Wonder

ALASKA or Earliest of All—A very hardy variety for early planting. The seeds are small and of finest quality for canning and the entire crop is ready for harvest at the same time. Plants 2 feet in height. Postpaid. Carton 15c; 1 lb. 25c; 5 lbs. \$1.10; 10 lbs. \$2.10.

EVERBEARING — For late summer and autumn; very prolific variety. Pod about 3 inches long, with large peas of good quality. Carton 10c; 1 lb. 25c.

TALL TELEPHONE—A tall variety maturing with the Dwarf, with very large pods. It should be trained on stakes for best results. Postpaid. Carton 15c; 1 lb. 25c; 5 lbs. \$1.10; 10 lbs. \$2.00.

DWARF TELEPHONE —One of the best late varieties because of its dwarf habits of growth and large pods. Postpaid. Carton 15c; 1 lb. 25c; 5 lbs. \$1.10; 10 lbs. \$2.00.

GARDEN SIZE FOR
PEAS 25c

Peppers

One ounce will produce about 1,500 plants

CULTURE—Pepper plants should be started in the hotbed or cold frame in early May, so as to be ready for transplanting by the time killing frost is over. Set out in clean soil, well fertilized, spacing the plants about 2 ft. apart in the row.

CALIFORNIA WONDER—Produces strong healthy plants bearing a very heavy yield of meaty fruit, sweet, tender and mild, short and chunky. By far the finest pepper now offered. Pkt. 5c; oz. 40c; 4 oz. \$1.25; lb. \$4.50.

PIMIENTO—A thick fleshed, heart shaped pepper of mild flavor. The fruits are long and slender and are much used for salads. This variety is rather late in maturity. Postpaid. Pkt. 5c; oz. 35c; ¼ lb. \$1.00; lb. \$3.50.

CHINESE GIANT—One of the largest varieties of peppers. The fruits are thick, bulky, and of large dimension and medium early in maturity. Postpaid. Pkt. 5c; oz. 40c; ¼ lb. \$1.15; 1 lb. \$3.50.

RUBY KING—A very satisfactory variety for home and market gardeners. The plants are early, dwarfed in habits of growth, the fruits large with thick flesh, very sweet and mild and of bright red color. Pkt. 5c; oz. 40c; ¼ lb. \$1.15; lb. \$3.50.

WORLDBEATER—A cross between Chinese Giant and Ruby King. The four-lobed Peppers are 5 in. long and 3 ¼ in. in diameter. Very productive. Glossy rich scarlet-red skin and thick mild flesh. Matures early and is extensively grown for home use, for market, and for shipping. ½ oz. 25c; oz. 35c; ¼ lb. \$1.15; lb. \$3.50.

Ruby King Pepper

Pumpkins

One ounce will plant 100 hills; three pounds per acre.

CULTURE—Pumpkins should not be planted until danger of frost is over. They may be planted alone in hills or hills scattered through corn fields where the stand of corn is somewhat uneven. A few seeds sown in each hill will produce sufficient vines for a heavy yield. If planted alone, the hills should be spaced 4 to 6 ft each direction.

SUGAR OR PIE—An early maturing variety with medium sized fruits slightly flattened at the ends and of golden color. The flesh is thick and of excellent quality for canning. Postpaid. Pkt. 5c; oz. 15c; 4 oz. 30; lb. 90c; 5 lbs. \$4.50.

CONNETICUT FIELD—This pumpkin is used principally for stock feed because of its large size. The fruit is longer and larger than the Sugar Pumpkin and the flesh is of somewhat coarser texture. Postpaid. Pkt. 5c; oz. 15c; 4 oz. 30c; 1 lb. 80c; 5 lbs. \$3.50.

WINTER LUXURY—The best flowered pie pumpkin grown. Excellent keeper. Medium size. Color golden russet, finely netted. Flesh deep golden, sweet, tender and very thick. Pkt. 5c; oz. 15c; 4 oz. 35c; 1 lb. \$1.00.

Sugar or Pie Pumpkin

Valuable Booklets

These books will be given away free with \$2.50 Garden seed order or include with any order for only 50c additional. Money refunded if not satisfactory. You may select one booklet for each \$2.50 worth of seeds ordered. Following booklets available:

- 1—Make a Garden Pay.
- 2—Weeds Mean Waste.
- 3—Cow the Mother of Prosperity.
- 4—Diversified Farming.
- 5—Farm Poultry Pays.
- 6—Sweet Clover.
- 7—Alfalfa.
- 8—Our Pastures.

Seed Potatoes

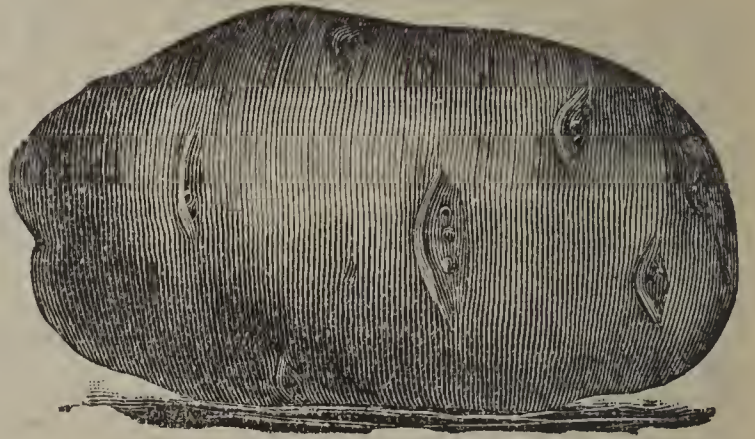

Our **SEED POTATOES** have again proven to be the very finest foundation stock.

Only high yielding hills and selected tubers are used in production of this Supreme Quality seed stock.

EARLY OHIO—One of the best early pink potatoes, similar to Early Rose. Tubers round, oblong shape. Eyes rather shallow but strong. A heavy yielding, dependable variety. An old favorite that is still popular in many sections. Price prepaid 3rd zone. 10 lbs. \$1.00. Write for quantity prices.

IRISH COBBLER—Splendid creamy white potato for early market. Large, round, sometimes slightly netted. Produces very smooth potatoes and will bake dry and mealy, even before ripe. Extra early. 10 lbs. postpaid 3rd zone \$1.00. Write for quantity prices.

THE NEW KATAHDIN—U. S. Dept. of Agriculture long keeping potato. Originated by the U. S. Department of Agriculture. It was originated in Maine by double crossing unnamed seedlings of Rural New Yorker No. 2 and Aroostook Wonder parentage. It was bred for disease resistance, quality

Early Ohio

and yield. During the eight years it was under observation, it has been entirely free from Mosaic. The tubers are short, elliptical to roundish, and have very shallow eyes. Emphasis is laid on the high yield and small percentage of culls. The vines are vigorous and light green in color. They mature fairly early. In shape, it is nearly a ball.

Uncle Sam spent about \$250,000.00 in developing it and Extension Horticulturalist Fitch, of the Iowa station, enthusiastically suggests it should pay the nation 1,000 times that in larger yields to farmers, less expense to dealers and handlers.

Growers everywhere are anxious to try the new Katahdin, though the seed supply is extremely limited. To enable as many as possible of our customers to try this new Potato, we offer it in small quantities only, subject to being unsold. Price prepaid 3rd zone. 10 lbs. \$1.50

Bliss Triumph

BLISS TRIUMPH—Recognized as one of the very earliest varieties. Is also a good keeper. Very productive. Tubers round, pink skin, flesh very white and of excellent flavor. 10 lbs. \$1.00, postpaid 3rd zone.

NETTED GEM—Russett Burbank, Yakima Gem, Idaho Russett, etc. A splendid main crop late potato that gives good results in dry sections. Tubers are elongated, medium sized with russett netted skin; flesh white; eyes are flush with surface; good keeper and produces a fine yield. This is the variety grown extensively by irrigation in Washington and Idaho for baking. Our stock is extra choice of the most improved type. price prepaid 3rd zone. 10 lbs. 90c. Write for quantity prices.

PROPER FEEDING OF POTATOES IMPORTANT

Most soils contain sufficient amount of nitrogen plant food from manuring, and this does not contain proper amount of phosphate and potash. It will be to your advantage to apply these plant foods liberally when preparing land for growing potatoes.

Radishes

One ounce will plant 100 feet of row; ten lbs. per acre.

CULTURE—Sow early and often. In good, warm loam, especially if quite sandy, summer radishes will make a crop in four to six weeks from sowing. The soil should be well prepared and fertilizers

may be used freely. Have the rows a foot apart, and sow just enough so that they will not require thinning. The short turnip-rooted sorts are quickest and easiest to grow and also good for forcing.

Early Scarlet Globe

EARLY SCARLET WHITE TIP—One of the favorite varieties for the home gardener because of its crisp quality and early maturity. A turnip shaped radish with scarlet top and white tip. Postpaid. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; 1 lb. 75c.

WHITE ICICLE—A standard variety for market and home use because of its attractive appearance and uniform shape. Retains its quality if planted early in the season. Postpaid. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 40c; 1 lb. 75c.

WHITE STRASBURG—Popular with Market Gardeners. Roots about 5 inches long, $1\frac{1}{2}$ inches at shoulder, tapering and smooth. Skin and flesh white and crisp. Continues in marketable condition longer than most varieties. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; 1 lb. 75c. Postpaid.

SCARLET GLOBE—One of the earliest varieties, having a globe-shaped root, very crisp and tender. Postpaid. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 40c; 1 lb. 75c.

SAXA—The earliest forcing sort, slow to run to seed, round, bright scarlet, very small top. Flesh snowy white, crisp and good. Pkt. 5c; $\frac{1}{4}$ lb. 25c; 1 lb. 75c.

CRIMSON GIANT—A most remarkable new Radish for both the home garden and market sale. The roots, even though they grow to the enormous size of $1\frac{1}{2}$ inches in diameter, are as crisp as ice if grown quickly. The skin is bright scarlet-red and the flesh is pure white. The ample and large foliage is a bright healthy green. Postpaid. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 40c; 1 lb. 75c.

EARLY SCARLET OLIVE—This early radish has an olive shape, a bright scarlet color and white flesh. Postpaid. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 40c; 1 lb. 75c.

FRENCH BREAKFAST—One of the old standard varieties, rather oblong in shape and suitable for early use. Postpaid. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 25c; $\frac{1}{2}$ lb. 40c; 1 lb. 75c.

WINTER RADISHES

These require cool weather at the finish of their growing season, though they may be started during hot weather. Make your first planting the middle of June, a second the middle of July and a third the middle of August. Sow thinly in rows not less than 15 inches apart; thin out to stand 6 inches apart. Easily stored for winter use. One ounce for 100 feet of row.

WHITE CHINESE or Celestial—An outstanding variety, growing to enormous size. The white roots are cylindrical and grow 12 to 15 inches long, with a diameter of 5 inches. The flesh is crisp, juicy, and tender. Agreeably mild in flavor. A widely grown variety. Very productive. Postpaid. Pkt. 5c; oz. 10c; 4 oz. 40c; $\frac{1}{2}$ lb. 60c; 1 lb. 95c; 2 lbs. \$1.65; 5 lbs. \$3.80; 10 lbs. \$6.65.

RHUBARB

One ounce will produce about 700 plants

VICTORIA—A large stalk variety which grows rapidly and is very succulent and free from fibre. Postpaid. Pkt. 5c; oz. 20c; 4 oz. 60c; 1 lb. \$1.90.

SALSIFY—Oyster Plant

This plant is grown largely for fall and winter use and is highly esteemed for the fine flavor of the roots. The popular name, Oyster Plant, has been given to Salsify because the roots have an oyster-like flavor.

SANDWICH ISLAND MAMMOTH—The roots, notwithstanding their extra-large size, are of excellent quality and delicate in flavor. It is a great improvement on the ordinary type, pro-

ducing shorter and better shaped roots with almost white flesh and of fine flavor. Easily stored for winter. Postpaid. Pkt. 5c; oz. 25c; $\frac{1}{4}$ lb. 75c; $\frac{1}{2}$ lb. \$1.30; 1 lb. \$2.10.

Buy Only the Best

Duthie's Best Spinach

One ounce will plant 100 ft. of row; 8 to 10 lbs. per acre

GIANT NOBEL THICK LEAF—A recent European introduction of high merit. Very valuable for market gardens and canning. Plants large, vigorous, and spreading. It is slow to form seed stalks, and an ex-

tremely heavy yielder. Leaves huge, thick, smooth, pointed, with rounded tip; deep green, tender. The best of the Giant Thick Leave sorts. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 50c; 5 lbs. \$2.00.

Improved Thick Leaved Spinach

LONG STANDING—This variety does not go to seed as rapidly as other spinach. While the leaves are smaller than those of the Bloomsdale, it is desirable for late spring planting. Postpaid. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 20c; 1 lb. 50c; 5 lbs. \$2.00.

IMPROVED THICK LEAVED—A variety preferred by market gardeners for fall seeding and is equally satisfactory for spring planting. Leaves are bright green in color, somewhat round and of choice quality. Postpaid. Pkt. 5c; oz. 10c; 4 oz. 20c; 1 lb. 45c; 5 lbs. \$1.70.

VIROFLAY—An extremely large medium early, vigorous growing variety, with long, broad, pointed, thick, smooth leaves, of deep green color. Excellent for home gardens, for truckers, and for caners. Postpaid. Pkt. 5c; oz. 10c; $\frac{1}{4}$ lb. 20c; lb. 50c; 5 lbs. \$2.00.

KING OF DENMARK—This spinach is a rank grower with deep wrinkled dark green leaves. It

appears quite resistant to extreme hot weather conditions. Postpaid. Pkt. 5c; oz.

10c; $\frac{1}{4}$ lb. 20c; 1 lb. 50c; 5 lbs. \$2.00.

Squash

One-half ounce will plant 100 feet of row; 2 to 3 lbs. per acre.

CULTURE—Plant in well-manured hills, the bush varieties four feet apart each way, the winter sorts ten to twelve feet each way. Use seed freely, 8 to 12 seeds to the hill, to provide for losses by insects. When danger of such loss is past, thin to two or four plants to the hill. To repel the squash vine borer, throw a handful of tobacco dust close around the plants. For yellow-striped beetle and blight, spray early and repeatedly with Bordo Arsenate.

SUMMER VARIETIES

WHITE BUSH SCALLOP—More summer squash should be grown as they supply the green vegetables during the season when much of the garden has passed its prime. The fruit of this squash is scallop-shaped, white in color and of high flavor. Postpaid. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 30c; 1 lb. 90c.

YELLOW BUSH SCALLOP—These squashes are of golden yellow color and of similar shape to the white Bush. They have a distinct flavor and are excellent for table use during the early summer. Postpaid. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 30c; 1 lb. 90c.

YELLOW SUMMER CROOKNECK—The fruits of this variety are elongated and somewhat warted and crooked toward the point of attachment. They should be used before they attain maximum growth. Postpaid. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 40c; 1 lb. \$1.20.

FALL and WINTER VARIETIES

DELICIOUS—A medium sized variety with dark green skin. The fruits are top shaped. A good keeper. Postpaid. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 35c; 1 lb. \$1.10.

GOLDEN HUBBARD—An old variety similar in shape and quality to the Green Hubbard. The skin is golden yellow in color. Postpaid. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 30c; 1 lb. 90c.

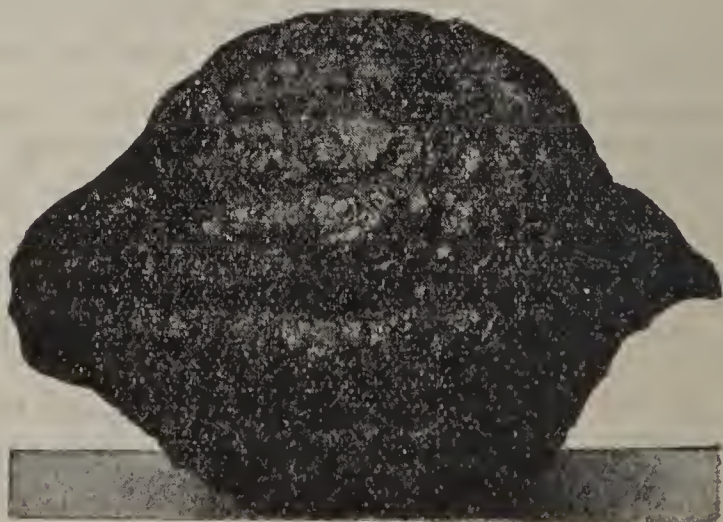

TRUE HUBBARD—Selected strain, and while we do not consider it equal to Delicious in flavor, it is a heavier yielder and better known in the market. We have a true stock of seed carefully selected for color, shape and quality. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. \$1.35.

TABLE QUEEN—We recommend this variety for the home gardener who desires a small squash for winter use. It is especially desirable for use by small families as the squash can be utilized more efficiently than the larger varieties. The fruits are acorn shaped, dark green in color and distinctly ribbed, yellow flesh. They keep just as well as the Hubbard Squash and have a better flavor. Postpaid. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 35c; 1 lb. \$1.10

BANANA—The skin of this squash is grayish green in color and the fruits long and tapering toward the ends. The rind is not so hard as in the Hubbard. A good keeper. Postpaid. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 35c; 1 lb. \$1.10.

MARBLEHEAD—Matures at the same time as the Green Hubbard. Skin is light green in color. This variety is grown commercially in many irrigated sections. Postpaid. Pkt. 5c; oz. 15c; $\frac{1}{4}$ lb. 40c; 1 lb. \$1.20.

BLUE HUBBARD—Colby's strain. A quality Hubbard with gray-blue skin and of extra choice flavor. Pkt. 5c; oz. 20c; $\frac{1}{4}$ lb. 50c; lb. \$1.50.

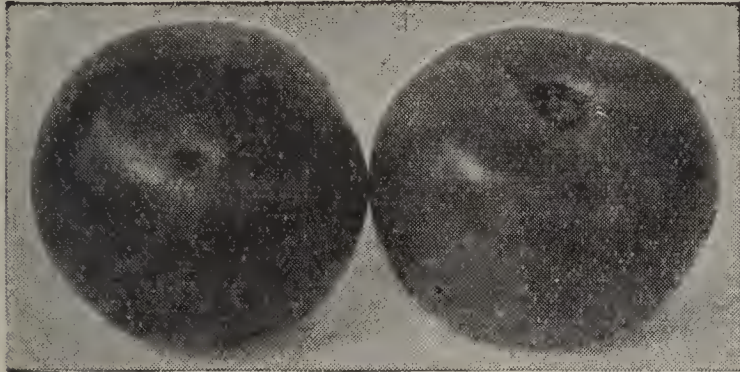

Green Hubbard

Duthie's Tomatoes

One ounce will produce 2,000 plants

CULTURE—Tomatoes may be started in hotbed or under glass to be ready for transplanting as soon as frost danger is over. Set out on land thoroughly prepared and free of weeds, spacing the plants 3 to 4 feet apart in the row. Often the seed may be planted in hills and a single plant allowed to grow, planting in the permanent bed where the crop is to be grown.

Break o' Day Tomatoes

BREAK O'DAY—This new Tomato was originated by the Dept. of Agriculture and we are pleased to state that it has proven to be all that has been claimed for it. In our trial plot last season it matured two weeks earlier than the Earliana. From all indications it will be the most popular early Tomato in this market. Beautiful scarlet fruit of medium size, deep solid, and almost seedless. Vigorous growth with sparing foliage. Pkt. 10c; oz. 50c; ¼ lb. \$1.75; 1 lb. \$6.00.

OXHEART—The largest tomato. The shape is "oxheart," the fruit very heavy and solid with almost no seed cells. As a slicing tomato, it has no equal. Pkt. 15c; oz. 75c; ¼ lb. \$2.50; 1 lb. \$8.00.

PRITCHARD OR SCARLET TOPPER — Latest wilt resistant tomato raised by late Dr. Pritchard who was so well known to the trade for his valuable introduction of Marglobe and Break O'Day. It belongs mid-season sort and being a cross of Cooper's special, vines are rather dwarf and produce very heavy crop of intense scarlet fruits of nearly globe shape. Pkt. 10c; oz. 35c; ¼ lb. \$1.00

JOHN BAER—Our stock of John Baer has been used by many gardeners and has given excellent results. It is an early variety with very solid flesh and a bright red color. Postpaid. Pkt. 5c; oz. 25c; 4 oz. 85c; ½ lb. \$1.50; 1 lb. \$2.75.

BONNY BEST—One of the standard early varieties, a little later in maturity than Earliana. The fruit is bright red and smooth, ripening evenly and right down to the stem. One of the best all around tomatoes, though not the earliest, Pkt. 5c; oz. 30c; ¼ lb. \$1.25; 1 lb. \$3.50.

YELLOW PEAR — For preserving and pickling this tomato is excellent. The fruits grow in clusters and are small in size, of bright yellow color and pear shape. Postpaid. Pkt. 5c; oz. 35c; 4 oz. \$1.30.

GROUND CHERRY—The fruits are small, round and yellowish in color and are used for preserving. Postpaid. Pkt. 5c; oz. 35c; 4 oz. \$1.30.

PENN STATE—(Certified seed.) Early. Fruit of desirable medium size, globular and of rich scarlet color; superb quality with very few seeds. Compact, vigorous, plants with determinate growth habit, allowing heavy fertilization and resultant heavy yields without too much plant-growth. Pkt. 10c; ½ oz. \$1.00; oz. \$1.85; 2 oz. \$3.50; ¼ lb. \$6.00

SCARLET DAWN—This variety received the All-American Gold Medal for 1935. The vines are of medium growth, fairly open, very prolific. Fruits are medium large with thick wall structure, globular, smooth, free from flat sides, bright scarlet, ripening well to the stem. This variety is desirable for the home garden, shipping, and early canning. It is very attractive. Pkt. 10c; ¼ oz. 25c; ½ oz. 40c; 1 oz. 70c; ¼ lb. \$2.35.

SPARK'S EARLIANA—We offer a special stock of this variety which has been selected for freedom from disease, type, and shipping quality. The fruits are large, smooth, of fine texture and quality. Postpaid. Pkt. 5c; oz. 25c; 4 oz. 85c; ½ lb. \$1.50; 1 lb. \$2.75.

Earliana Tomato

CHALK'S EARLY JEWEL — A variety which produces throughout the season if conditions are favorable. The fruits are large, bright scarlet in color and stand shipment well. Postpaid. Pkt. 5c; oz. 30c; 4 oz. \$1.00; ½ lb. \$1.75; 1 lb. \$3.25.

MARGLOBE—Is practically immune to Nail Head Rust and Fusarium Wilt. Pure scarlet globe-shaped type, vigorous; a heavy producer—an exceptionally fine Tomato, especially recommended for shipping. Postpaid. Pkt. 5c; oz. 30c; 4 oz. \$1.25; 1 lb. \$3.50.

Duthie's Table Turnips

Purple Top Strap-Leaf

PURPLE TOP STRAP-LEAF—This is surpassed in earliness only by the Milan. The roots are quite flat, 4 to 6 inches in diameter. The upper portion of the root is a deep purplish red, the lower portion clear milky white. Fine grained, sweet, and tender. Grown extensively for fall and winter use. Postpaid. Pkt. 5c; oz. 10c; 4 oz. 25c; 1 lb. 60c.

WHITE EGG—White Egg Turnip is an old favorite with both home gardeners and market growers. The roots are of typical egg-shape. The skin is thin and almost white. The flesh is pure white, mealy, fine grained, and entirely free from any hard fibre or woody substance. When prepared for the table, the roots are tender, crisp, and of fine sweet flavor. It is an excellent variety for winter. Postpaid. Pkt. 5c; oz. 10c; 4 ozs. 25c; ½ lb. 40c; 1 lb. 60c; 5 lbs. \$2.75.

PURPLE-TOP WHITE GLOBE—This is a well-known Turnip, also sold under the name of Red-Top White Globe. The roots grow to good size, measuring 6 inches and more in diameter. They are nearly round in shape and show a rich purplish red color on the upper part of the roots which extends above the surface. The lower portion is creamy white. The flesh is white, firm, crisp, and of remarkably mild flavor. Postpaid. Pkt. 5c; oz. 10c; 4 oz. 25c; 1 lb. 60c; 2 lbs. \$1.10; 5 lbs. \$2.45; 10 lbs. \$4.55.

LARGE WHITE GLOBE—A large ball-shaped Turnip, of uniform size and shape—6 inches in diameter. The white skin is smooth. The flesh is pure white, firm, crisp, and of finely grained quality. A heavy yielder. Postpaid. Pkt. 5c; oz. 10c; ½ lb. 25c; 1 lb. 60c; 2 lbs. \$1.10; 5 lbs. \$2.45; 10 lbs. \$4.55.

EXTRA-EARLY WHITE MILAN—The bulbs are flat, of medium size, smooth, with crisp white flesh of excellent flavor. Pkt. 5c; oz. 15c; ¼ lb. 25c; ½ lb. 40c; 1 lb. 60c

GOLDEN BALL—The roots are perfectly globe shaped and have bright creamy yellow skin. They are smooth, regular in shape and size, and of very attractive appearance. The flesh has a pale amber tint and is remarkably fine grained. Golden Ball is a quality Turnip with smooth, mealy flesh, free from woodiness and hard fibre. Postpaid. Pkt. 5c; oz. 10c; 4 oz. 25c; ½ lb. 40c; 1 lb. 60c.

COWHORN—Sometimes called Long White. Slightly crooked. Pure white except a little shade of green at the top. Grows half out of the ground and is of very rapid growth. Is delicate and well flavored. Has proved itself one of the best stock turnips ever introduced in Oregon. Pkt. 5c; oz. 10c; ¼ lb. 25c; 1 lb. 60c.

Extra-Early White Milan

RUTABAGAS

½ oz. will plant 100 ft. row; 3 lbs. per acre.

CULTURE—Rutabagas, like turnips, may be sown in early spring for summer use or in late summer for fall and winter. For early crop, sow in rows and thin to 4 or 5 inches. The fall crop may be sown broadcast on clean ground, after early crops have been harvested. Our stock of Rutabagas is foreign grown and of highest quality.

AMERICAN PURPLE TOP OR YELLOW SWEDE — The most popular and generally grown variety with yellowish skin distinctly colored purple at the top. The flesh is very white and of mild flavor. Postpaid. Pkt. 5c; oz. 10c; 2 oz. 25c; ½ lb. 45c; 1 lb. 75c.

BANGHOLM—Preferred by many as the neck is slender and tapers toward the roots, making it more easily cut off at harvest. Postpaid. Pkt. 5c; oz. 10c; ¼ lb. 25c; ½ lb. 40c; 1 lb. 75c.

ALL FOR \$2.00

We will include for early orders one of the valuable booklets, your selection, page 15 of this catalog.

NOVELTIES**Best New Flowers for 1937****Duthie's Sweet Peas**

The finest varieties of Spencers in separate colors and mixtures

CULTURE—Ordinary good garden soil is suitable. The ground should be well drained to avoid water lying too long and becoming sour. Select for a location in your garden a place open and airy and which receives the sun all day.

Care will repay the planter. Supply a good amount of stable manure and bone-meal. A mulch of shredded cow manure when started is beneficial.

Inoculate the seed to insure success. Sow in trenches about four inches deep and cover to a depth of two inches, still allowing the center of the trench to remain at least two inches below the level of the ground, that water may be retained.

GIANT SPENCER FLOWERING MIXTURE—Best standard mixture of fine colors. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 65c; lb. \$2.25.

Ruffled Spencer Mixed—Pkt. 10c; oz. 30c; $\frac{1}{4}$ lb. 90c.

Early Spencer Mixed—Pkt. 10c; oz. 35c; $\frac{1}{4}$ lb. \$1.10.

EARLY BLOOMING VARIETIES

Early Marine—The clearest true blue of all.

Early Columbia—Best pink and white.

Early Giant Rose—Warm rose pink.

Early Harmony—Beautiful lavender, waved.

Early Oriental—Clear deep cream.

Early Silver Blue—Light shade of lavender.

Early Snowstorm Improved—Giant pure white.

Early Apollo—Soft salmon cerise.

Early Vulcan—Brightest scarlet. Sun-proof.

Early White Harmony—Glistening pure white.

Early Pride—Deep cerise tinged scarlet.

Early Springsong—Bright rose pink, flushed salmon.

Pkt. 10c; $\frac{1}{2}$ oz. 25c; 1 oz. 45c; $\frac{1}{4}$ lb. \$1.50. Postpaid.

STANDARD VARIETIES

Reflection—Clear blue.

Commander Godsall—Navy blue

Ascot—Clear light rose pink.

What Joy—Large, primrose, shaded to cream.

Pinkie—Large flowers in fours. Deep rose pink.

Mary Pickford—Cream pink, faintly tinted salmon.

Welcome—The most dazzling of all scarlets.

Flamingo—Orange scarlet cerise.

Sybil Henshaw—Giant. Deep crimson.

Barbara—Beautiful shade of orange salmon.

Gloriosa—Bright, orange scarlet.

Idyl—Giant flowers in fours. Salmon pink. Waved.

Royal Pink—Large, pure pink.

Tangerine Improved—Rich salmon orange.

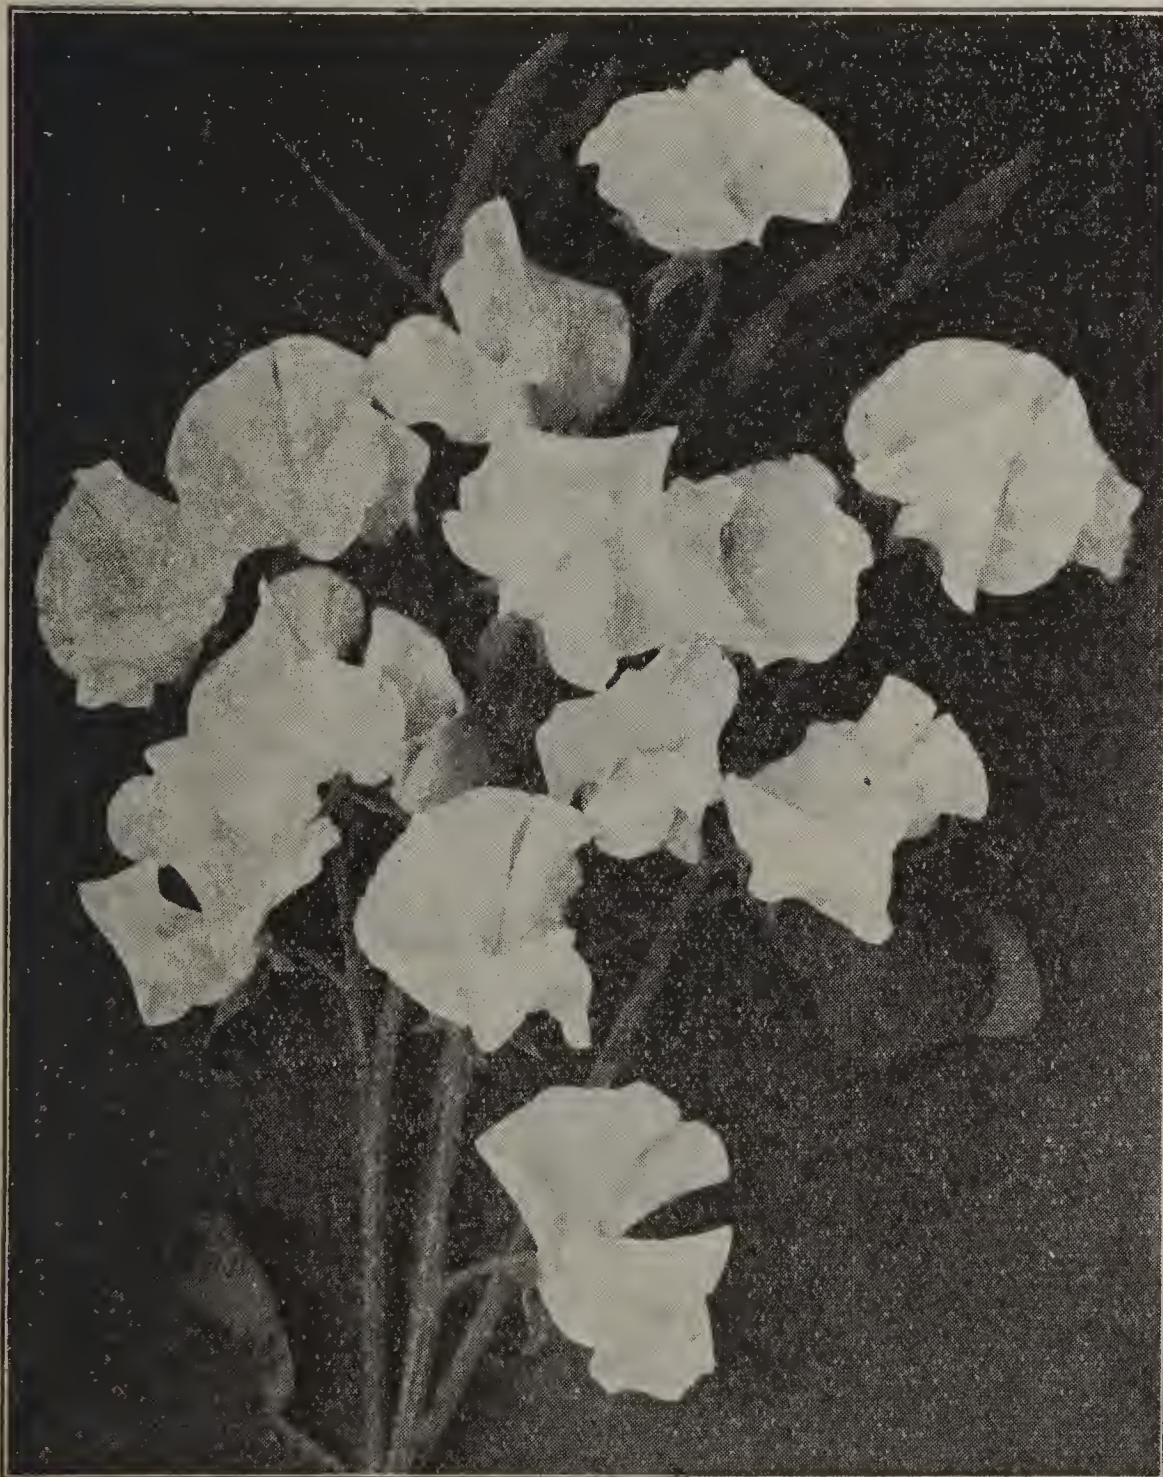

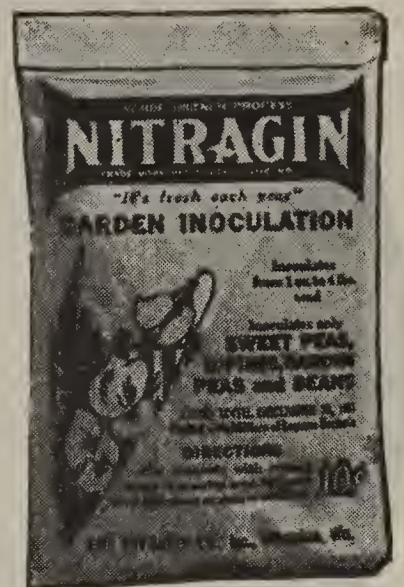

Powerscourt—Clearest lavender.

Fortune—Rich, dark blue.

Youth—Pure white edged soft pink.

Avalanche—Giant, pure white.

Pkt. 10c; oz. 30c; $\frac{1}{4}$ lb. \$1.00. Postpaid.

Sweet Peas

Crego Asters

Asters

Asters grow to their greatest perfection in our mild, cool climate. We offer splendid strains that have been developed by careful attention. For fall flowers they rival the Chrysanthemum in size and beauty.

NEW LOS ANGELES—See page 25.

CALIFORNIA GIANTS—They combine the robust habit of growth and length of stem that characterizes the Beauty type and the Crego or Ostrich Feather type of blossom. A true non-lateral variety. White, peach blossom, light blue, deep rose, dark purple and mixed. Pkt. 10c; $\frac{1}{8}$ oz. 75c.

CALIFORNIA GIANT SUNSHINE—Improved Anemone Type. One of the most attractive Asters. Plants are strong and bushy, with many flower stalks. The large single flowers have centers of twisted and quilled petals of contrasting colors. Their delicate beauty and strong stems and keeping qualities make them ideal for cutting. White, pink, lavender, violet, carmine and mixture. Pkt. 10c.

EARLY BEAUTY ASTERS—Early flowering type of American Beauty Asters. The bushes grow $2\frac{1}{2}$ to 3 feet tall, carrying magnificent large flowers. Purple, flesh pink, crimson, lavender, peach blossom, and mixed. Any of these. Pkt. 10c; $\frac{1}{8}$ oz. 55c; $\frac{1}{4}$ oz. 90c; $\frac{1}{2}$ oz. \$1.55.

WILT RESISTANT IMPROVED CREGO—Wilt is a disease which causes so much trouble to aster growers. It may occur at any stage. There seems to be no method of control and all that aster growers can do is to safeguard against this disease by planting Wilt Resistant Strains. Colors, white, rose, purple, crimson and mixed. Pkt. 15c.

PERENNIAL ASTERS—Hardy handsome flowers of easy culture, appearing at a time when flowers are scarce. If seed is sown indoors very early and seedlings set in open as soon as large enough to handle, will bloom the first season. Large flowering mixed. Pkt. 10c.

IMPROVED CREGO GIANT—Distinct in every way. Magnificent flowers of rare beauty, form and color. Very vigorous, long stems and free flowering. Pkt. 10c; $\frac{1}{4}$ oz. 50c. Mixed Pkt. 10c.

HEART OF FRANCE—The best red Aster to be had. Produces an abundance of large flowers on good stems. Plants of vigorous branching habit. Pkt. 10c.

AGERATUM (Blue Perfection)—Attractive, compact bushes with a profusion of small ball-shaped pure blue flowers. Excellent for beds and borders. Postpaid. Pkt. 10c; 1-16 oz. 40c; $\frac{1}{8}$ oz. 65c.

ALYSSUM (Sweet)—A well known variety 10 inches in height with fragrant white flowers. An excellent border plant. Postpaid. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

(Carpet of Snow)—Low growing, pure white, trailing habit. Postpaid. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

(Little Gem)—A special dwarf variety of Alyssum with masses of pure white flowers. Postpaid. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

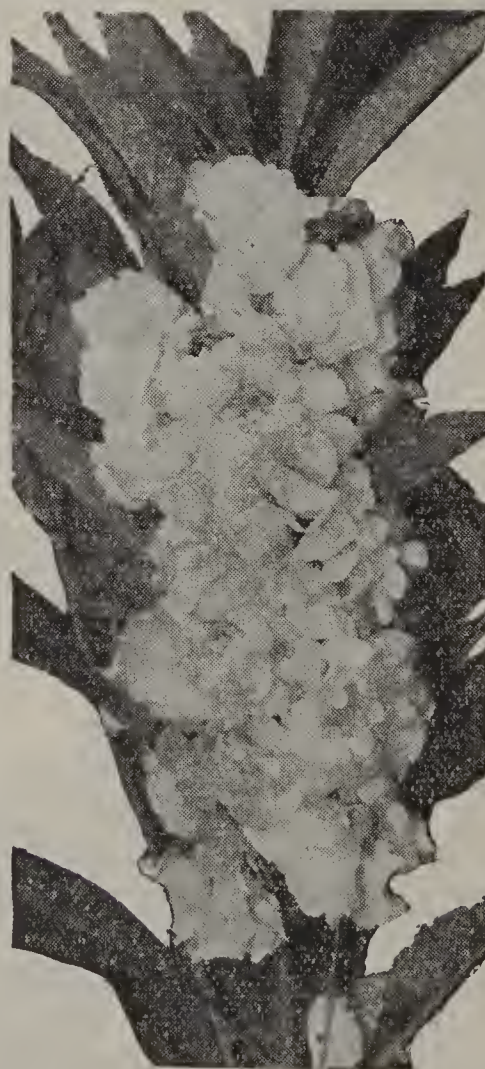

(Saxatile Compactum)—This perennial strain of Alyssum is valuable for rock gardens. It produces yellow flowers and is desired by many for its color. Postpaid. Pkt. 10c; $\frac{1}{4}$ oz. 30c.

AMARANTHUS TRICOLOR (Joseph's Coat)—A very showy annual growing to a height of 3 feet. The leaves are variegated in color, red, yellow and green. It is used where a variety of color is needed. Postpaid. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

ARCTOTIS GRANDIS (African Daisy)—These annual daisies grow from 6 to 10 inches tall, producing pure white flowers with lilac under color. Fine for cutting. Postpaid. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

ARABIS (Rock Cress)—One of the best white flowering perennials for rock garden, blooming very early in the season. It is low growing and is fine for borders or massing. Postpaid. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

BACHELOR'S BUTTON—Old favorite annuals growing to a height of 3 feet. The flowers are of various shades of blue, purple, pinks, and white and the foliage is small. Easily grown from seed planted out of doors. Postpaid. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

Balsam

BALSAM—An annual 1 to 2 feet in height suited to borders or group planting. The rose-like flowers grow in the axil of the leaves and are beautiful in shade and color. Postpaid. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

BLUE LACE FLOWER—This annual grows 2 feet in height and has lace-like mass of blue flowers. The blooms are produced throughout the season and can be used for cutting and general garden display. Postpaid. Pkt. 10c; $\frac{1}{4}$ oz. 50c.

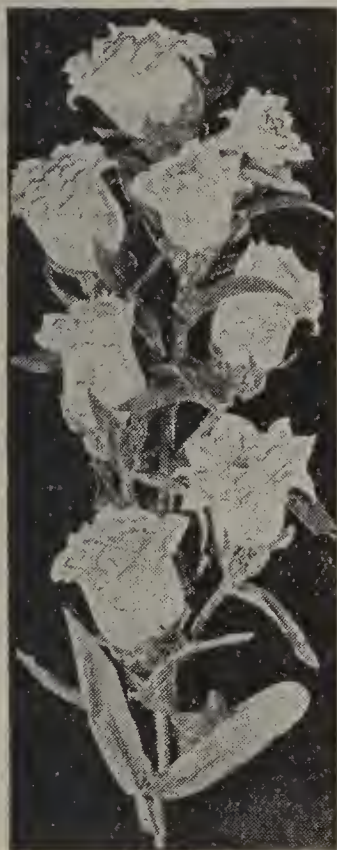

BALLOON VINE—A rapid growing climber. Blossoms very small and white. Light, graceful foliage. Bears curiously inflated seed pods. Sow where it is to remain. Succeeds best in light warm soil. 10 to 12 feet tall. Pkt. 10c; oz. 25c.

CALLIOPSIS—Always covered with a mass of bright flowers. Sow where plants are to remain. In sunny situation will bloom all summer. Fine cut flowers. 1 to 2 feet tall. Tall single mixed, Pkt. 10c; oz. 35c. Tall double mixed, Pkt. 10c; oz. 40c.

**USE VIGORO IN PREPARING YOUR
ASTER BED—IT WORKS WONDERS**

CANDYTUFT—(Iberis)—One of the most highly prized annuals for beds or masses, very useful for cutting. For early blooms sow indoors, transplanting to garden when 2 or 3 inches high. Sowings every two weeks in the open, will flower from July until frost. Grows 1 to 1½ feet.

Umbrella Type—Carmine, flesh pink, rose cardinal, crimson, lavender, white, mixed. Pkt. 10c; oz. 50c.

CANTERBURY BELLS (B)

—**Campanula**— Very ornamental garden plant growing 2½ feet high, producing large, nodding and charming bell-shaped flowers of many exquisite shades; hardy biennial. Sow seeds in May. Keep seedlings well watered and transplant to permanent location in July or August. Give rich soil and plenty of room. **Medium Single**—Blue, rose, pink, white or mixed. Pkt. 10c; ¼ oz. 25c.

Calycanthemum — (Cup and Saucer)—Mixed. Pkt. 10c; 1-8 oz. 60c.

CALENDULA CHRYSANTHA—New. See page 25.

CALENDULA — (**Lemon Queen**) — A rich lemon yellow variety with large compact blooms. The plants are used for massing and borders. If cut often will bear throughout the season. Postpaid. Pkt. 10c; ½ oz. 25c.

(**Orange King**)—Similar in quality to the Lemon Queen but the flowers are of a deep orange color. Postpaid. Pkt. 10c; ½ oz. 25c.

(**Radio**)—The petals are attractively quilled. The color is a deep shade of golden yellow. The flowers are large and double. Pkt. 10c; ¼ oz. 50c.

(**Mixed Colors**)—An assortment of colors varying from nearly white to dark orange. Postpaid. Pkt. 10c; ½ oz. 25c.

CALIFORNIA POPPY—(Eschscholtzia) — They commence to bloom within a few weeks' time from spring-sown seed and continue to flower profusely until late in the autumn, forming nice, bushy plants 1 to 1½ feet high. Colors yellow, red, orange and white. Fine delicate foliage. Sow seeds in Fall or Spring where plants are to remain. Seedlings are difficult to transplant. Thin to 12 inches.

(**Aurantiaca**) — Rich orange, true California Poppy. Pkt. 10c; oz. 35c.

(**Carmine King**)—Deep carmine. Pkt. 10c; ½ oz. 45c.

(**Golden West**)—Yellow with orange center. Pkt. 10c; oz. 30c.

(**Mikado**)—Orange crimson. Pkt. 10c; ½ oz. 40c.

(**The Geisha**)—Inside petals brilliant gold, outside orange-crimson, petals fluted. Pkt. 10c; ¼ oz. 40c.

(**Mixed**)—Pkt. 10c; ¼ oz. 25c.

CARDINAL CLIMBER—A vine-like annual with fern-shaped foliage growing to a height of 20 feet. It produces fiery cardinal red flowers. A desirable plant for trellis. Postpaid. Pkt. 10c; ¼ oz. 50c.

Beautifying the home increases its value and makes it a more pleasant place to live. Good seed costs you very little.

VIGORO

Complete plant food

Marigold, Crown of Gold

CROWN OF GOLD—The gold medal winner, marigold, was given preference by most of the judges. It is the first marigold known to have an odorless foliage. The color of this new novelty is orange, and it is two and one-half inches in diameter. Flowers are fragrant, the plant grows to a height of 2½ feet, and it is early flowering. Pkt 25c.

Larkspur, White King

Iceland Poppy, Yellow Wonder

Zinnia, Fantasy, Star Dust

The All-American Flower Selection

The All-American Council has recently released the flower winners in this year's trials, which were conducted in twelve different sections of America. Nearly 200 varieties were entered in the competition. We are pleased to show these winners herewith. The American home owner and gardener is always on the lookout for new and improved flower varieties.

ZINNIA FANTASY—As different from the ordinary stiff formal Zinnias as one could imagine. The delicate, lacy petaled flowers lend an air of friendly informality to the garden or flower arrangement. Ideally suited to any decorative use, the medium-sized shaggy flowers are borne profusely on 2½ to 3 foot plants, in a wide and varied color range which includes the brightest shades of red, yellow, orange, as well as the popular pastel shades. Pkt 25c.

WHITE KING—The new white larkspur is of the Giant Imperial type and it's branching habit is similar to Carmine King. Pkt. 25c.

ICELAND POPPY, YELLOW WONDER—Is a very strong grower, with extra large, rich yellow flowers. Pkt. 25c.

JUBILEE GEM—Cornflower, introduced in England, ranges from 10 to 15 inches in height. It is double-flowered and rich blue in color. This very compact variety seems good for a low growing, bushy cornflower. Pkt. 25c.

PETUNIA BURGUNDY—Has 3½ inch flowers which are purple or carmine with white throat and tube with violet veins. Growth is from compact to tall and spreading. Pkt. 25c

VERBENA—Floradale Beauty—Is a large-flowered type, of rose and salmon colored shades. It has extra large trusses. Pkt 25c.

OTHER ALL-AMERICAN SELECTIONS

(Awards since 1932)

ASTER—Los Angeles—Immense, clear delicate shell pink. Pkt. 20c.

CALENDULA—Chrysantha (Sunshine)—Buttercup yellow with long curving petals. Pkt. 15c.

COSMOS—Orange Flare—Vivid orange flower with light foliage, Pkt. 15c.

COSMOS—Sensation—Huge pink, white flowers measuring 4 to 5 inches across, with broad heavy fluted petals. Height 4 feet. Pkt. 25c

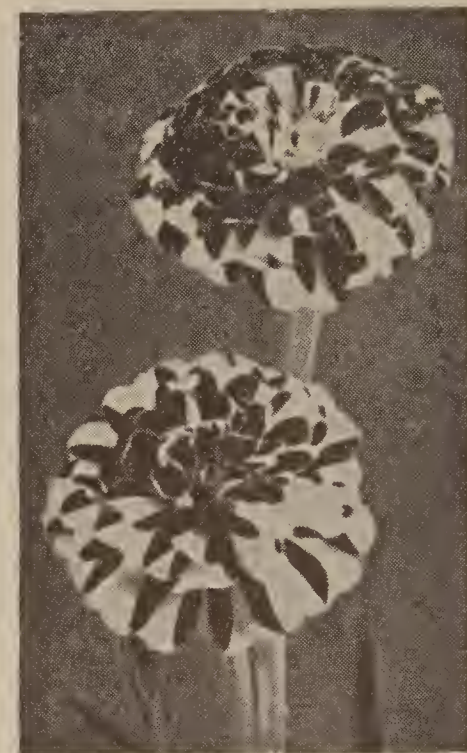

MARIGOLD—Guinea Gold—Distinctly new.—Pkt. 10c.

MARIGOLD—Yellow Supreme—Marigold sensation. Large fluffy blooms, soft lemon yellow. Mild honey fragrance. Pkt. 15c

MARIGOLD—Dwarf French Harmony—A charming and distinct variety bearing good sized flowers of Scabiosa-like formation. Each bloom has a central deep orange crest, surrounded by a collar of broad maroon petals. Pkt. 25c.

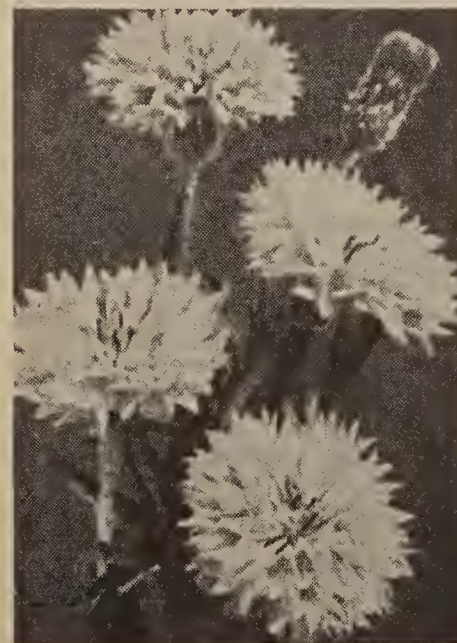

NASTURTIUM—Golden Gleam—Every garden should have some. Pkt 10c.

SNAPDRAGONS—Rust-Proof—Superb new strain. Mixed. Pkt. 25c.

Marigold, Dwarf Royal Scot

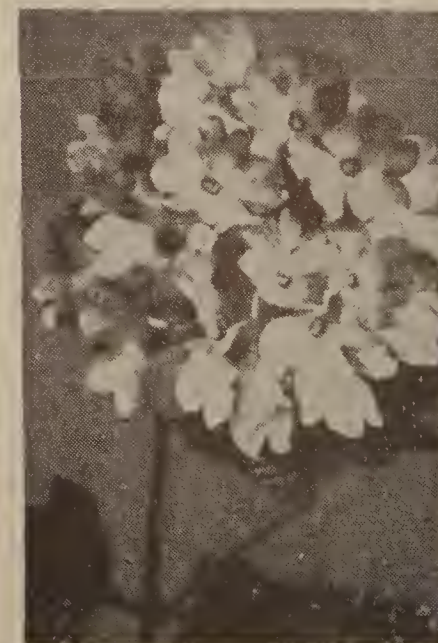

MARIGOLD — Dwarf Royal Scot—All double, is a French type with large brown and gold striped flowers. All flowers are double and plants are of uniform height. Pkt. 25c.

Cornflower, Jubilee Gem

Petunia, Burgundy

Verbena, Floradale Beauty

STANDARD FLOWER SEEDS—(Continued)

CARNATION (P) — (*Dianthus Caryophyllus*) — Carnations are tender perennials, being easily winter killed. Splendid for cut flowers, deliciously fragrant. Colors pink, white and red. Sow seeds indoors in March. Transplant seedlings to other boxes when 1 inch high. Keep them growing well until soil is warm, then transfer to open garden. Height 1 to 1½ feet. See Plant Dept. also.

(Chabaud Everyblooming) — Extra choice double mixed. Flowers in five to six months. Pkt. 15c.

(Margaret) — Finest Double Mixed. Bloom in four months from seed. Pkt. 10c; ¼ oz. 50c.

CASTOR BEAN — (*Ricinus*) — Tropical appearing foliage plant. Highly ornamental, of stately growth, large leaves of bronze or glossy green. Should not be planted until soil is warm. Grows 3 to 5 feet tall.

(Sanquineus) — Brilliant scarlet stems and fruit. Pkt. 10c; oz. 25c.

(Zanzibariensis) — Surpasses all in size and beauty of colors. Mixed. Pkt. 10c; oz. 25c.

(Best varieties mixed) — Pkt. 10c; oz. 25c.

CATCHFLY — (*Silene*) — A hardy annual, yielding for a long time a profusion of umbels of bright colored flowers in various shades of pink. Fine for border or rockery. The plant is covered with glutinous moisture, to which flies adhere; hence its name. Sow in boxes and transplant as soon as large enough. Fine mixed. Pkt. 10c; oz. 45c.

CELOSIA CRISTATA — (Cockscomb) Very attractive and showy, producing massive heads of deeply colored flowers. Colors, red, purple and yellow. Sow very thinly in boxes indoors, transplanting to other boxes or thumbpots until little combs appear. Grows 9 to 12 inches tall. Cockscomb Tall Mixed, Pkt. 10c; oz. \$1.00.

(Dwarf Fine Mixed) — Pkt. 10c; ¼ oz. 65c.

CELOSIA PLUMOSA — (Feathered) — Large plummy heads. For pots or open ground. Keeps well when cut. 1 to 2 feet tall. Finest mixed. Pkt. 10c; oz. \$1.00.

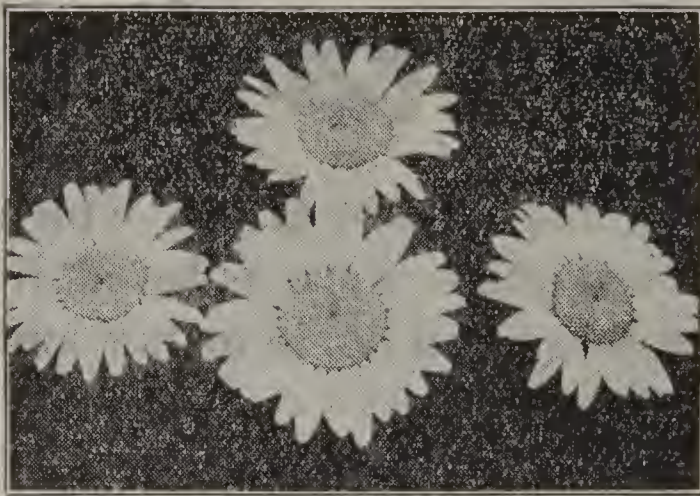

(Childsii) — (Chinese Wool Flower) — A unique form of feathered cockscomb, growing 2 to 3 feet high, each branch terminated with a large head of rich crimson flowers that look as if made of silky wool. Effective in beds and borders. Valuable for cutting, as they can be dried, retaining their bright colors for weeks. Pkt. 10c; ¼ oz. 75c.

CENTAUREA — Sweet scented flowers on long, strong stems. Will last several days when cut. Sow where plants are to remain, thinning to 12 inches apart. Grows 1 to 3 feet tall.

Imperials — (Giant) — Mixed Pkt. 10c; ¼ oz. 35c.

Suaveolens — (Yellow Sweet Sul-tan) — Pkt. 10c; ¼ oz. 30c.

Moschata Mixed — Pkt. 10c; ¼ oz. 30c.

Candidissima — (Dusty Miller) — Pkt. 10c; ¼ oz. 75c.

CHRYSANTHEMUM — Very showy, effective and desirable as summer flowering plants. Hardy annuals. Sow seeds in flats very early in spring and transplant to garden when soil is warm. Grows 1 to 2 feet.

(Carinatum Hybrida) — Finest double mixed. Pkt. 10c; ¼ oz. 25c.

(Coronarum) — Double finest mixed. Pkt. 10c; oz. 40c.

CHINESE LANTERN PLANT — (*Physalis Franchetti*) — The Chinese Lantern Plant is grown for its showy scarlet red seed-pods which are easily dried for winter bouquets. The plants are perfectly hardy, blooming during June and July. The flowers are white. Easily grown in any kind of soil whether sunny or semi-shaded. Pkt. 10c; ¼ oz. 35c; ½ oz. 55c; ¾ oz. 95c.

CLARKIA — Hardy shrub-like annuals with colored stems and rosy flowers. A very attractive plant for massing and for planting among perennial shrubbery. Postpaid. Pkt. 10c; ¼ oz. 30c.

COLUMBINE — Perennial plants with delicate wavy foliage and graceful spurred flowers of attractive colors. Widely used in rockeries and among shrubbery growing well in partial shade. Postpaid. Pkt. 10c; ¼ oz. 50c.

COREOPSIS — A beautiful perennial daisy with yellow petals of glossy color and widely used in rock gardens. The flowers are suited to cutting. Postpaid. Pkt. 10c; ½ oz. 25c.

COSMOS — Orange Flare — New. See page 25.

COSMOS — Sensation — New. See page 25.

COSMOS — Single Mixed. Pkt. 10c.

COSMOS — Double Mixed. Pkt. 10c.

CYPRESS VINE — A rapid growing vine having star shaped flowers. Grows best in warm sunny locations. Postpaid. Pkt. 10c; ¼ oz. 25c.

DIMORPHOTHECA AURANTIA-CA — Extremely showy annual with bushy plants 12 to 15 inches high. Flowers are 2½ inches across. Salmon, white, golden orange and mixed. Pkt. 10c; ½ oz. 75c.

DAISY (P) — (*Bellis Perennis*) — Popular low-growing plant bearing beautiful flowers. Hardy perennial. Sow in boxes about August and transplant to cold frame or some location where they may be protected the first winter. Plant in permanent location early in Spring. Height 6 inches.

Extra Double Mixed. Pkt. 10c; ¼ oz. 50c.

Giant Double Monstroza — Dark red, white, rose-pink. Pkt. 10c; 1-16 oz. 40c.

Shasta Alaska — Very hardy; profuse bloomers; flowers very large and borne on long stems, single; petals pure glistening white, dark center. Pkt. 10c; ¼ oz. 50c.

DELPHINIUMS — (Perennial Larkspur) — "Wrexham" strain of Delphiniums from the North of Wales. The range of colors in this mixture runs from the most delicate combination of mauve and light blue, Crater Lake blue, heliotrope, pink-lavender, creamy-white, deep blue, purple etc.

DELPHINIUM, WREXHAM STRAIN — Pkt. 40c.

OREGON GIANTS MIXED DELPHINIUMS — Regular packets containing 100 seeds or more each. 25c each.

DELPHINIUM SNOWFLAKE — A new Giant. Pure white large blossom on 20-inch spikes. Strong plants 4 feet tall. Makes a wonderful contrast when used with blue shades. Pkt. 35c.

Belladonna — Light blue. Pkt. 10c; ¼ oz. \$1.35.

Bellamosum — Dark Blue. Pkt. 10c; ¼ oz. \$1.25.

FORGET-ME-NOT (P) (*Myosotis*) — Beautiful spring favorites of easy growth, bearing clusters of lovely, small blue flowers. Can be left in open ground except in very cold latitudes. Fine for borders and shady situations. Sow in box or prepared bed in the open. Height, one foot.

Alpestris — Of trailing habit, with pretty flowers. Blue or mixed. Pkt. 10c; ¼ oz. 65c.

Victoria — Flowers large, bright azure blue; fine for borders. Pkt. 10c; ¼ oz. 70c.

FOUR-O'CLOCK, Marvel of Peru — A most useful and showy annual for beds and borders. Excellent for planting in front of the porch or alongside the house. Blooms freely from July until frost. The sweet-scented blooms are open from late afternoon until late morning. Tall, mixed. Postpaid. Pkt. 10c; ½ oz. 20c.

Do Best When
Fed with VIGORO

STANDARD FLOWER SEEDS—(Continued)

Foxglove

FOXGLOVE, Digitalis—In stately appearance the Foxgloves occupy a prominent place among our hardy plants. They are biennials, blooming the second year after sowing. They re-seed themselves very easily and in that way will provide a continuous supply of plants year after year. They succeed well in any ordinary garden soil, and bloom profusely in either the sun or semi-shade. 3 feet high. Fine mixed. Postpaid. Pkt. 10c; $\frac{1}{4}$ oz. 30c.

GAILLARDIA—(Blanket Flower)—Very showy garden plant, with brilliant flowers; free blooming from early summer until autumn; especially effective in masses. Sow early where plants are to bloom.

Gaillardia

Colors crimson and orange. Splendid cut flowers. Height 1 to 2 feet.

Picta Lorenziana — Double; finest mixed, annual. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

Picta Single—Finest mixed. Pkt. 10c; $\frac{1}{4}$ oz. 20c.

(P) Grandiflora Maxima. Pkt. 10c; $\frac{1}{4}$ oz. 40c.

GODETIA, Satin Flower—Mixed. large rose, carmine, pink, cattleya-blue, and pure white blooms with petals having a beautiful silky finish. Blooms during the summer and fall; 12 inches. Postpaid. Pkt. 10c; $\frac{1}{8}$ oz. 20c; $\frac{1}{4}$ oz. 30c.

GEUM (Mrs. Bradshaw)—An attractive perennial, growing 2 feet tall and bearing double orange-scarlet flowers during summer. Postpaid. Pkt. 10c; 1-16 oz. 45c.

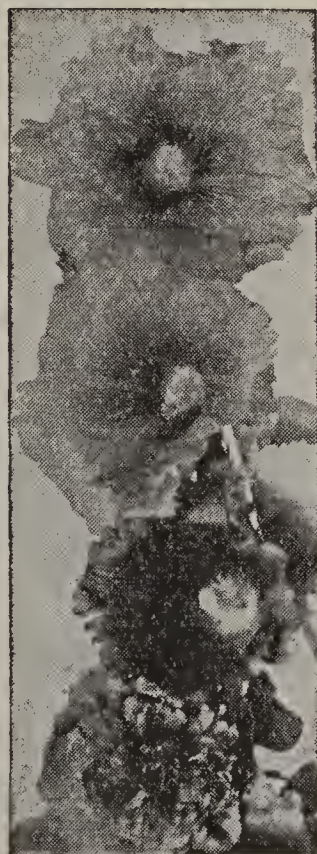

(Lady Stratheden)—Fine, double, golden yellow flowers during summer. Postpaid. Pkt. 10c; 1-16 oz. 45c.

GOURDS, Ornamental—Ornamental Gourds are easily grown in rich soil where they will produce plenty of fruits. They may be trained on trellises and the ripened fruits used for ornaments. Mixed. Postpaid. Pkt. 10c; oz. 40c.

GYPSOPHILA, Baby's Breath—A quick-growing annual, bearing a profusion of small, open, bell-shaped flowers. Gypsophila does well in any soil, particularly if it contains plenty of limestone. Fine for planting in open situations along walls and sunny slopes. Grows 10 to 15 inches tall, and yields plenty of flowers for cutting. Sow the latter part of April. Annual White. Postpaid. Pkt. 10c; $\frac{1}{4}$ oz. 20c. Perennial White. Pkt. 10c; $\frac{1}{4}$ oz. 20c.

HIBISCUS, Mallow Marvels—Giant mixed. Canes growing 6 feet tall with flowers of giant size in white and shades of pink, rose, and crimson all during the summer. Gives a fine display. Postpaid. Pkt. 10c; $\frac{1}{8}$ oz. 30c; $\frac{1}{4}$ oz. 50c.

HOLLYHOCKS—Truly handsome flowers of majestic growth. Hollyhocks usually are grown as biennials but they will often last for a number of years if the flowering stalk is cut down as soon as the last bloom on it has faded. Postpaid. Pkt. 10c; $\frac{1}{4}$ oz. 35c.

Hollyhock

(New Annual)—Hybrida Semperflorens—This splendid variety will bloom in August, from spring planting, continuing until frost. This is a great advantage, as other varieties do not bloom until the second year. Finest single mixed. Pkt. 10c; $\frac{1}{4}$ oz. 30c.

HELICHRYSUM—(Strawflower or "Everlasting") — Hardy annual, 1½ feet. Flowers are round, flat but thick, very full of short, stiff, incurved petals surrounding a depressed center. Their chief value is for winter use in baskets and vases, dried. Cut with long stems when about a third opened, suspend bunch (heads down) in a cool, dry place until thoroughly dried. We offer the **Monstrosum**

fl. pl. strain which is the largest and most double, with the widest range of colors. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

HONESTY—(Moonwort) (*Lunaria biennis*)—H. B. Flowers blue and white. The large oval silvery seed pouches are quite ornamental in bouquets. Beautiful and curious. Finest mixed, 2 feet high. Pkt. 10c; $\frac{1}{4}$ oz. 50c.

**USE VIGORO
for
FINER FLOWERS**

HYACINTH BEAN — (*Dolichos Lablab*)—Rapid growing, ornamental, climbing annual, bearing clusters of beautiful purple and white flowers, followed by highly ornamental seed pods. Sow seeds early where vine is to remain. Mixed. Pkt. 10c; oz. 15c.

ICE PLANT — (*Mesembrianthemum Crystallinum*)—Pretty summer trailing annual for vases and rock work; leaves covered with ice-like drops. Sow seeds early in boxes. Height $\frac{1}{2}$ to 1 ft. Pkt. 10c; oz. 75c.

KOCHIA CHILDSII — (Summer Cypress)—Form symmetrical decorative bushes, foliage green turning to fiery red in autumn. Sow in open and thin to 15 inches. Valuable for summer hedges. Height 1 to 2 feet. Pkt. 10c; oz. 35c.

KUDZU VINE (P) — *Pueraria Thunbergiana* — Beautiful Japan climber, hardy perennial with fragrant purplish-violet, wisteria-like flowers. Height 10 to 12 feet. Pkt. 10c; oz. 75c.

LARKSPUR — The annuals are quite hardy and bloom in late summer months, furnishing flowers of striking beauty in form and color. Tall varieties are suitable for shrubberies and borders, while the dwarf sorts produce charming effects in beds. Height 1 to 2 feet.

NEW GIANT—Imperial type mixture of newest Larkspurs, including new salmon shades. Pkt. 15c

Dwarf Rockets—Finest colors. Double Mixed. Pkt. 10c; oz. 75c.

Tall Double Stock Flowered—Lustrous Carmine, Dark Blue, Light Blue, Rose, White or Finest Mixed. Pkt. 10c; oz. 65c.

LANTANA — Finest mixed. This well-known shrubby plant, with clusters of verbena-like flowers, makes a splendid display the first season sown from seed. The plants flower freely throughout the entire summer and can be potted for winter blooming. Height, 18 inches. The seeds require 4 weeks or longer to germinate, but the plants grow quickly. Postpaid. Pkt. 10c; $\frac{1}{4}$ oz. 20c; $\frac{1}{2}$ oz. 30c; oz. 50c.

LINUM—(*Grandiflorum Rubrum*)—Scarlet Flax—One of the most showy bedding plants, fine foliage, with brilliant scarlet-crimson flowers. Pkt. 10c; oz. 60c.

Perenne (P) — Pearl blue flowers; graceful. Pkt. 10c; $\frac{1}{2}$ oz. 40c.

STANDARD FLOWER SEEDS—(Continued)

LOBELIA — Delicate, low-growing, annual plants of the greatest value for borders, ribbons, edgings, rock work and hanging baskets. Sow very thinly in boxes, covering with glass until seedlings are through surface. Height 6 to 8 inches.

Gracilis—Blue, trailing; beautiful for baskets. Pkt. 10c; $\frac{1}{4}$ oz. 40c.

Crystal Palace Compacta — Dwarf flowers, very fine and rich, bright blue; finest for bedding and edging. Pkt. 10c; $\frac{1}{4}$ oz. 90c.

MARIGOLD—Guinea Gold—Distinctly new type, of graceful pyramidal habit. Guinea Gold produces a neat, compact plant, about $2\frac{1}{2}$ feet high, literally covered with blossoms. Pkt. 10c.

MARIGOLD — Yellow Supreme—new. See page 25.

MARIGOLD—Bodger's New Mexican Dwarf—Orange. Pkt. 15c.

African—Tall or Dwarf, Double. **Fistulosa Type Mixed.** Pkt. 10c; $\frac{1}{4}$ oz. 35c.

DWARF FRENCH HARMONY—See page 25.

French—Dwarf or Tall Double Mixed. Pkt. 10c; oz. 65c.

Golden Ball — New Dwarf. French Double. Compact. Pkt. 10c; oz. 65c.

Little Brownies — (Legion d'Honneur) — Dwarf Double Brownies. Pkt. 10c; oz. 65c.

MIGNONETTE—A sweet scented annual for borders, growing 12 inches tall. Excellent for bouquets. Assorted colors. Postpaid. Pkt. 10c; $\frac{1}{2}$ oz. 35c.

MOON FLOWER—Pkt. 10c.

MORNING GLORY—Old fashioned annual climbers for covering trellis or porch. The flowers are bell shaped and of variegated colors. Postpaid. Pkt. 10c; $\frac{1}{2}$ oz. 25c.

NASTURTIUM — (Golden Gleam) New Double. Pkt. 10c.

NASTURTIUM—New double Hybrids. Pkt. 25c.

NEW NASTURTIUM — (Scarlet Gleam). New double nasturtium. Pkt. 15c.

NASTURTIUM—Tall mixed. Dwarf mixed. Postpaid. Pkt. 10c; oz. 20c; $\frac{1}{4}$ lb. 75c.

ORIENTAL POPPY—Rich scarlet red flowers of value in the perennial garden. The plants are hardy and bloom early in the season before many of the annuals are ready. We believe that this is the best poppy for garden planting. Postpaid. Pkt. 10c; $\frac{1}{4}$ oz. 40c.

PETUNIAS, Giants of California—These petunias are very large, ruffled and fringed and are of a beautiful variety of colors. Our seed will produce as fine flowers as can be grown. Postpaid. Pkt. 15c; 1-32 oz. \$3.00.

Rosy Morn—A rosy pink single petunia with white throat. One of the best varieties for the border and mass planting. Postpaid. Pkt. 10c; $\frac{1}{8}$ oz. \$1.00.

Elks Pride—A deep royal purple variety of rich color, used for borders, window boxes and bedding. One of the richest colored varieties ever developed. Postpaid. Pkt. 25c; 1-32 oz. \$3.00.

Balcony Red — A deep red petunia of the balcony type, suited to window box and borders. The flowers are single and of a rich color. Postpaid. Pkt. 15c; $\frac{1}{8}$ oz. 75c.

Petunia—The common petunia grows well in extreme sunlight and is used in massing, giving a pleasing effect. Easily grown from seed planted in the cold frame and transplanted to the garden after frost. Postpaid. Pkt. 10c; $\frac{1}{4}$ oz. 40c.

Victorious Double Petunia

Victorious—Giant flowered all double fringed Petunia. Dwarf compact plants. Blooms 100% double, 80% of these being very large flowers. All nicely fringed. Has wide range of brilliant colors. Finest for pots and borders. Trial Pkt. 35c.

PHLOX DECUISSATA (P) — (Perennial)—Large compact heads

Phlox Drummondii

of bloom from mid-summer until Fall. Height 2 to 4 feet. Wide range of colors. Sow seeds early in boxes and transplant seedlings once before placing in permanent location. Usually blooms the first season. Requires 5 to 6 months for

seed to germinate. Mixed, Pkt. 10c; $\frac{1}{8}$ oz. 60c.

PHLOX DRUMMONDI—Unrivalled for richness and beauty of color, ranging from white to the deepest scarlet and purple. For cutting for bouquets or for bedding in masses they are unsurpassed. Hardy annual, one foot high. Sow as soon as soil is warm. Transplant about one foot apart.

Large Flowering—Mixed. Pkt. 10c; $\frac{1}{4}$ oz. 50c.

PORTULACA — (Rose Moss) — Brilliant dwarf annuals, only 6 inches high, luxuriating in warm situations and blooming profusely in early Summer to Autumn. For low beds and masses of color from spring until frost they are indispensable; the colors range through innumerable shades of red, yellow, pink, white, striped, etc. Sow seed indoors. Thrive best in hot and dry situation.

Single Mixed, Pkt. 10c; $\frac{1}{4}$ oz. 45c.

Double Mixed, Pkt. 10c; $\frac{1}{8}$ oz. 75c.

Single and Double Mixed. Pkt. 10c.

PENTSTEMON — Where winters are mild this may be grown as a perennial, but in most sections it should be treated like an annual. Sow the seed thinly, early in the spring, indoors in boxes.

Grows 2 to 3 feet tall, bearing an abundance of long flower-spikes set with large blooms in many bright colors. Postpaid. Pkt. 15c; 1-16 oz. 35c; $\frac{1}{8}$ oz. 55c; $\frac{1}{4}$ oz. 95c.

PINKS—Old fashioned flowers producing a variety of colors. Useful for beds and borders as they are low growing. Postpaid. Pkt. 10; $\frac{1}{4}$ oz. 35c.

POPPY, Double Carnation Flowered — These ball-like flowers are very attractive in the annual garden and grow readily from seed planted out of doors. Plants 3 feet tall. Postpaid. Pkt. 10c; k oz. 25c.

POPPY, Flanders — Brilliant scarlet memorial of the fields of Flanders. Postpaid. Pkt. 10c; $\frac{1}{2}$ oz. 25c.

Do best when fed
with VIGORO

STANDARD FLOWER SEEDS—(Continued)

GIANT PANSIES, Oregon Giants — This strain differs from others in that the flowers are somewhat more flattened, but this characteristic adds considerably to the size of the blooms, which, if well grown, measure 4 in. across. The originator exhibited such blooms at the Oregon Flower show in 1928. A graceful wave adds beauty to the flowers that excel others Pansies in size and embrace as fine a color range as any. Postpaid. Pkt. 10c; ¼ oz. \$1.00.

TRIMARDEAU or Giant Mixed — These Pansies include an assortment of color that is perhaps more varied than that found in even more expensive strains. Postpaid. Pkt. 10c; ⅛ oz. 35c; ¼ oz. 55c; oz. \$1.65.

POPPY, Shirley—Single flowered poppies with soft hairy foliage. Because of their delicate shades of color, they are desired for the annual garden. Postpaid. Pkt. 10c; ½ oz. 25c.

PYRETHRUM ROSEUM (P) — Single Hybrids Mixed—Pkt. 10c; ⅛ oz. 45c. A lovely flower of easy culture and should be more generally grown. They resemble large daisies, but of various shades of pink, deep red and purple and make a pretty show in the garden. They also make handsome cut flowers, having stems 1½ feet long. The plants are perfectly hardy; grow 2 feet high.

SALVIA, Scarlet Sage — Salvia should not be transplanted to the permanent bed until frost is passed. The flower spikes are of brilliant color and the foliage dark green making a desirable contrast of color in mass planting. Postpaid. Pkt. 10c; ⅛ oz. 30c.

Salvia Splendens, Bonfire, Fireball—Postpaid. Pkt. 10c; ⅛ oz. 30c.

SALPIGLOSSIS—You should grow this beautiful annual. The plants grow about 3 feet tall, the flowers are bell-shaped, with delicate markings and velvety appearance. Grown in a wide range of colors and used for massing and cut flowers. Postpaid. Pkt. 10c; ¼ oz. 35c.

SCABIOSA, Mourning Bride — Flower stalks 2 feet tall, with inconspicuous foliage and large flat flowers of beautiful colors. Used in mass planting and for cut flowers as they keep well. Mixed annuals. Postpaid. Pkt. 10c; ¼ oz.

SCABIOSA CAUCASIA—A perennial Scabiosa with lilac and white colored flowers. Should be included in your rock garden planting. Postpaid. Pkt. 10c; ¼ oz. \$1.00 oz. 20c.

SCARLET RUNNER BEAN—This bean derives its name from the brilliant flower produced along

the runners. It is a pole type of bean and should be trained on a trellis or fence. Should be planted after danger of frost. Postpaid. Pkt. 10c; ¼ lb. 20c.

SWEET SULTAN — A beautiful annual for baskets and cutting with thistle-like heads. The petals are feathery and soft in texture with lavender, pink and light shades of color. Postpaid. Pkt. 10c; ¼ oz. 25c.

SNAPDRAGON, Antirrhinum—One of the most popular semi-hardy perennials for massing and cut flowers. The plants bloom profusely if kept cut off and well fertilized.

Copper King — Velvety copper scarlet.

Ruby—Rich velvety ruby red.

Canary Bird—Canary yellow.

Othello—Dark maroon.

The Rose—Rose pink.

All Snapdragons postpaid. Pkt. 10c; ¼ oz. 50c. Mixed. Pkt. 10c.

SNAPDRAGON—Rust-Proof Superb Majestic—Superb new strain. Excellent for all purposes. Flower spikes longer and larger. A superb mixture at 25c pkt; 3 pkts. 60c.

STATICE, Sea Lavender — A showy, everlasting flower with fine clusters of showy blooms carried on graceful stems. The plants are not difficult to grow from seed, which, however, germinates rather slowly. Height, 2 to 3 feet. Postpaid. Pkt. 10c; ⅛ oz. 25c.

SUNFLOWER—Mammoth Russian is the type generally grown for poultry feed and silage. The stalks often reach a height of 10 feet, with large disk heads. Postpaid. Pkt. 10c; ½ lb. 15c.

Dwarf Double—A smaller variety with large double yellow flowers, very uniform in type and beautiful in appearance. Postpaid. Pkt. 10c; oz. 25c.

SWEET WILLIAM—Our stock of this hardy perennial has a wide range of color combinations. The plants bloom early in the season and make excellent borders. Height 2 feet. Postpaid. Pkt. 10c; ¼ oz. 25c.

TRITOMA, Red Hot Poker—Hardy perennials producing a tall flower stalk of brilliant cerise color. Blooms during the early part of the season. Postpaid. Pkt. 10c; ¼ oz. 75c.

STOCKS—These popular flowers are easily grown, and are so highly fragrant and of such beauty they deserve a place in every garden. Should be sown under glass in a warm place, giving plenty of air after seedlings are up. Transplant when about 2 inches.

Imperial Large Flowering Ten Weeks—Choice Mixed, Pkt. 10c; ⅛ oz. 65c.

Dresden Perpetual or Branching—These ever-blooming stocks are popularly called "Cut and Come Again." Sown in March they flower profusely from July until frost; their best period being late autumn. Very fragrant.

Princess Alice, white, La France, Blush pink, Brilliant, Blood red, Sapphire, Violet, Creole, Canary yellow, Mary Queen, Pale blue, Rose Pink. Each Pkt. 15c; ¼ oz. \$1.00.

VERBENA—The Verbena is an ever popular annual for window boxes, borders, and massing. It is low growing and produces graceful flowers in pink, red, blue and white colors. Postpaid. Pkt. 10c; ¼ oz. 50c.

VIOLA—A perennial similar in culture to the ordinary violet. Flowers, lavender to purple in color. Quite fragrant. Postpaid. Pkt. 10c; ¼ oz. 50c.

WALL FLOWER—Half-hardy perennials growing 1 foot in height. Flowers are a rich red and yellow in color. Postpaid. Pkt. 10c; ¼ oz. 25c.

Giant Zinnias

Bodger's Gold Medal Dahlia-Flowered

Few flowers are so easily grown from seed sown in the open ground or bloom so abundantly and continuously as this hardy annual. Marvelous improvements have been wrought in the newer strains. We recommend them for groups, beds, borders and summer hedges, where they will bloom quite freely, but are incomparably bright during the month of August. Sow seed in the open ground early in the spring or start in hotbed or window and transplant when ground is suitably warmed.

DOUBLE DAHLIA-FLOWERED ZINNIAS

This mammoth sized, unusual shaped and color perfected type has revolutionized the appearance of our annual gardens during the past few years. They very closely resemble the double decorative type Dahlias in form and in their robust growth. Plants get up to 3 feet in height, with perfect flowers often 6 inches wide by 3 and 4 inches in depth. These range widely as to color, even introducing depth and tones heretofore unknown in Zinnias.

CRIMSON MONARCH—One of the best, with immense flowers. A bright and attractive shade of crimson-scarlet. The blooms are of perfect form, borne in great profusion.

EXQUISITE—The flowers resemble a large Decorative Dahlia. They are a pleasing shade of reddish rose with deeper rose in the center. One of the most attractive of this type.

GOLDEN STATE—An excellent color. Rich golden yellow, shading to orange as the flower ages. Blooms are large, of true Dahlia form, borne on long stems.

SCARLET FLAME — An orange-scarlet. A dazzling color; is one of the brightest, always attracting attention. Blooms profusely.

DREAM—The large flowers are a distinct shade of deep lavender, shading to purple as they age. Very large and of fine form. A free bloomer of strong and sturdy growth.

GIANTS OF CALIFORNIA

The great advantage of this type is that the very large flowers are of enormous size and flat, getting away from the conical type of the Giants and eliminating the stiffness that has been so objectionable in Zinnias in the past. The flowers from the time they open are attractive, making them a good cut flower from the early bud until they are in full bloom. They are twice the size of the ordinary Giants.

ENCHANTRESS—Color same as Exquisite in Dahlia Flowered type.

LEMON QUEEN—Lemon orange.

ORANGE KING — Cadmium or burnt orange.

ORIOLE—Considered the most beautiful of its class. Immense orange and gold bicolor, changing slightly as it ages.

METEOR—A rich flowing deep red, the darkest of all the red shades, fine form. Very large and greater bloomer than other reds.

BUTTERCUP—An immense deep creamy yellow. Very desirable and should be included in every collection.

OLD ROSE—Real old rose, for charm and beauty ranks next to Exquisite.

Separate Colors. Pkt. 10c; 1/8 oz. 60c.

DAHLIA-FLOWERED MIXTURE—This is a complete Mixture of Dahlia-flowered Zinnias, including all the above separate colors and many other beautiful and rich shades. Pkt. 10c; 1/4 oz. 50c; 1/2 oz. 95c; oz. \$1.75.

WILD CUCUMBER—

One of the most rapid growing vines for covering trellis or for shading windows. The seeds are very hard and should be scarified before planting. Fall sown seed will generally germinate by early spring. Postpaid. Pkt. 10c; oz. 25c.

WILD FLOWER GARDEN—A well balanced mixture of flower seeds suitable for planting in corners and vacant areas around the garden. Postpaid. Pkt. 10c; oz. 25c.

FLOWERS NEED IT!

It helps them grow finer, bigger blooms. Excellent for lawns, shrubs, trees, and gardens, too. Get some!

Feed your plants with Vigoro.

Alfalfa

Alfalfa yields the heaviest tonnage per acre of any hay crop. Alfalfa hay is relished by all classes of stock. Alfalfa contains a higher percentage of protein, to build muscle and bone, than any other feed produced on the farm. It is especially good for dairy cows. Alfalfa is a wonderful soil builder. Land which has been in Alfalfa for a few years will always produce bumper yields of any other crops.

COMMON ALFALFA—Our Common Alfalfa is mountain grown and has proven very satisfactory for Inland Empire conditions. "Supreme Quality." Write for prices.

GRIMM ALFALFA — Grimm Alfalfa is a distinct variety which originated in Minnesota. It produces a heavier and more branching root system than the common variety and is more resistant to winter killing and late spring frost. It yields slightly heavier than the common variety and produces variegated flowers. Grimm Alfalfa should be used where winter killing is a problem but elsewhere the common is just as satisfactory. Certified seed. Write for prices.

COSSACK ALFALFA — Very similar to Grimm. Cossack is claimed by some to be more hardy than Grimm. The original seed of this variety was brought from Siberia, but it has been grown in this country for 15 or 20 years. Write for prices.

LADAK ALFALFA—THE LATEST ALFALFA SENSATION

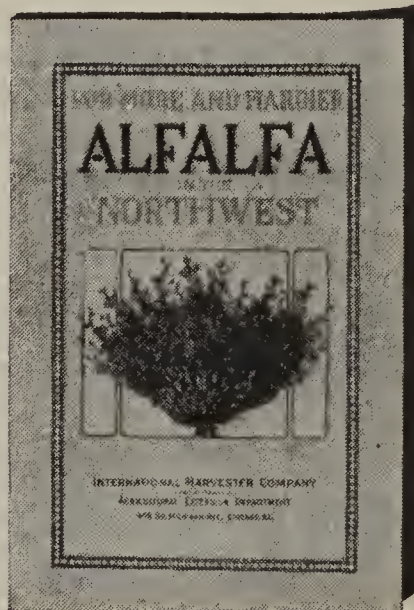

LADAK is a variety originated in the very high, mountainous sections of India. It has proved, under Northwestern and Great Plains conditions to be the hardiest, most drouth resistant and heaviest yielding variety so far known. In addition it has considerable wilt resistance. The supply is very limited; we offer not over ten pounds to a customer. Price, lb., postpaid, 90c. Write for quantity prices.

Sweet Clover

CULTURE—Sweet Clover is one of the best crops for soil improvement. It can be sown with a nurse crop of peas or seeded alone in early spring. In some localities it is possible to secure a good stand of alfalfa by seeding a mixture of sweet clover and alfalfa seed. The alfalfa becomes established by the time the sweet clover is gone. If continuous pasture is desired an area should be seeded each season to sweet clover, pasturing the old crop from May until the middle of the summer, then pasture the new crop until fall. If the sweet clover becomes too coarse and woody it may be cut and allowed to cure in the field and will be eaten readily. And if cut high, fresh green shoots will come again at once.

WHITE BLOSSOM SWEET CLOVER — White Blossom gives the heaviest tonnage and is a heavy nitrogen yielder. "Supreme Quality." Write for prices.

YELLOW BLOSSOM SWEET CLOVER SEED—Outside the lower and heavier soil sections of the Northwest the Yellow Blossom variety seems to be better adapted than the white. Its advantages over the higher and drier sections are greater hardiness as regards a combination of cold and drought, finer quality of hay, a crown like alfalfa so that it may be cut as close to the ground as one wishes. We have a wonderfully fine stock of seed. Write for prices.

BOOKLETS FREE

Alfalfa or Sweet Clover Booklets free with your purchase of field seeds. One book with each \$10.00 order of Field Seeds.

CLOVERS—Continued

MOUNTAIN GROWN CLOVER SEED

MEDIUM RED CLOVER—This is a good year to plant Red Clover. We have a plentiful supply of good Mountain Grown Red Clover seed. This Mountain Grown seed is excellent quality, nice, clean seed, and a good hardy strain. Write for prices.

ALSIKE OR SWEDISH CLOVER—It will stand poorly drained, cold, wet soils very well. Where the soil is slightly sour or acid be sure to sow Alsike. It is especially good in pasture mixtures on burned over timber lands. Write for prices.

MAMMOTH RED—Similar in appearance to the Medium Red Clover but growing larger and maturing later in the season. We suggest a mixture of 6 lbs. of clover to 10 lbs. Timothy per acre. The seed of this variety cannot be distinguished from that of Medium Red Clover. Write for prices.

LADINO CLOVER—New clover similar to white Dutch clover only growing much larger. Recommended for pasture. "Certified". Write for prices

WHITE DUTCH CLOVER—Used principally for lawn seeding but often used in pasture mixture. From 2 to 4 lbs. per acre is used for pasture mixtures. Postpaid. "Supreme," lb. 55c; 10 lbs. \$4.25.

Write for Quantity Prices.

Vetch

WINTER OR HAIRY VETCH—A fine legume for poor land for soil improvement. It is often grown in mixture with winter wheat or fall rye for hay or pasture, and planted alone as a cover crop for orchards. If sown alone, 30 to 40 lbs. are used per acre, or in mixtures with fall grain using one bushel of grain to 25 lbs. of vetch. The grain crop aids in supporting the vetch vines.

SPRING OR COMMON VETCH—This vetch produces larger seeds than the winter variety and should be planted in early spring, using 40 to 50 lbs. per acre. Fine for hay or pasture.

Freight extra on 100 lb. lots

With a Wil-Bo Seeder

Pasture and Hay Grasses

Timothy

TIMOTHY (*Phleum pratense*). Timothy is the most popular grass for hay and pasture purposes. It is easy to sow; does not require much seed per acre; starts growing quickly. It has a high feeding value when cut at the proper time. The average yield of Timothy is 2 to 3 tons of hay per acre. It is not a dry land crop. It will grow on irrigated land or ground that is naturally damp. Prices postpaid: lb. 25c; 10 lbs. \$1.25. Write for quantity prices.

ORCHARD GRASS—Orchard grass should be used in hay and pasture mixtures for dry land as it is hardy and drouth resistant. It starts early in the spring and produces pasture during the early fall. If sown alone 14 lbs. is required per acre. We suggest a mixture of Orchard Grass 5 lbs., Brome 5 lbs., and Slender Wheat 5 lbs. per acre for a permanent pasture on non-irrigated land, adding a few pounds of clover if a legume is desired. Write for quantity prices.

BROME—Brome Grass is a hardy sod-forming grass, very drouth resistant, and stands tramping. It is very palatable and nutritious. Write for prices.

RED TOP—A fine stemmed hardy grass for wet land. If sown alone 6 to 8 lbs. per acre used. Write for prices.

MEADOW FESCUE—A very hardy long-lived grass growing well on wet land as well as drier soils. It makes excellent pasture or hay. It requires about 15 lbs. per acre when seeding alone. Write for prices.

SLENDER WHEAT—A native grass of the northern Great Plains. It is very drouth resistant. It grows in bunches, maturing with timothy. The plants are very erect, leafy, and the heads small and slender. From 12 to 15 lbs. per acre should be used when seeding alone. Write for prices.

SUDAN GRASS—An annual grass suitable as a catch crop in areas where the growing season is warm and free of summer frosts. It may be drilled in rows wide enough apart for cultivation. This method requires 10 lbs. of seed per acre. If drilled for pasture or broadcast, from 25 to 30 lbs. are required. Postpaid. "Supreme," lb. 25c; 10 lbs. \$1.25. F.O.B. Lewiston, 100 lbs. \$8.00.

TALL MEADOW OAT GRASS — (*avena elatior*)—Often attains a height of 3 to 4 feet by the middle of June. Makes a splendid hay and thrives on sandy loam, but makes its best growth where there is some clay. Write for prices.

REED'S CANARY GRASS—A rapid growing perennial suited to localities that overflow or are too wet for other grasses.

It makes a fine pasture and will make a big crop of hay about equal in feed value to timothy. Write for prices.

CRESTED WHEAT GRASS—One of the hardest and nearest drouth resistant grasses discovered. If this grass will thrive as experiments so far indicate, our dry lands and hills can be made as valuable for pasture as many of our meadows. Write for prices.

DOMESTIC RYE GRASS—Is fine for quick pasture. Well adapted for making up mixtures for burned-over areas. Write for prices.

Sunflower

Sunflowers may be used as a silage crop. Experiments show that the quality and feeding value of the silage is comparable to that made from well matured corn. Under similar conditions sunflowers will outyield corn. Sunflowers, when grown for silage, may be drilled thickly in the row by the use of a grain drill, stopping some of the drills to permit cultivation of the crop. They may be sown with a corn planter, spacing the plants from 8 to 10 inches in the row. If a seed crop is desired the plants should be spaced at least two feet in the row.

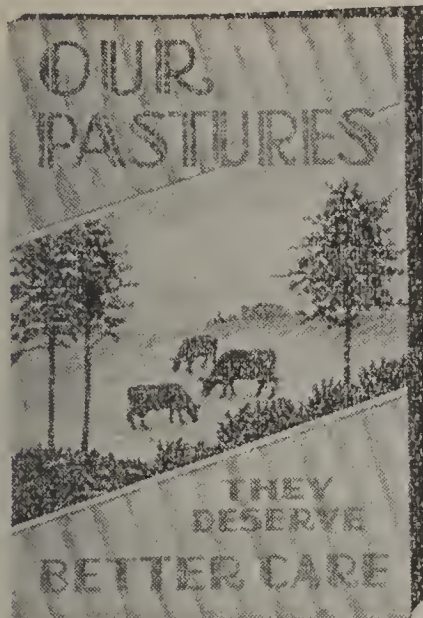

MAMMOTH RUSSIAN—One of the largest varieties with a heavy growth of leaves and large heads. The seeds are striped with black and gray color. Postpaid. Lb. 25c; 10 lbs. \$1.50. Not Postpaid, 100 lbs. \$10.50.

SPECIAL MIXTURE NO. 1 FOR BURNED-OVER LAND

Mixture consists of Orchard, Brome, Meadow Fescue, Timothy, Red and Alsike Clover

Special Priced at \$15.00 per cwt. F.O.B. Lewiston, Idaho

GRASSES—Continued

FREE

With every \$5 purchase of Field Seeds we are offering absolutely free a copy of this valuable little booklet, "Our Pastures," or any of the other booklets listed on last page.

DRY LAND PASTURE—Mixed especially for the regions between the Cascades and Rocky Mountains, and on good, common wheat land. Try this mixture, as we believe that it will give you best possible results. Sow 20 pounds per acre. Write for Prices.

MIXTURE FOR BURNED-OVER LAND—In grading and cleaning grasses and clovers, we frequently find combinations that are difficult of separation and while the seeds are often of excellent germination and quality, they cannot profitably be separated and cleaned, so we blend them to produce pasture mixtures suitable for sowing on burns and logged-off land, which at the price are splendid values and very economical for such purposes. Postpaid, lb. 30c; 10 lbs. \$2.50. Write for quantity prices.

For Lawns, Golf Links

PREPARING THE LAWN

The generally used Blue Grass and White Clover mixture is quite satisfactory but does not produce the velvet-like appearance of some of the newer grasses which are being used in the best lawns.

In preparing the seed bed the soil should be thoroughly leveled to insure against its settling and the surface should be loose enough so that the seed will germinate readily. If the soil is light and sandy granulated Peat Moss should be mixed with the surface soil.

Lawn grass can be seeded very early in the spring and in many localities early fall seeding is satisfactory. If it is impossible to keep the surface moist, a light covering of straw or lawn clippings will protect the surface from baking. After the grass seed has germinated this cover can be removed.

It requires about 1 lb. of lawn grass seed to 400 sq. feet of area. If you desire the very best lawn, we suggest using our Supreme Lawn Mixture which is made up of the best grade of grass seeds.

We believe that Bent grass should be used more generally for lawns, seeding it alone. An application of Vigoro followed by sprinkling will increase the vigor of the grass.

KENTUCKY BLUE GRASS—One of the most popular grasses for lawns. It produces a heavy sod, is winter hardy, and grows well where plenty of moisture is available. Post-

paid., lb. 50c; 5 lbs. \$2.25. Write for quantity prices.

SOUTH GERMAN MIXED BENT—A mixture of Bent grasses used for golf greens and lawns. This grass makes a very firm sod. The foliage is fine and velvety when kept clipped. Write for prices.

ASTORIA BENT—This species of Bent grass was discovered in the fields near Astoria, Oregon and was given that name. It is one of the best species of Bent as the leaves are very fine in texture and dark green. This Bent does well on high ground where moisture can be supplied and makes a beautiful sod. Postpaid, lb. \$1.00; 5 lbs. \$4.75. Write for quantity prices.

CHEWINGS FESCUE — A New Zealand grass of fine grayish green foliage, which is very tough and wiry. It is used in mixtures on golf fairways and on lawns subject to heavy wear. The grass must be clipped often and given an abundance of water so that it will retain its color and heavy turf growth. Write for prices.

WHITE DUTCH CLOVER—Should be used in mixtures for lawns in need of soil improvement. This clover is a long lived perennial and generally reseeds sufficiently so that it increases yearly. Postpaid, lb. 65c; 5 lbs. \$3.00. Write for quantity prices.

SUPREME LAWN MIXTURE—This is our own mixture developed after careful trials. We believe it best for general purposes, as it makes a fine velvety lawn that withstands hard use. It is composed of the grasses listed above, in the right proportion for best results. This mixture is made from the best stock and does not contain chaffy seed. Postpaid, 5 oz. 40c; 1 lb. \$1.10; 5 lbs. \$5.25; 10 lbs. \$9.75.

SHADY LAWN MIXTURE—This mixture fills a long felt want as it gives a fine, velvety turf in shady places where most grasses do not thrive. Postpaid, lb. 95c; Write for quantity prices.

MIXTURES FOR GOLF LINKS, PUTTING GREENS, FAIRWAYS—Write for prices stating amount wanted. We make these a specialty.

VIGORO

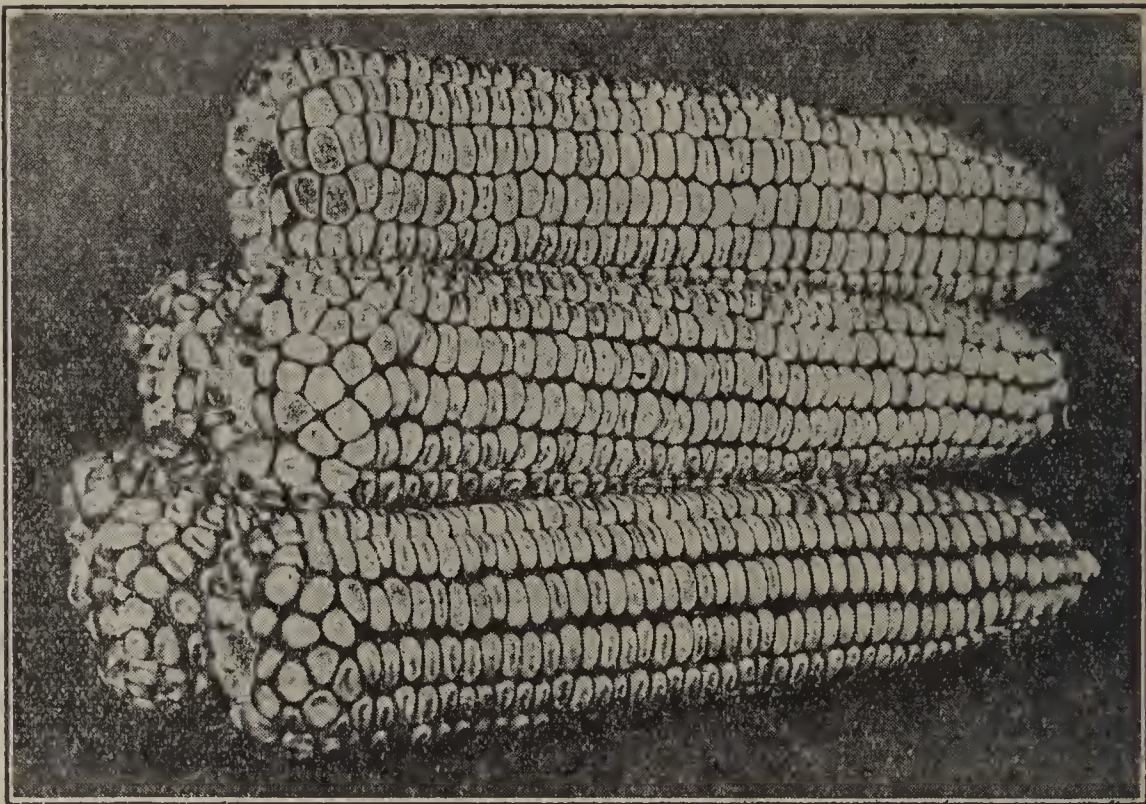

Golf greens and lawns are kept in splendid condition by feeding with Vigoro. For best results apply two or three times a season, and it will produce heavy sod of rich green color. You will not be troubled with winter kill.

Field Corn

7 to 8 pounds of seed required per acre

Our selection of corn varieties is made to meet a wide range of growing conditions

MINNESOTA NO. 13—A familiar variety developed in the northern part of the corn belt. It is hardy, producing a good leaf growth and nearly as early as Rustler and Thayer. Postpaid. Lb. 20c; 10 lbs. \$1.50. Write for quantity prices.

PRIDE OF THE NORTH

— This corn is medium early in maturing, producing a heavy yield of silage but requiring a somewhat longer growing season than Thayer Yellow Dent. The ears are larger than those of Minnesota 13 with a greater depth of grain. Postpaid. Lb. 20c; 10 lbs. \$1.50. Write for quantity prices.

WASHINGTON GROWN YELLOW DENT

—Makes a quick growth with abundant foliage, maturing early and gives a good grain yield and will make silage of the highest food content. Especially adapted to the Spokane Valley and irrigated valleys of the Pacific Northwest. Postpaid. Lb. 20c; 10 lbs. \$1.50. Write for quantity prices.

Idaho Yellow Dent

IDAHO YELLOW DENT—We have a fine strain of Idaho Yellow Dent, grown in Northern Idaho at an elevation of 2500 feet. This corn has been selected and grown in the same locality for years. If you want real early maturing corn, and one that will give a good yield, order this stock. Prepaid. Lb. 20c; 10 lbs. \$1.50. Write for quantity prices.

IDAHO WHITE DENT—Ears are large and uniform, with grain of good depth, very early and a heavy yielder. Postpaid. Lb. 20c; 10 lbs. \$1.50. Write for quantity prices.

Spring Grains

Hulless Oats

Hulless oats grow like common oats and look much like them in the field but when threshed the hulls separate from the oat kernel leaving the bare meat.

They make the finest poultry feed that can be raised on the farm. They will take the place of oat groats for the young chicks and turkeys and are claimed by many to equal the prepared rolled oats that we use for breakfast food and have been in the habit of buying from the store at a high price. Postpaid, 1 lb. 20c; 10 lbs. \$1.00. Not Postpaid. 100 lbs. \$4.00.

MARKTON—A smut resistant white oat which has produced maximum yields throughout the northwest on irrigated as

well as nonirrigated land. It is medium late in maturity. The grains are medium in size, with a very thin hull, producing very few double grains. Our stock of Markton oats was grown on our own seed farm, and is very high quality. Postpaid, 10 lbs. 80c. Not Postpaid. 100 lbs. \$3.00.

Flax

FLAX is grown to a limited extent throughout the northwest for grain. In the Willamette Valley in Western Oregon, it is grown for fibre. It should be planted much more extensively throughout the Inland Empire on land free of weeds after frost danger is past, seeding about 30 lbs. per acre. Yields as high as 30 bushels per acre under favorable conditions and pays better than grain. Postpaid. Lb. 20c; 10 lbs. \$1.25. Not Postpaid. 100 lbs. \$5.50. Write for quantity prices.

SPRING GRAINS—Continued

Barley

WHITE HULLESS—White Hulless Barley is grown for hay as well as grain. It can be planted with peas and grown for silage as well. Because of its being beardless it is desirable as a hay crop. Postpaid. 10 lbs. \$1.00. Not postpaid. 100 lbs. \$3.50.

BEARDLESS—This barley matures early and is used for hay and for silage. The grains have short points at the top instead of long barbed-like beards. Postpaid. 10 lbs. 90c. Not Postpaid. 100 lbs. \$2.75.

Alaska Peas

Rye

WINTER RYE—Winter Rye is often planted in the spring for pasture. Some farmers sow 20 to 30 lbs. Winter Rye with Sweet Clover in the early spring to reduce the chance of bloat in live stock and to increase the feeding value of the pasture. Write for prices.

SPRING RYE—Similar to the Winter variety except that it matures a grain crop when planted in the spring. The straw is not so heavy as in the winter variety but the grains are similar in size.

Either variety. Postpaid, 10 lbs. 90c; 50 lbs. \$2.50. Not postpaid. 100 lbs. \$3.00.

Field Peas

All of our peas are thoroughly fumigated and cleaned to remove weevil and are put up in excellent condition for seed. You cannot afford to plant seed that is not treated and properly cleaned.

ALASKA—An early maturing pea with slender vines growing to a height of 2 feet. The pods are straight, blunt, and well filled, all maturing at about the same time. The seed is smooth, round, dimpled, and of light blue color. Not postpaid. 100 lbs. \$3.00.

Write for prices on larger quantity.

WHITE CANADIAN—The plants of this are ranker in habit of growth and later than the Alaska. The pods are produced in clusters toward the top of the plant. The seeds are small, smooth, and of light cream color. Not postpaid. 100 lbs. \$4.00.

Field Beans

Rape

DWARF ESSEX RAPE—Rape is used for hog and sheep pasture, making a rapid growth of succulent feed. It is quite hardy and withstands frost. It is sown in early spring and also late summer, planting in rows to permit cultivation or sown broadcast. From 5 to 12 lbs. of seed is required per acre, depending upon the method of seeding. Rape belongs to the Cabbage family, easily grown and very cheap to plant. Postpaid 3rd zone. Lb. 25c; 10 lbs. \$2.00.

Proso Millet

HOG OR BROOM CORN MILLET—The hay is of a coarse quality, except when cut very young. The seed is of high food value especially for poultry and hogs. It is yellowish white in color. Hog Millet is very early and drought resistant and will produce excellent yields of seed and hay. Lb. 20c, postpaid; not postpaid, 100 lbs. \$3.

Fertilizers

Get Rid of Lawn Weeds

Get rid of lawn weeds permanently! There is but one satisfactory way of doing it and that is to build up the grass plants so they can fight weeds.

A lawn in which bare spots are reseeded and fed regularly with Vigoro (and not permitted to grow taller than 3 inches) will quickly develop dense root and top growth that will crowd out weeds and keep them out! Four pounds of Vigoro per 100 square feet of lawn or garden area is a "SQUARE MEAL." It's the most economical plant food you can buy. Use it on your lawn, flowers, and everything you grow.

100-lb. bag. \$4.00	10-lb. pkg. \$.85
25-lb. bag 1.50	5-lb. pkg. .45
50-lb. bag 2.50	1-lb. pkg. .10
F. O. B. Lewiston or Spokane	

BLOOD MEAL—Blood cooked, dried and finely ground, a quick acting fertilizer; analyzing very rich in effective nitrogen; in fact, the nitrogen of Dried Blood is one of the most effective forms of organic nitrogen known. This also carries some phosphorus; is a strong fertilizer, a little going a long way. 5 lbs. 35c; 10 lbs. 60c; 100-lb. sack \$3.75.

SHEEP GUANO—The best natural manure, dried and ground. Concentrated, soluble; quick in action, and free from weed seed. Splendid for vegetables; fine for roses and flowers. Excellent for lawns. 10 lbs. 20c; 25 lbs. 40c; 50 lbs. 65c; 100 lbs. \$1.00.

TANKAGE—Ground meat scraps and bone, dessicated in a vacuum, is very rich in phosphoric acid and nitrogen. Per 100 lb. sack \$3.00; ton \$58.00.

Handy Fertilizer Spreader

for the home garden and lawn.

Models, \$1.85 to \$5.50.

Spreads the fertilizer evenly and avoids the disagreeableness of hand spreading.

LAND PLASTER (Gypsum)—An indirect fertilizer as it releases plant food and changes soil conditions. Used largely on clover and alfalfa. 100 lbs. \$1.00; \$15.00 per ton. F.O.B. Lewiston or Spokane.

Red Steer Fertilizers

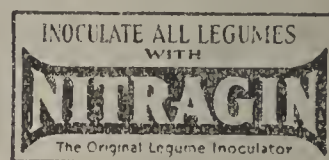

Each year we are realizing more and more the value of good commercial fertilizer. Many crop failures and unprofitable crops are due directly to lack of proper plant food in the soil. All fertilizers contain three essential plant foods: Nitrogen, Phosphoric Acid, and Potash. In naming the amount of plant foods available in fertilizer they are named always as given above, that is, a fertilizer that is called 2½-10-20 contains 2½ per cent nitrogen, 10 per cent phosphoric acid and 20 per cent potash. All of our analysis are given for soluble or available plant food only. Unavailable plant foods are of no value to you. We also carry the separate plant food fertilizers.

3-10-20—For Apples producing green fruit and too much wood growth; where nitrogen is plentiful. Comes in 125-lb. bags; per cwt. \$2.75; per ton \$55.00.

3-10-10—A good all-round fertilizer where conditions are normal. 125-lb. bags; per cwt. \$2.50; per ton \$48.00.

MURIATE OF POTASH—This fertilizer is especially valuable to fruit trees and berries. 100 lbs. \$2.75; write for quantity prices.

BONE MEAL FERTILIZER—This is finely ground and of best quality. Used for lawns, roses, shrubs and trees. Not very quick in action and should be applied in the fall or very early spring. Use 1,000 to 2,000 lbs. per acre. 5 lbs. 30c; 10 lbs. 50c; 100 lbs. \$2.75; write for ton prices.

SULPHATE OF AMMONIA — Strong in nitrogen. Will stimulate growth almost immediately. Lb. 10c; 5 lbs. 30c; 25 lbs. 90c; 100 lbs. \$3.00.

NITRATE OF SODA—It is very quick in action, stimulating rapid growth. Being quickly soluble, it should not be applied until spring on garden truck. Lb. 15c; 5 to 10 lbs. at 7c; 15 to 25 lbs. at 5c; 100 lbs. \$3.00. Write for quantity prices.

SUPERPHOSPHATE — This is what is known as acid phosphate, being phosphate rock that has been treated or processed, to make the phosphoric acid available. Has become very popular among grain and fruit growers. Use at the rate of 300 lbs. and up per acre. 100 lb. sks. \$2.00; 5 to 10 sk. lots at \$2.00; Ton price, write.

Insecticides

"SPRAYING PAYS"

Fungicides

ORTHO PRODUCTS

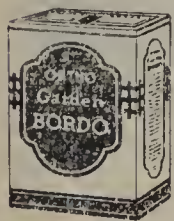

GARDEN VOLCK—for most sap-sucking insects and eggs. Also prevents some mildews—"Garden VOLCK" is the complete contact spray (containing VOLCK, Nicotine, Spreader and Penetrants) used to kill sap-sucking insects and other pests including certain Aphis, Leafhoppers, Scale Insects, Mealybugs, Thrips, White Flies, Plantbugs, Lacebugs, Squashbugs, Red Spiders, Mites, small Worms and Caterpillars, Leaf Miners, and the eggs of certain other insects. It also helps prevent Rose Mildew. Sold in 3½ oz. 35c; 1 pt. 85c; qt. \$1.25.

GARDEN WHALE OIL SOAP—A liquid whale oil soap, made full strength from best grade of No. 1 Whale Oil. Soluble in hard or soft, hot or cold water. Used as a spray for Aphis and as a wetter and spreader for nicotine, pyrethrum and certain other sprays. 1 pint, postpaid 45c; 1 quart, postpaid 65c.

GARDEN LEAD ARSENATE—

A stomach poison made from a true Basic Lead Arsenate and used as a spray or dust to control chewing insects such as most Beetles, Caterpillars and Worms. This Basic Form of Lead Arsenate, originated by this corporation, is safer to foliage than ordinary standard (acid) Lead Arsenate. 1 lb. Postpaid 40c.

GARDEN BORDO—A powerful fungicide, widely used to control fungus diseases, such as Peach Curly Leaf, Peach Blight, Pear Scab, Strawberry Rust, Potato Blight. This is a superior patented Prepared Bordeaux Mixture widely used by commercial growers of fruits, vegetables and flowers. 1 lb. carton, postpaid 35c.

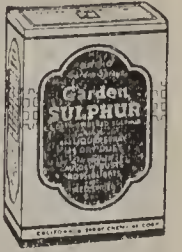

ORTHO GARDEN POISONED BARLEY

A poisoned grain for killing Squirrels and Gophers. Contains strychnine. 1 lb. 35c, Postpaid 45c.

GARDEN TENDUST—A high-kill Nicotine dust containing 4% of actual Nicotine Alkaloid or the equivalent of 10% Nicotine Sulphate-40. This is exceptionally strong, making it an excellent dust for killing Aphis and Thrips. Does not injure the appearance of open flowers. 6 oz. 30c, Postpaid 40c.

GARDEN SULPHUR—A superfine powdered sulphur prepared in a form suitable for use as a Dust or as a Liquid Spray to control Powdery Mildew, Apple Scab, Brown Rot, etc. Packed in dust proof carton that makes it easy to handle. 2 lb. carton, postpaid 35c.

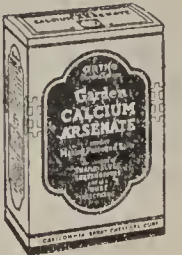

GARDEN BUG-GO—A specially prepared bait that has proved quite effective for attracting and destroying Snails, Slugs, Sow Bugs, Pill Bugs, Earwigs, Grasshoppers, Cut Worms, Army Worms, and certain other

night-feeding chewing insects that do not inhabit the plants they attack. This product is backed by special advertising and sales promotion. 1 lb. Postpaid 30c; 3 lbs. Postpaid 65c.

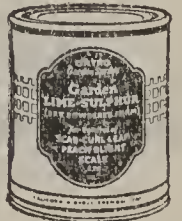

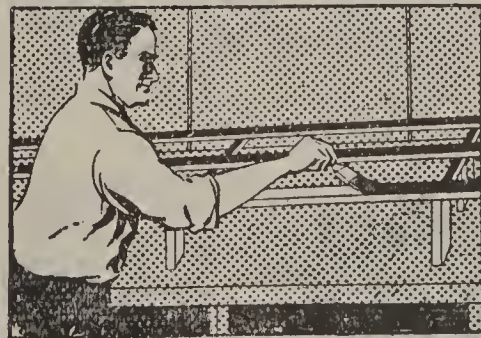

GARDEN CALCIUM ARSENATE—

A strong stomach poison used in home making of poisoned baits for the control of Snails, Slugs, Grasshoppers, Cutworms, Sowbugs, Armyworms, etc. Also used as a dust or liquid spray to control Colorado Potato Beetle, Cabbage Worm, Tomato Worm and certain other chewing insects. 1 lb. 20c; 3 lb. 50c. Postpaid, 1 lb. 30c; 3 lb. 65c.

LIME SULPHUR—A standard 33° Baume lime and sulphur converted into a dry powder but having all the effectiveness of the liquid product when dissolved in water.

For use in dormant spraying against scale, peach blight, leaf curl and twig borer. Summer spraying against scab, soot, blotch, red spider and mite. 1 lb. 45c, postpaid.

Prevent Disease Losses by Using Du Bay Seed Disinfectants

SEMESAN BEL — for seed potatoes. Potato diseases cause a loss equivalent to the yield of one acre in every five or six acres planted. One pound treats 16 to 22 bushels of seed. 4 oz. 50c; 1 lb. \$1.75; 5 lbs. \$8.00; 25 lbs. \$31.00.

SEMESAN — for vegetable and flower seeds. Kill these harmful disease organisms on the seed with Semesan before planting. 2 oz. 50c; 1 lb. \$2.75; 5 lbs. \$13.00; 25 lbs. 26.25.

NEW IMPROVED CERESAN—Generally controls stinking smut or bunt of wheat, barley covered smut and stripe, and loose and covered smuts of oats. One treatment for all three grains. Only one-half ounce of New Improved Ceresan is needed to treat a bushel of seed. New Improved Ceresan is quickly and easily applied as a dust by means of a rotary seed treater or by the shovel method. After treating, the seed should be stored in a pile or sacks for 24 hours before planting. Price, 1 lb. 75c, Postpaid 85c; 5 lbs. \$3.00, Postpaid \$3.15.

COPPER CARBONATE for treating wheat—Eighteen per cent copper carbonate is used in dry areas where less danger of smutting is encountered. 5 lbs. 75c; 30-lb. case \$4.50.

50 PER CENT COPPER CARBONATE — Used generally by farmers of this section. Universally accepted as best wheat treatment for smut. Sherwin-Williams Brand. 5 lbs. \$1.15; 10 lbs. \$2.25; 40-lb. case, \$8.80. Price F. O. B. Lewiston or Spokane.

GRAFTING WAX—The old standby of orchardists in the Northwest. Made after a special formula and packed in convenient package with instructions for use. 1/4 lb. 25c; 1/2 lb. 35c; 1 lb. 50c. Add postage.

INSECTICIDES and FUNGICIDES—Continued

PENTOX
THE NEW WEED KILLER
Controls deep rooted perennial weeds.

It is possible, now, to control certain deep-rooted perennial weeds including Morning Glory, Alkali Mallow, Russian Knapweed and White Horse Nettle, in cultivated lands without injuring the soil for annual crop purposes and without injury to trees in orchards.

PENTOX, in addition to its use on farms has also proved effective in the control of weeds in lawns and on the fairways of golf courses.

1. If a lawn has weeds scattered over it, these weeds can be killed by using a mixture of 1 part Pentox in 10 parts of water, and placing a few drops of this mixture in the crown (center) of each plant. Such weeds as Dandelions, Plantain, Ribwort, etc., can thus be "spotted out." Write for complete directions.

1/2 gal bottle	\$ 2.00
4 1/2 gal drums.	12.50
14 gal. drums	28.00
28 gal. drum, per gal.....	1.50

CHEMICAL WEED KILLERS (SODIUM CHLORATE)—Sodium Chlorate is the most effective chemical known for the eradication of noxious weeds. This fact has been demonstrated many times by tests carried on by several of our leading agricultural experiment stations. Mixed with water and sprayed thoroughly on leaves and stems of Morning Glory, Canada Thistle and Quack Grass, and many other enemies of the farmer, it will work wonders. 1 lb. 25c. Postpaid. Write for quantity prices.

POULTRY AND STOCK REMEDIES

BAG BALM
70c Postpaid.

BAG BALM DILATORS—25 medicated dilators packed in a small can of Bag Balm for 65c. Postpaid.

KOW-KARE—Small cans, 1 1/4 lbs. 75c; 2 3/4 lbs. \$1.40. Postpaid. Free booklet on request.

POULTRY PEPPER—In cold, wet weather it gives tone to the system, puts vim and snap into the birds, and is a great help to egg production. Postpaid. 1b. 25c.

VITA BRAND COD-LIVER OIL—The importance of vitamins in the rations of poultry and livestock has been quite clearly defined during recent years. Especially are the fat soluble vitamins, A. and D, important in the maintenance of bodily vigor and prevention and cure of diseases. 5 gal. cans, \$7.00; 1 gal. can, \$1.65; quart cans, 75c. Postpaid third zone.

TOBACCO POWDER — A very effective agent for controlling round worms in poultry. Used also quite generally in the dust bath for body vermin, and a very effective fumigant when burned in poultry houses. Postpaid. 1 lb. 25c; 10 lbs. \$2.00.

EPSOM SALTS — Pure, use for stock or poultry. 3 lbs. 40c. Postpaid.

WALKO—The safe way to raise your chicks. Also used for older chickens. Place in drinking water or milk. Tablets postpaid. Per box, 50c.

LEE WAY POULTRY REMEDIES

The Geo. H. Lee Company line of Poultry Remedies is, in our opinion, the best and most satisfactory. That company maintains a Research Department that is constantly working to maintain the high standard of its products and, when possible, to improve them.

The Duthie Seed Company sought, and obtained, the distribution right for supplying Lee Remedies to all dealers in the eastern half of Washington, eastern Oregon, western Montana and northern Idaho. We maintain a complete stock of Lee products and can fill mail orders for our customers promptly, from any of our branches.

GERMOZONE

It pays to guard against crop, digestive and bowel disorders that are so common in poultry. Many of those expensive troubles can be avoided by the regular use of Germozone in the drinking water three times a week. Two teaspoonfuls to the quart.

Germs that cause many serious diseases are often spread through the drinking water. So the water should be disinfected. But many of them are picked up from the floor or droppings and get into the crop without going through the drinking water; what is needed for them is something that will work against them in the crop too.

Germozone is different from tablets and ordinary disinfectants that work only in the water. Germozone disinfects the drinking water, of course, and is valuable for preventing the spread of many diseases through the water. But Germozone works in the crop too. That is what makes it so much better. Germozone is germicidal against germs with which it comes in contact—first in the water and then in the crop. And, third, because of its astringent action back in the intestine, it is good for diarrheas and bowel troubles that result so often from improper feed. It is good as a preventive and as an internal medicine, for those diarrheas and for a number of other diseases.

Also, as a germicide and disinfectant, Germozone is excellent—and for treating Ocular Roup. Powerful but perfectly safe, won't smart or hurt healthy tissue. Give your poultry the benefit of Germozone.

THE GIZZARD CAPSULE

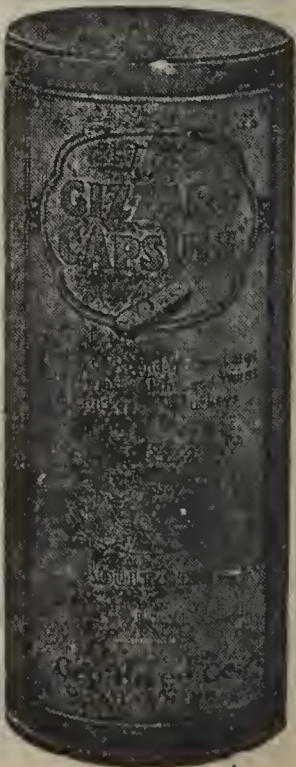

Most wormy birds have two or three kinds of worms. If they have Large Tapes and Pins they should not be wormed for only Rounds. The Gizzard Capsule is for all three kinds, Large Round, Large Tape and Pin Worms. Don't worm for only Large Round Worms.

It is much easier, and costs less, to give each bird a Gizzard Capsule than it would be to give one kind of powders or medicine for Large Round Worms and something else for Large Tape Worms. The Gizzard Capsule costs as little as one cent per bird for the Adult Size, down to about one-half cent for the Chick Size. One more egg per bird will more than pay for worming your flock with the Gizzard Capsule.

Because the Gizzard Capsule coating is insoluble it won't dissolve or melt in crop or stomach. This avoids any chemical action, between the medicine and the foods and liquids there, to weaken the medicine. The proper dose, full strength, fresh, undiluted and unweakened, is delivered right into the gizzard without any previous absorption of any of it by the bird to sicken it. There the capsule is crushed like a grain of corn and the medicine passes directly into the intestine and to the worms.

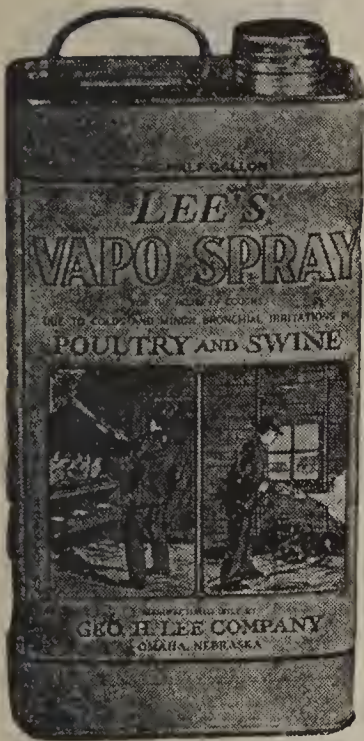

Nothing else can give you these advantages of the Gizzard Capsule. That is why over one hundred million birds have been wormed with it. Worm your poultry with it—chickens and turkeys.

LEEMULSION AND VAPO-SPRAY

Diseases of the air passages are often dangerous and expensive. They often spread rapidly through a flock. When birds have Colds, sneeze or cough, wheeze or gasp, act quickly. Give all the birds Epsom Salts. Then give them either Leemulsion in soaked grain or mash, or spray them several times a day with Vapo-Spray. In severe cases it is advisable to use both. For more about these diseases and about how Leemulsion and Vapo-Spray work and just how they should be used, see the free Lee Way Poultry Book.

FOR LICE AND MITES—THREE PRODUCTS

For control of body lice on chickens, paint Lee's Lice Killer on roosts and dropping boards, if the roosts are not over 4 inches above the dropping boards. Otherwise paint Lee's Perch Paint on only the roost poles.

For poultry house mites dilute Lee's Lice Killer with equal amount of fuel oil or crank case oil or use it full strength, and spray it liberally into all cracks, crevices and joints of walls, roosting places and nest boxes.

For dusting setting hens or an occasional bird, and for chicks over 6 weeks of age, use Lee's Louse Powder. Contains an unusually high percentage of active ingredients; just enough talc to keep it from being too concentrated.

HUDSON GARDEN TOOLS

HUDSON HILL AND DRILL SEEDER

Single or Double Wheel Cultivator. Six Tools in One

The 201 Seeder and cultivator is a combination outfit comprising six tools in one. May be used as a hill seeder; drill seeder; a double wheel cultivator, plow or hoe; or a single wheel cultivator, plow or hoe. It has all the equipment to serve the gardener from the initial seeding until final cultivation. It is readily converted from one use to another, the change from seeder to cultivator being accomplished by removing two bolts, one standard frame being used throughout. The outfit then become a cultivator, the sturdy high arch frame adapting it for use either astride or between the rows. Complete, wt. 56 lbs. \$15.50. Seeder only, wt. 44 lbs. \$14.

Tool equipment of 446 Plow consists of clover-leaf Sweep, double pointed shovel and combination 5-tooth cultivator and scuffle hoe. Very satisfactory tool. Tool standard is adjustable for pitch of tool and height of handle. Priced \$3.60 each F.O.B. Lewiston or Spokane.

The G6—6-tooth Cultivator Attachment is designed to cultivate thoroughly all spaces between 12 inch rows. Teeth are anchored individually, so any of them can be removed without loosening or disturbing the balance. Made of carbon steel, forged to shape and pitch. Price 90c each.

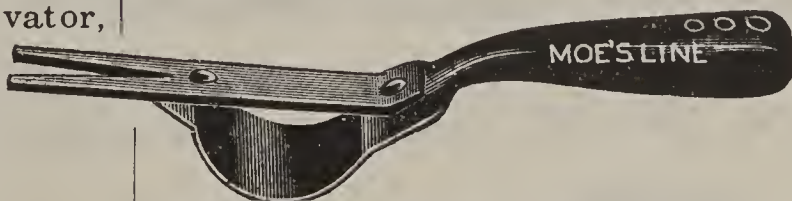

MOE'S HAND WEEDER—One of the handiest tools yet devised for weeding and thinning out. 20c, postpaid 25c.

MOE'S STEEL GARDEN WEEDERS—No. 82. One-piece pressed steel. Handsomely finished in black baked enamel. Has five steel fingers and is one of the most useful and handiest garden tools made. Ground and polished points. 15c, postpaid, 20c.

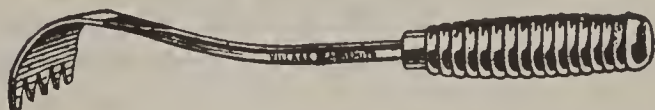

SPADING FORK—No. 30. Forged steel, 3 tine, 11 in., wt. 1 lb. 50c; postpaid 30c.

NO. 89 ALL STEEL LAWN WEEDER—Has a slotted steel prong which holds the weed firmly and a slight pressure on the handle removes it completely with the root. Easy to use and does not mar the lawn. Finely finished in baked enamel. Wt. 1 lb. 30c; postpaid, 35c

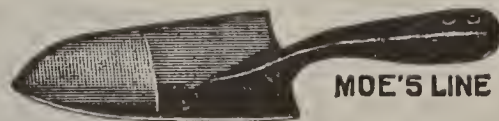

ASPARAGUS KNIFE—Has long shank and blade for cutting the tips below the surface. 45c; postpaid, 55c.

NO. 830. WEEDER—Village Blacksmith brand, wt. 1 lb. Not prepaid. 50c.

This picture shows the results of a comparative test of plant foods. Left plot of grass fed with Vigoro. Center plot fed with plant food of the same guaranteed analysis of nitrogen, phosphoric acid, and potash. Right plot fed with a plant food having higher nitrogen content.

Does Your Lawn Dry Up?

Unless properly watered, most lawns will dry out during a drought year. Many lawns, however, dry up every summer. This situation can be corrected by encouraging the development of deep-growing roots which, during any average year, will keep the grass supplied with necessary moisture.

What you feed your lawn has a lot to do with the kind of roots it develops. If you supply all 11 of the elements scientists have found growing plants require from the soil, you'll get substantial roots as well as luxuriant top growth. Use Vigoro this year. It's the Complete Plant Food made by Swift. It contains all 11 of the elements grass needs. Just apply it at the rate of 4 pounds per 100 square feet of lawn area. You'll be amazed at the new beauty you get from this clean, odorless, plant food.
